Swedish

An Essential Grammar

2nd edition

This fully revised second edition of Swedish: An Essential Grammar incorporates a large number of changes of detail and examples throughout, all made with the aim of clarifying the explanations and updating the idioms and advice on current usage. The bibliography has been expanded and a number of tables clarified.

Swedish: An Essential Grammar provides a fresh and accessible description of the language. It is suitable for independent study or for class-based tuition. The explanations are free of jargon and emphasis has been placed on the areas of Swedish that pose a particular challenge for English-speaking learners.

Features include:

• Detailed contents list
• Many tables and diagrams for extra clarity
• Separate glossary of linguistic and grammatical terms
• Detailed index, with numerous key Swedish and English words

Philip Holmes was formerly Reader in Scandinavian Studies at the University of Hull and is now a freelance translator.

Ian Hinchliffe is a freelance translator, living in Sweden.
Routledge Essential Grammars

Essential Grammars are available for the following languages:

Arabic (forthcoming)
Chinese
Danish
Dutch
English
Finnish
German
Modern Greek
Modern Hebrew
Hindi (forthcoming)
Hungarian
Norwegian
Polish
Portuguese
Spanish
Swedish
Thai
Urdu

Other titles of related interest published by Routledge:

Colloquial Swedish
Swedish: A Comprehensive Grammar
Swedish Dictionary
Swedish

An Essential Grammar

2nd edition

Philip Holmes and Ian Hinchliffe
## Contents

**Preface** xiii  
**Symbols and abbreviations used in the text** xv  

**Introduction** 1  
0.1 Some advice for the beginner 1  
0.2 Similarities between Swedish and English 2  

**Chapter 1 Pronunciation** 5  
1.1 Vowels 5  
   1.1.1 Stressed vowels and their pronunciation 5  
   1.1.2 Pronunciation of unstressed vowels 7  
   1.1.3 Vowel length 8  
   1.1.4 Syllable length 10  
1.2 Consonants and consonant groups 10  
   1.2.1 s, z, c, sc 11  
   1.2.2 j, gj, dj, hj, lj 12  
   1.2.3 r, t, l, x, w 12  
   1.2.4 g, k, sk 13  
   1.2.5 ng, gn, kn, mn 14  
   1.2.6 rs, rd, rt, rn, rl 15  
   1.2.7 Omitting -d, -g, -t, -k, -l 15  
   1.2.8 Omitting -e 19  
   1.2.9 Voiced consonants pronounced unvoiced before -s, -t 20  
   1.2.10 Written and spoken forms of some common words 21  
   1.2.11 Assimilation 22
### Chapter 2 Stress and accent

- **2.1 Sentence stress**
- **2.2 Word stress**
- **2.3 Accent**
- **2.4 Functions of accent 1/accent 2**
- **2.5 Rules for accent 2**

### Chapter 3 Nouns

- **3.1 Gender and noun type**
  - **3.1.1 Gender**
  - **3.1.2 Gender rules**
  - **3.1.3 Types of noun**
- **3.2 Indefinite declension**
  - **3.2.1 Indefinite forms**
  - **3.2.2 Plurals**
  - **3.2.3 Plurals – predictability**
- **3.3 Plural forms**
  - **3.3.1 Plurals in -or (first declension)**
  - **3.3.2 Plurals in -ar (second declension)**
  - **3.3.3 Plurals in -er (third declension)**
  - **3.3.4 Plurals in -r (fourth declension)**
  - **3.3.5 Plurals in -n (fifth declension)**
  - **3.3.6 Plurals in -zero (no plural ending, sixth declension)**
  - **3.3.7 Plurals in -s (seventh declension)**
  - **3.3.8 Collective nouns**
  - **3.3.9 Nouns with no plural form or no singular form**
- **3.4 Differences in number between Swedish and English**
  - **3.4.1 Differences in number**
- **3.5 Definite declension**
  - **3.5.1 Forms with end article singular**
  - **3.5.2 Forms with end article plural**
- **3.6 Article use**
  - **3.6.1 End article in Swedish, no article in English**
  - **3.6.2 End article in Swedish, indefinite article in English**
  - **3.6.3 No article in Swedish, definite article in English**
3.6.4 No article in Swedish, indefinite article in English 50
3.6.5 End article in Swedish, possessive pronoun in English 51
3.6.6 Article use with demonstrative pronouns 52
3.6.7 No article after the possessive 52

3.7 Genitives 53
3.7.1 The genitive 53

Chapter 4 Adjectives 55
4.1 Adjectives in outline 55
4.2 Indefinite declension 56
4.2.1 Indefinite forms – regular 56
4.2.2 Indefinite forms – variations 56
4.2.3 Indeclinable adjectives 58
4.2.4 Indefinite constructions 60
4.2.5 Agreement and lack of agreement 60
4.3 Definite declension 61
4.3.1 Definite form of the adjective: -e or -a? 61
4.3.2 Definite construction Type 1 – den nya bilen 62
4.3.3 Definite construction Type 2 – firmans nya bil 63
4.3.4 Definite construction Type 3 – svenska språket 64
4.3.5 Definite construction Type 4 – första klass 66
4.3.6 Definite constructions – summary chart 67
4.4 Adjectival nouns and nationality words 68
4.4.1 Adjectival nouns 68
4.4.2 Nationality words 70
4.5 Comparison of adjectives 71
4.5.1 Comparison with -are, -ast 71
4.5.2 Comparison with -re, -st 72
4.5.3 Irregular comparison 72
4.5.4 Comparison with mer, mest 73
4.5.5 Comparison (indefinite) – summary chart 74
4.5.6 Comparison (indefinite and definite) 75
4.5.7 Use of comparatives and superlatives 76

Chapter 5 Pronouns 78
5.1 Personal and reflexive pronouns – form 78
5.2 Use of personal pronouns 79
5.3 Reflexive pronouns 81
Chapter 6  Numerals

6.1  Cardinal and ordinal numbers
6.2  Major uses of cardinal and ordinal numbers
6.3  Time by the clock

Chapter 7  Verbs

7.1  Verb forms in outline
7.2  The four conjugations
   7.2.1  First conjugation 101
   7.2.2  Irregular verbs of the first conjugation 102
   7.2.3  Second conjugation 102
   7.2.4  Irregular verbs of the second conjugation 104
   7.2.5  Third conjugation 105
   7.2.6  Irregular verbs of the third conjugation 106
   7.2.7  Fourth conjugation: introduction 107
   7.2.8  Fourth conjugation: gradation series i – e – i 108
   7.2.9  Fourth conjugation: gradation series y(j)u – ö – u 109
   7.2.10 Fourth conjugation: gradation series i – a – u 110
   7.2.11 Fourth conjugation: gradation series a – o – a 111
   7.2.12 Fourth conjugation: gradation series ä – a – u 111
   7.2.13 Fourth conjugation: minor gradation series (mixed) 112
7.3  Participle and supine 112
   7.3.1  Supine and past participle forms 112
   7.3.2  Use of the supine and past participle 113
   7.3.3  Present participle 114
7.4  Translating verbs 114
   7.4.1  Some problems in translating English verbs 114
   7.4.2  Translating the English verb ‘to be’ 119
7.5 The use of the infinitive and different verbal constructions

7.5.1 Infinitive – verbal use 121
7.5.2 Infinitive – nominal use 122
7.5.3 Use of the infinitive in English and Swedish 123
7.5.4 Translating ‘-ing’ forms 124
7.5.5 Present tense 124
7.5.6 Past tense 125
7.5.7 Perfect tense 126
7.5.8 Pluperfect tense 127
7.5.9 Future tense 128
7.5.10 Mood and modal verbs 129
7.5.11 Use of modal verbs 129
7.5.12 Subjunctive 131
7.5.13 Imperative 131
7.5.14 Transitive, intransitive and reflexive verbs 132
7.5.15 s-forms 134
7.5.16 Uses of s-forms 135
7.5.17 Passive 136
7.5.18 Compound verbs 139

Chapter 8 Adverbs

8.1 Forms of adverbs 142
8.2 Use of adverbs 145
8.3 Adverbs indicating location and motion 146
8.4 Some difficult adverbs 148

Chapter 9 Interjections

9.1 Interjections 152

Chapter 10 Prepositions

10.1 Prepositions – introduction 154
10.2 The most common Swedish prepositions 156
10.2.1 Av 158
10.2.2 Från 158
10.2.3 För 159
10.2.4 I 160
10.2.5 Med 161
10.2.6 Om 162
10.2.7 På 162
10.2.8 Till 164
10.2.9 Under 165
10.2.10 Vid 166

10.3 Translating prepositions 166
10.3.1 Some common English prepositions and their Swedish equivalents 166
10.3.2 Translating ‘in, on, at’, etc., as expressions of time 168
10.3.3 Prepositions in expressions of time – summary 170
10.3.4 Translating ‘in, on, at’ etc., as expressions of place 171
10.3.5 Translating ‘of’ 172

Chapter 11 Conjunctions 175
11.1 Coordinating conjunctions 175
11.2 Subordinating conjunctions 176
11.3 Other subordinators 178
11.4 Some problem conjunctions 178

Chapter 12 Word order and sentence structure 182
12.1 Word classes and sentence elements 182
12.2 Sentence types 182
12.3 Main clause structure 184
12.4 Link position 185
12.5 Extra positions 185
12.6 Main clause positions (sentence elements) 186
  12.6.1 Subject and formal subject 186
  12.6.2 Finite verb 186
  12.6.3 Non-finite verb 187
  12.6.4 Clausal adverbial 187
  12.6.5 Other adverbials 188
  12.6.6 Objects and complements 188
  12.6.7 Verb particle 190
  12.6.8 Passive agent 190
  12.6.9 Main clause structure – extended positional scheme with examples 191
Chapter 13  Word formation 207

13.1 Compounding 207
13.2 Affixation 209
13.3 Abbreviation 212
13.4 List of common abbreviations 213

Chapter 14  Orthography 217

14.1 Small or capital letter? 217
14.2 Spelling of words ending in -m, -n 219

Chapter 15  Punctuation 220

15.1 The comma 220
15.2 The full stop 221
15.3 The colon 221
15.4 The exclamation mark 222
15.5 The apostrophe 222
15.6 Direct speech conventions 223
15.7 The hyphen 223
In this book we hope to do two things: first, to provide learners of Swedish with a concise description of the structure of the language, as well as some account of spelling, punctuation, word formation and the differences between spoken and written Swedish; and second, to describe in greater detail those areas of Swedish that in our experience may pose a challenge for English-language learners.

The book is largely traditional in its approach and terminology. Most of the linguistic and grammatical terms used are explained in a separate glossary at the end of the book. There is also an index that should in many cases serve as a starting point for a search.

With its many tables and charts the book is intended to be easy to use; it will often be possible for the learner to predict patterns in many new words from just a few simple rules.

Translations of many of the examples are provided. These translations have been kept fairly literal in order to help the learner see contrasts and correlations between Swedish and English.

We would like to thank Olle Kjellin for his invaluable help in preparing the sections on pronunciation, stress and accent, and Claes Christian Elert for permission to use ideas and examples from his Ljud och ord i svenskan 2 (Stockholm, 1981). Many other students and colleagues, including Brita Green, Jyrki Pietarinen and Vera Croghan, have provided valuable suggestions.

Learners who have progressed to an intermediate level or simply seek more thorough explanations of points of grammar and usage may wish to refer to our much more detailed Swedish: A Comprehensive Grammar (Routledge, second edition 2003).
Second edition

The first edition of this book came out in 1997, which preceded the publication of Svenska Akademiens Grammatik in 1999. This second edition involves a number of changes, not least a new categorization of noun declensions in Chapter 3 according to the new scheme proposed in Svenska Akademiens Grammatik.

There are also numerous changes of detail and examples throughout, all made with the aim of clarifying the explanations and updating the idioms and advice on current usage.
Symbols and abbreviations used in the text

[i:] phonetic script. The phonetic symbols used are those of the International Phonetic Alphabet

rölig long stressed vowel, long consonant
roll short stressed vowel
köpa unstressed vowel
ˈkalla, stuˈdera stressed syllable
lite(t), (att) letter, syllable or word may be omitted
ringer stem ring plus ending -er
för(fr)öut alternatives
hann (← hinna) hann derives from hinna
x → y x becomes y, e.g. when an ending is added
⊗ no ending is added, to distinguish a word or form from one to which an ending is added
* irregular forms
adj. adjective
adv. adverb
C consonant
CA clausal adverbial
conj. conjunction
cons. consonant
FE first element
FV finite verb
IP infinitive phrase
itr intransitive
L link
lit. literally
MC main clause
NFV non-finite verb
NP indefinite noun phrase
OA other adverbial

Some advice for the beginner

In our opinion the secret to being able to speak and write Swedish well lies in three main areas – pronunciation, stress and word order – but an ability to manipulate the language also requires familiarity with several other basic areas of grammar.

Learning Swedish pronunciation is aided by the fact that Swedish is a phonetic language – that is to say, a particular group of letters nearly always corresponds to a particular sound (unlike English which is notorious for its lack of this correspondence, e.g. ‘rough, through, bough, cough’, etc.). It is possible to learn a few simple rules for Swedish pronunciation which are outlined at the beginning of this book, and which are accurate predictors in nearly all cases, the only exceptions being foreign loanwords.

Stress is important too, both as regards which words in the sentence have stress and where within a particular word the stress comes. This is explained in 2.1 f.

Swedish also has two word accents, which is why Swedes seem to ‘sing’ when they pronounce some words. The rules for the occurrence of these accents are detailed in 2.3 ff.

Word order and sentence structure are the basic building blocks of the language, a sure foundation that cannot be ignored if the learner wishes to speak and write understandable Swedish beyond a very basic level. Swedish main clause word order, for example, is much more flexible than English order: the sentence more often begins with a word (or words) other than the subject, and sentence elements may appear in several different positions in main and subordinate clauses. A large section of this book is devoted to a systematic account of word order.
0.2 Similarities between Swedish and English

This is a comparative grammar, deliberately concentrating on the differences between Swedish and English, some of which we have just outlined, and thereby addressing specifically the needs of English-speaking learners. But it is also necessary to bear in mind just how similar these two languages are. A few of the major similarities which will help the learner acquire a knowledge of Swedish are outlined below.

0.2.1 Vocabulary

1. Both Swedish and English are Germanic languages and they possess a large core vocabulary of words that are identical or almost identical:

   arm, fot, finger, gräs, hus, knä, lamm, oss, skarp, son, två, tre, vi
   arm, foot, finger, grass, house, knee, lamb, us, sharp, son, two, three, we

2. Many English and American-English words have been borrowed into Swedish:

   baby, bestseller, check, cykel, deodorant, jeans, jobb, match, potatis, reporter, service

0.2.2 Grammar

1. In both languages only nominative and genitive cases are found for nouns:

   skepparen i båten  the skipper in the boat
   skepparens katt    the skipper’s cat

   Both languages have subject and object forms of pronouns:

   vi          we
   oss         us

2. A similar distinction is found between adjectives and adverbs:

   dyr          dear
   dyrt         dearly
3 The languages have similar methods for comparing adjectives:

- with inflexional endings:
  
<table>
<thead>
<tr>
<th>Swedish</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>fet</td>
<td>fat</td>
</tr>
<tr>
<td>fetare</td>
<td>fatter</td>
</tr>
<tr>
<td>fetast</td>
<td>fattest</td>
</tr>
</tbody>
</table>

- without inflexional endings:
  
<table>
<thead>
<tr>
<th>Swedish</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>typisk</td>
<td>typical</td>
</tr>
<tr>
<td>mer typisk</td>
<td>more typical</td>
</tr>
<tr>
<td>mest typisk</td>
<td>most typical</td>
</tr>
</tbody>
</table>

4 Both languages have weak verbs with a dental ending (incorporating -d/-t) in the past tense:

- Vi cyklade. We cycled.
- De kysste mig. They kissed me.

5 Both languages have strong verbs with a vowel change in the past tense:

- Vi sitter. We sit.
- Vi satt. We sat.

6 The languages have similar modal auxiliary verbs:

- kan, ska, måste can, shall, must
- De kan komma. They can come.

7 The languages have a similar use of tenses:

- Vi är här nu. We are here now.
- Han kom i april men han ska åka hem nästa vecka. He came in April but he will go home next week.
- Han har studerat i England. He has studied in England.
The languages have a similar use of the formal subject (Sw. det = ‘it/there’):

- **Det är kallt här.**  
  It is cold here.

- **Det finns ett museum där.**  
  There is a museum there.

Both languages have inverted (verb-subject) word order for questions:

- **Var är vi?**  
  Where are we?

- **Är du sjuk?**  
  Are you sick?

Both languages have only pre-positioned attributive adjectives:

- **en varm sommar**  
  a warm summer

- **den varma sommaren**  
  the warm summer
Chapter 1

Pronunciation

The phonetic script used here is that of the International Phonetic Association, and English equivalents are those of educated southern British English.

1.1 Vowels

The contrast between stressed and unstressed vowels is important in Swedish:

Stressed vowels may be either long or short:

\[
\begin{align*}
\text{mat} &\quad [m\alpha:t] \\
\text{matt} &\quad [m\alpha t]
\end{align*}
\]

Unstressed vowels are always short:

\[
\begin{align*}
\text{ställe} &\quad [st\epsilon l\epsilon] \\
\text{köper} &\quad [\zeta \epsilon p\epsilon r]
\end{align*}
\]

Short vowels are very short, shorter than in English. Long vowels are very long, longer than in English.

1.1.1 Stressed vowels and their pronunciation

Nine different letters represent 21 different vowel sounds:

</table>

Approximate equivalent to pronunciation (Here ‘English’ = British English):

Long a [ɑ:] ‘a’ in English ‘father, dark’
Short a [a] ‘a’ in English ‘hat, hand’
Long å [o:] ‘a’ in English ‘all’, but with lip-rounding
Short å [ɔ] ‘o’ in English ‘hot’
Long o [ɔː] ‘oo’ in English ‘doom, moon’, with extreme lip-rounding and w-like fricative end-phase
Short o [o] ‘oo’ in English ‘book’ with less extreme lip-rounding
Long u [uː] Long u has no equivalent but is similar to ‘u’ in English ‘futile’, ‘putrid’. With extreme lip-rounding and w-like fricative end-phase

Notes:
1 Pronunciation of letter O: When long the pronunciation [ɔː] is more common than [oː], e.g. stor [stɔːr] is more usual than ordna [ɔːrdna]. When short the pronunciation [ɔ] is more common than [o] e.g. kosta [kɔsta] is more usual than ost [ɔst].
2 In the pronunciation of some vowels, especially A, Å, O, U there is a marked difference in quality (position of tongue and lips) between long and short.
3 Pronunciation of E, Ä, Ö before R is more open than in other positions.
4 Some long vowels in Swedish are diphthongs ending in a fricative end-phase:
   i [ɪ] y [ʏ] u [ʊː] ɔ [oː]
5 In the combination eu in loanwords U is pronounced as V (or F before T):
   neuros [nevro:s], terapeut [terapeft]
   But notice also: Europa [erɑʊːpa]
1.1.2 Pronunciation of unstressed vowels

Unstressed vowels (marked _˚_) occur in unstressed syllables before or after a stressed syllable:

für'stå  po'tatis  'skriver  'pojke

1 Unstressed _i_ in suffixes -ig, -lig, -isk, -ing, -is, -it:

sandig, bójlig, typisk, parkering, godis, sprungit

2 Unstressed _a_ in many inflexional endings and suffixes:

bilår (noun plural)  bilårna (noun plural definite)
dålåga (adjective plural)  roligast (adjective superlative)
tålå (verb infinitive)  tålår (verb present)
tålåxde (verb past)  tålåt (verb supine)
arbêtař (noun denoting person, occupation)

hemmå, borta (adverbs of location)
3 Unstressed o

flickör (noun plural) Sometimes pronounced [flikɔr], [flikɔr] or [flikɔr]

nio, tiö (numerals) Often pronounced [niː], [tiː]

tjugo (numeral) Pronounced [çuːɡu] or [çuːɡɔ]

Before r [ɔ] alternates with [o]: motor [mɔːːtɔr] or [mɔːːtɔːr]

4 Unstressed e

Usually [a]: gubbe, pojke, cykel, vacker, damer, köper, skriven

Notice that e is never silent; cf.

<table>
<thead>
<tr>
<th>English ‘spade’ [speid]</th>
<th>Swedish spade [spɑːdə]</th>
</tr>
</thead>
<tbody>
<tr>
<td>English ‘rune’ [ruːn]</td>
<td>Swedish Rune [ruːnə]</td>
</tr>
</tbody>
</table>

#### 1.1.3 Vowel length

1 Rules for predicting vowel length from written form: (V = Vowel, C = Consonant)

<table>
<thead>
<tr>
<th>Rule 1</th>
<th>Stressed vowels in open syllables (ending in a vowel) are long:</th>
<th>få V</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rule 2</td>
<td>Stressed vowels followed by one consonant are long</td>
<td>får VC</td>
</tr>
<tr>
<td>Rule 3</td>
<td>Stressed vowels followed by two or more consonants are short:</td>
<td>fätt VCC</td>
</tr>
<tr>
<td></td>
<td>(long consonant or consonant group)</td>
<td>fångna VCC</td>
</tr>
<tr>
<td></td>
<td></td>
<td>fångst VCCCC</td>
</tr>
<tr>
<td>Rule 4</td>
<td>Unstressed vowels are always short:</td>
<td>tala, köper</td>
</tr>
</tbody>
</table>

In accordance with Rule 1:
Stressed vowels before other vowels are long: trio, Dorotea

In accordance with Rule 3:
Stressed vowels before -sj, -ng (and their equivalents) are short as these consonant groups each represent one consonant sound – [ʃ] and [ŋ] – respectively: usch, lång, restaurang
Stressed vowels before -rm, -rb are short (cf. English): arm, charm, arbete

An exception to Rule 2:
Stressed vowels before -x [ks] are short as -x represents two consonant sounds [ks]: sax, flaxa, maximum

An exception to Rule 3:
Stressed vowels before -rn, -ln, -rl, -rd are long, as these consonant groups each represent one consonant sound, [n], [n], [l] and [d] respectively: barn, aln, härlig, gård

2 Vowel length and inflexional endings

Despite Rule 3 above, vowel length is not normally affected by the addition of inflexional endings or word formation suffixes:

- fi (neuter ending on adjective)
- sö (past tense ending on verb)
- sju (adjectival suffix)

However, if the stem ends in, or the inflexional ending begins in, a d/t, then the vowel is shortened according to Rule 3:

- bety (past tense ending on verb)
- mött (past tense ending on verb)
- vitt (neuter ending on adjective)

Similarly, if the stem ends in a long stressed vowel and the inflexional ending begins in a d/t, then the vowel is shortened according to Rule 3:

- blå (neuter ending on adjective)
- klädd (past participle ending on verb)
- trettio (‘-ty’ ending on numeral)
- sjutton (‘-teen’ ending on numeral)
1.1.4 Syllable length

1 A syllable consists of a vowel on its own or accompanied by one or more consonants before or after the vowel. There are the same number of syllables in a word as there are vowels. The following are all syllables:

ö  pä  två  att  alm  halm  hos  hemskt
V  CV  CCV  VCC  VCC  CVCC  CVC  CVCCCC

Many words have two syllables:

poj-ke   å-ker   kal-la
CVC-CV   V-CVC   CVC-CV

Some words have many syllables:

parkera:   industriarbetare:
par  -ke   -ra  in  -du  -stri  -ar  -be  -ta  -re
CVC  -CV  -CV  VC  -CV  -CCCV  -VC  -CV  -CV  -CV

2 All stressed syllables in Swedish are long, and contain:

EITHER a long vowel and single consonant:  al  is

Or

a short vowel + a long consonant:  all  alm  arm  arg
(double consonant or consonant group)  all-tid  al-mar  ar-mar  ar-ga
  hiss  lis-ta

See also 1.1.1 f above.

1.2 Consonants and consonant groups

There are 20 different letters representing 23 different sounds.

Consonants b, d, f, g, l, m, n, p, r, s, t, z may be doubled:

mamma, falla, hatt, jazz

When they either precede or follow a vowel, the letters b, d, f, h, m, n, v are usually pronounced as in English. But notice also the pronunciation of d in the group rd in 1.2.6 below.
Consonants \( p, t \) and \( k \) are usually pronounced \([p], [t], [k]\) (but see also 1.2.4 below), though they may also be strongly aspirated (with an exhalation of breath):

\[
\text{pappa} \ [p^\text{h}a\text{pa}] \ \text{ta} \ [t^\text{h}a:] \ \text{kasta} \ [k^\text{h}asta]
\]

Remember: Vowels are short before a long consonant (double consonant or consonant group):

\[
\text{hal} – \text{hall}
\]

1.2.1 \( s, z, c, sc \)

\( s \) \([s]\) Swedish \( s \) is like ‘s’ in English ‘sit’, \textit{not} as \( z \) in English ‘please’:

\[
\text{Lisa, läsa, stycke, ros, musik, stum}
\]

\( z \) \([s]\) is pronounced exactly as Swedish \( s \):

\[
\text{zon, zoologi}
\]

\textit{Exception}

\[
\text{[ts]} \quad \text{in some German names: Schweiz}
\]

\( c \) \([s]\) as in English ‘centre’ before \( e, i, y \):

\[
\text{centrum, cirka, cykel}
\]

\[
\text{[k]} \quad \text{as in English ‘cotton’ before \( a, o, u \)}:
\]

\[
\text{camping, cocktail, curry}
\]

\( sc \) \([s]\) as in English ‘scene’:

\[
\text{scen, fosforescent}
\]

\[
\text{[f]} \quad \text{as in English ‘fascist’}:
\]

\[
\text{fascist, crescendo, fascinerande}
\]
1.2.2  \textit{j, gj, dj, hj, lj}

\textit{j}  [j]  is pronounced as consonant ‘y’ in English ‘young’ before all vowels and at the end of a word:
\begin{itemize}
\item ja,
\item jul,
\item jobb,
\item jeans,
\item Jimmy,
\item Jenny,
\item järn
\end{itemize}
\begin{itemize}
\item haj,
\item hej,
\item detalj,
\item familj,
\item kampanj
\end{itemize}
\textit{[f]}  in a few loanwords:
\begin{itemize}
\item à jour,
\item journal,
\item journalist,
\item jalusi,
\item projekt
\end{itemize}
\textit{[j]}  gj-, dj-, hj-, lj- the first letter is silent and these groups are pronounced as Swedish \textit{j}. Notice therefore that the following pairs are pronounced in the same way:
\begin{itemize}
\item gjord – jord
\item djärv – järv
\item hjul – jul
\item ljus – jus
\end{itemize}

1.2.3  \textit{r, t, l, x, w}

\textit{r}  [r]  in Central and Northern Sweden is a tongue-tip trilled ‘r’ as in Scottish. This sound is found at the beginning and end of syllables:
\begin{itemize}
\item rum,
\item dörr,
\item norr
\end{itemize}
\textit{[l]}  in Southern Sweden there is a tongue root ‘r’, not unlike German and French ‘r’.

\textit{t}  [t]  is pronounced with the tip of the tongue on the back of the upper teeth and is thus slightly ‘sharper’ than in English:
\begin{itemize}
\item titta,
\item tratt
\end{itemize}
\textbf{Note:} In some loanwords \textit{t} may be pronounced as [ʃ] in words in -tion: station [staʃ:ɔ:n], motion [mɔʃ:ɔ:n]; and in -ti: initiativ [iniʃ:iati:v], aktie [akʃ:i:].

\textit{l}  [l]  is pronounced as ‘l’ in English ‘like’, \textit{not} as in ‘elk’:
\begin{itemize}
\item lilla,
\item till,
\item Ulla
\end{itemize}

\textit{x}  [ks]  is voiceless and pronounced as ‘x’ in English ‘excited’ \textit{not} as in ‘exist’:
\begin{itemize}
\item växa,
\item exempel,
\item strax
\end{itemize}
\textbf{Note:} In loanwords \textit{x} in an initial position is pronounced as s: xenofobi.

\textit{w}  [v]  is pronounced as ‘v’ and is nowadays found only in names and loanwords:
\begin{itemize}
\item Wasa,
\item whisky,
\item wellpapp,
\item WC [ve:se:]
\end{itemize}
The pronunciation of initial g-, k-, sk- varies according to the vowel following:

1. ‘Soft’ g-, k-, sk-

Before the vowels e, i, y, ä, ö these consonants are palatalized:

- g- [j] is pronounced as Swedish j or English consonant ‘y’ in ‘young’:
  
  Gösta, gymnasiu, gärna

- k- [ç] is pronounced something like German ‘ch’ in ‘ich’:
  
  köpa, källare, kyrka

- sk- [ʃ] is pronounced something like ‘sh’ in English ‘shirt’, but further back and always with lip-rounding:
  
  skinka, skön, skära

Like soft g [j], syllables ending in -lg [lj], -rg [rj]:

- helg, älg, Borg, Berg

Note also: galge, Norge, Sverige [sværja], orgel

Like soft k [ç], words beginning with the letters kj-, tj-, ch-:

- kjol, kjortel, tjugo, check

(This occurs before all vowels, cf. k-)

2. ‘Sje-ljud’ (soft sk sound or sj sound)

There are two variants of the Swedish sound:

- [ʃ] ‘Back sj-sound’, formed by raising the back of the tongue:
  
  skina, skytte

- [s] ‘Front sj-sound’, formed by raising the middle or front of the tongue:
  
  skötterska, Askim (Pronunciation varies in dialect and idiolect.)

Like back sj, words beginning with the letters sj-, skj-, stj-, and some loans with ch-, sch-:

- sju, skjorta, stjärna, choklad, schack
Like front sj, most words ending in -sion, -tion, -rs, -sch and their derivatives:

\[
\text{vision, station, kors, Anders, dusch, missionera}
\]

Note:
Some loanwords in g, j may be pronounced with either front sj or back sj:

\[
\text{generell, religiöös, energi, journalist}
\]

3 ‘Hard’ g-, k-, sk-

Before the vowels o, u, a, å these are pronounced as in English:

- g- [g] is pronounced as ‘g’ in English ‘gate’:

\[
\text{gata, gå, god}
\]

- k- [k] is pronounced as ‘k’ in English ‘keep’:

\[
\text{kaka, kcal, kul}
\]

- sk- [sk] is pronounced as ‘sk’ in English ‘skill’:

\[
\text{ska, skor, skugga}
\]

They are also usually ‘hard’ after all vowels:

\[
\text{Stig, lägga, Sveg Erik, doktor, lök ask, besk, diska}
\]

Exceptions to the rules found for pronunciation given in (1)–(3) above are found in the following words (mostly loans):

- k [k] before a soft vowel

\[
\text{arkiv, kille, fakir, monarki, Kiruna, bukett, keps, kö, prekär}
\]

- sk [sk] before a soft vowel

\[
\text{skippa, skiss, skepsis, sketch, skelett}
\]

- sk [ʃ] before a hard vowel

\[
\text{människa, marskalk}
\]

1.2.5 \[ng, gn, kn, mn\]

- ng [ŋ] is pronounced as one sound, as in southern English ‘singer’:

\[
\text{Inga, pengar, gånger}
\]

- gn [ŋn] is pronounced as Swedish ng + n, as in English ‘ring-necked’:

\[
\text{vagn, Ragnar, regn}
\]
Unlike English ‘gnaw’ the g is pronounced, as in English ‘pregnant’:

gnaga, Gnosjö

Unlike English ‘knife’ the k is pronounced, as in ‘locknut’:

kniv, knä, Knut

Unlike English ‘autumn’ the n is pronounced, as in ‘remnant’:

hanm, namn

\begin{itemize}
\item \textbf{rs, rd, rt, rn, rl}
\end{itemize}

In Central and Northern Swedish these groups produce ‘alveolar retroflex’ sounds:

\begin{center}
\begin{tabular}{ccccccc}
\end{tabular}
\end{center}

These are so called because the tongue tip is bent backwards against the alveolar ridge behind the upper teeth rather than (in the case of d, t, n, l alone) behind the teeth themselves. In the case of rd, rt, rn, rl these sounds may be difficult for the non-Swede to distinguish from normal d, t, n, l:

bord bort barn Karl

bod bot ban kal

But rs [ʂ] is much easier to hear. It is the ‘front sj-sound’, pronounced as ‘sh’ in English ‘sheep’:

fors, Lars, varsågod, störst, mars, person

See also 1.2.11.

\begin{itemize}
\item \textbf{1.2.7 Omitting -d, -g, -t, -k, -l}
\end{itemize}

1 The final -g of adjectives ending in -ig or -lig is nearly always omitted in the spoken language:

färdig, rolig \quad [fɛːdɪː], [roːli]

färdigt, roligt \quad [fɛːdɪt], [roːliːt]

färdiga, roliga \quad [fɛːdiːa], [roːlia]
2 In many commonly used words a final -d, -g or -t is often dropped in pronunciation. The final -d, -g or -t of many common monosyllabic nouns is unpronounced even in the plural and definite forms of the noun.

- **god, goda**  \([g\ddot{a}:], [g\ddot{a}:a]\)
- **röd, röda**  \([r\ddot{a}:], [r\ddot{o}:a]\)
- **med**  \([me:]\)
- **ved**  \([ve]\)
- **vid**  \([vi]\)
- **vad**  \([va]\)
- **det**  \([de:]\)
- **mycket, litet**  \([myk\ddot{a}], [li:t\ddot{a}]\)
- **alltid, aldrig**  \([alti], [aldri]\)
- **något, inget**  \([n\ddot{a}:], [i\ddot{a}:]\)
- **måndag, tisdag . . .**  \([m\ddot{a}nda], [tista] \text{(NB short unstressed a)}\)
- **bröd, brödet, bröden**  \([br\ddot{o}:], [br\ddot{o}:t], [br\ddot{o}:n]\)
- **träd, trädet, träden**  \([tre:], [tre:t], [tre:n]\)
- **jag**  \([ja:]\)
- **dag, dagen, dagar**  \([da:], [da:n], [da:r] \text{(NB long a)}\)

**Notes:**

1. The -t ending in the supine form of some first conjugation verbs is frequently omitted in spoken Swedish.

2. For the pronunciation of pronominal forms **mig, dig, sig, det, de, dem**, see 1.2.10.

3. The spoken forms of **huvud**, ‘head’, an irregular 5th declension noun, are:

   - sg. \([huve]\) **huvud** pl. \([huven]\) **huvuden**
   - def.sg. \([huvet]\) **huvudet** def.pl. \([huvena]\) **huvudena**

4. The final -t is omitted in some French loanwords in spoken Swedish:
   - **konsert**, ‘concert’ is pronounced \([konser]\); **kuvert**, ‘envelope’ is pronounced \([kuver]\)

5. In some instances the -d, -g omitted is not at the end of the word. Some omissions are so common that the spoken form has become frequent even in the written language (see (b) below).
(a) Omitted in pronunciation but not in spelling:

bredvid [breːvɪd] or [breːvi] or [breːwe]
morgon [mɔrɔn]
midsommar [misɔmar]
förkläde, förklädet [fɔrkleːd], [fɔrkleːt]
trädgård, trädgården [treːɡɔːd], [treːɡoːn]

Notes:

1 Sometimes a truncated form of a noun ending in -ad, -ag may be used, but only in the definite singular form:

stad, staden [stʊd], [stʊn]
månad, månaden [moːnad], [moːnan]
skillnad, skillnaden [filnad], [filnan]
da(g), dagen [duː], [duːn] NB. Indefinite singular form

2 Note the change of vowel length in expressions ending in -s such as:

i måndags [i mɔndas] (short final vowel)
i tisdags [i tiːstas] (short final vowel)

3 -d- between r and s is often not pronounced in spoken Swedish:

vårdslös [voːʃløs]

(b) Omitted in pronunciation and sometimes in spelling:

In many instances where -d + vowel or -g + vowel is omitted in spoken Swedish such omissions have become frequent in casual written Swedish.

Some common examples of this phenomenon follow. Note how the preceding vowel is shortened.

någon, något (nån, nåt) [nɔn], [nɔt] (short vowel)

(But: några) [nɔːra] (long vowel!!)

sådan sådant sådana [sɔn], [sɔnt], [sɔna] (short vowel)
(sån, sånt, såna)

sedan (sen) [sɛn]

någonsin, någonstans [nɔnsin], [nɔnstans] (short vowel)
(nånsin, nånstans)
The omission of -d + vowel has been accepted in the singular indefinite form of three very common nouns and a number of less common ones:

- **fader** pronounced and often written *far* [fɑːr]
  (But: definite form *fadern* in written and spoken Swedish!)

- **moder** pronounced and often written *mor* [mɔːr]
  (But: definite form *modern* in written and spoken Swedish!)

- **broder** pronounced and often written *bror* [brɔːr]
  (But: definite form *brodern* in written and spoken Swedish!)

**Note:** *farbrorn, farmorn* are sometimes encountered in written Swedish.

Cf. also **ladugård** pronounced [luːɡɔːd].

Third conjugation verbs with stems in long *e* or long *ä* sounds followed by -d frequently omit the -d in the present tense (see 7.2.5):

- *(kläda) – kläder* pronounced and written *klär* [klɛːr]
- *(breda) – breder* pronounced and written *brer* [brɛːr]

(c) Omitted in pronunciation and usually omitted in spelling:

Several words with original forms containing -d, -g have now dropped these unpronounced letters even in written Swedish:

- **aderton** is now pronounced and spelt *arton* [ɑːtɔn]
- **badstuga** is now pronounced and spelt *bastu*
- **förstuga** is now pronounced and spelt *farstu* [faːrtu]
- **Södermanland** is now pronounced and spelt *Sörmland*

The longer forms of these words are seen only rarely or in formal written Swedish.

4 The final syllable -de in the past tense of first conjugation verbs is usually dropped in spoken Swedish, such verbs thus ending in a short -a vowel sound.

- **han kallade** is pronounced [han kala]
- **vi ropade** is pronounced [viː rɔːpa]

**Note:** The final -de ending in the past tense of the verbs *lägga* and *säga* is usually omitted in spoken Swedish. The shorter forms thus created are *la* and *sa* (both with long vowel sounds). *Sa* is now the normal written form. (See 7.2.4.)
5. The final -t is often omitted in the spoken form of the first conjugation supine:

\[ \text{Vi har jobbat.} \] is pronounced \([\text{vi: ha: jœba}]\)

6. The -k of adjectives whose basic form ends in -k is not usually pronounced when followed by -t:

\[ \text{hemskt, kritiskt} \] [hœmst], [kritist]

7. In a few well-defined words -l or -ll in spoken Swedish is generally omitted:

\[ \text{värd (and compounds)} \] [vœ:d]
\[ \text{karl, karln, karlar, chap} \] [kœ:ᵣ], [kœːn], [kœːːᵣ]
(BUT: \text{Karl as a boy’s name} [kœːː])
\[ \text{till} \] [ti]
\[ \text{skall in older written Swedish} \] [ska] now usually written ska

### 1.2.8 Omitting -e

The -e of the non-neuter definite (end) article -en is often omitted in spoken Swedish after -r or -l:

\[ \text{konduktören} \] [kœnduktœːn]
\[ \text{salen} \] [sœːln]
\[ \text{dörren} \] [dœːrn]
\[ \text{kvällen} \] [kvœːln]

The final unstressed -e of many non-neuter nouns ending in -are, which signify a trade or profession, is dropped in spoken Swedish before the definite singular (end) article -n:

\[ \text{bagaren, läraren, verkmästaren}, \text{become: bagarn, [bœːgan]} \]
\[ \text{lärarn} \] [leːran], \text{verkmästarn} [vœrkmeːstœːn], etc.

Note: The final -e in such words is usually dropped in both written and spoken Swedish when the words are used as a title before a name: bagar Olsson, verkmästar Törnquist, etc.
Voiced consonants pronounced unvoiced before -s, -t

The final voiced consonants -d, -g, -v of some common monosyllabic words are retained in written Swedish but become unvoiced -t, -k, -f in spoken Swedish when suffixed with -s. Note also that the preceding vowel is shortened before the suffixed -s.

- hur dags, what time? [hudaks]
- i Guds namn, in Heaven’s name [i Guts namn]
- till havs, at sea [ti hafs]
- högst, at most [hokst]

Note: For i måndags, i tisdags etc., see 1.2.7 3(a) Note 2.

A voiced -g (or -gg) is pronounced unvoiced as -k before a suffixed -t:

- styggt, wicked [stykt]
- sagt, said [sakt]
- lagt, laid [lakt]
- högt, high [høkt] NB short vowel

A voiced -b (or -bb) is pronounced unvoiced as -p before a suffixed -s or -t:

- Obs!, Note [ɔps]
- snabbt, quickly [snapt]

A similar phenomenon occurs in compound words when an element of the compound ending in -d, -g, -v is followed by -s. The voiced consonant becomes unvoiced and the preceding vowel is frequently shortened:

- dödstrött, dog tired [døtstrøt]
- stadsbo, town-dweller [statsbo]
- dagstidning, daily newspaper [daksti:dniŋ]
- skogsbryn, edge of the forest [skɔksbryn]
- havsbad, beach [hafsbɔ:d]

Notes:

1 The addition of a genitive -s does not normally affect vowel length. Compare:

- en dags vandring [duːgs] and en dagstur [dakstur].
2 In the following cases complete assimilation of t to s has taken place:

- matsäck [mascrk]
- statsråd [stasr:d]
- skjuts [Jus]

1.2.10 Written and spoken forms of some common words

1 Many of the Swedish personal pronouns are pronounced in a way that is not in accord with the standard written form.

- jag pronounced [jɑ]  
- mig pronounced [mɛj]
- du (cf. note 1)  
- dig pronounced [dej]
- honom (cf. note 2)  
- henne (cf. note 2)  
- sig pronounced [sɛj]

2 Mej, dej, sej are now accepted in some informal writing as alternatives to mig, dig, sig (see 5.1).

Notes:

1 In very colloquial Swedish the d- of du, dig is frequently omitted following a verbal -r ending:

   Ser 'u nåt? (Ser du något?)  
   Can you see anything?

2 In the past honom and henne had spoken forms, but except in certain dialects, these are no longer common:

   honom was pronounced 'en or 'n after a vowel  
   Jag har aldrig sett 'en.  
   Jag har aldrig sett 'en.
   henne was pronounced 'na  
   Jag gav 'na pengarna.
   Jag gav 'na pengarna.

3 Dom for both subject (de) and object (dem) form is accepted in some informal writing. Dom is sometimes also seen in expressions like dom här and as the front article in, for example dom nya bilarna, in written Swedish, though this is regarded as slovenly.

4 Det is pronounced [de] (short vowel) when used as a pronoun and in expressions such as [de he: husat] (written det här huset) and [de ny:a hu:sat] (written det nya huset). In the past den, det used as object had the spoken forms 'en ('n after a vowel) and 'et ('t after vowel) but, except in certain dialects, these are no longer common.

   Här har du geväret. Ta 't.  
   Here's your rifle. Take it!
5 In spoken Swedish the possessive pronouns for 1st and 2nd persons plural vår, 
er have colloquial forms which exist alongside the standard written forms:

<table>
<thead>
<tr>
<th>Written Swedish</th>
<th>Spoken Swedish</th>
</tr>
</thead>
<tbody>
<tr>
<td>vår skola</td>
<td>våran skola</td>
</tr>
<tr>
<td>är eran skola?</td>
<td>är eran skola?</td>
</tr>
<tr>
<td>vårat hus</td>
<td>vårat hus</td>
</tr>
<tr>
<td>är erat hus?</td>
<td>är erat hus?</td>
</tr>
</tbody>
</table>

6 In addition to the examples in 1.2.7 ff there are other cases in which common 
written Swedish words are pronounced in a way that might not be expected:

<table>
<thead>
<tr>
<th>Written Swedish</th>
<th>Spoken Swedish</th>
</tr>
</thead>
<tbody>
<tr>
<td>förstås</td>
<td>[føʃtɔs]</td>
</tr>
<tr>
<td>och (unstressed position)</td>
<td>[ɔ]</td>
</tr>
<tr>
<td>och (stressed position)</td>
<td>[ɔk]</td>
</tr>
<tr>
<td>att, to (before infinitive)</td>
<td>[ɔ]</td>
</tr>
<tr>
<td>säga, säger, sa(de), sagt</td>
<td>[seːja] [seːjær] [suː] [sakt]</td>
</tr>
<tr>
<td>lade, lagt</td>
<td>[luː] [lakt]</td>
</tr>
<tr>
<td>stod</td>
<td>[stɔːɡ]</td>
</tr>
<tr>
<td>förstod</td>
<td>[føʃtɔːɡ]</td>
</tr>
<tr>
<td>vara, är, var, varit</td>
<td>[vaː] (long vowel) [ɛː] [vaː] [va]</td>
</tr>
<tr>
<td>ett ögonblick</td>
<td>[et øːɡɔmblik]</td>
</tr>
</tbody>
</table>

### Assimilation

Where the final sound of one word and the initial sound of the next are 
difficult to pronounce together, some form of assimilation usually takes 
place in Swedish.

In fluent spoken Swedish -r as the last sound in a word before a word 
beginning with s- is assimilated with the s- to an sj- sound (see 1.2.6 above):

- **Hur sa?** is pronounced [hʊʃa]
- **Tack för senast** is pronounced [takfɔːʃeːnast]
- **förr stor** is pronounced [føʃtɔːʃ]

*Note:* This kind of assimilation is less common in southern Sweden than in the 
rest of the country.

In fluent spoken Swedish, assimilation of r occurs with a following d, t, 
n, l (see 1.2.10(2), Note 1 above):

- **Kommer du?** is pronounced [kɔmɛɾu]

In fluent spoken Swedish, a final -n after a short vowel in a word which 
is not heavily stressed is pronounced -m before a following b-:

- **min bror, en boll** become [mimbrɔːr], [ɛmboll]
The music of Swedish (prosody) is produced by three features:

Sentence stress  Which words in the sentence receive stress?
Word stress     Which parts of the word are stressed?
Accent         Which tone, single peak (Accent 1) or double peak (Accent 2), does the word possess?

### 2.1 Sentence stress

In principle all the semantically significant words in the sentence are stressed. In practice this may vary somewhat. In this paragraph different sentence elements (see 12.1 ff) are listed and the stress shown for different circumstances.

**KEY:**  
\( \varepsilon \) = long stressed vowel, \( \varepsilon \) = short stressed vowel  
\( \varepsilon \) = unstressed vowel

<table>
<thead>
<tr>
<th>Rules</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Subject</strong></td>
<td></td>
</tr>
</tbody>
</table>
| Nouns are stressed   | **Anna har köpt ett hus.**  
Anna has bought a house.  
**Huset ligger vackert.**  
The house is beautifully situated. |
| Pronouns are unstressed | **Det kostade mycket pengar.**  
It cost a lot of money  
**Hön hade inte råd.**  
She could not afford it. |
<table>

<td></td>
<td>There is a book lying on the table.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td>Hon ska dricka.</td>
</tr>
<tr>
<td>Complement, then verb unstressed</td>
<td>Hon bleibt polis.</td>
<td></td>
<td></td>
<td></td>
<td>She is going to drink.</td>
</tr>
<tr>
<td></td>
<td>She became a police officer.</td>
<td></td>
<td></td>
<td></td>
<td>Jag måste gå nu.</td>
</tr>
<tr>
<td>Complement, then verb unstressed</td>
<td>Han är sjuk.</td>
<td></td>
<td></td>
<td></td>
<td>I must go now.</td>
</tr>
<tr>
<td>Formal subject, then verb unstressed</td>
<td>Det ligger en bok på bordet.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>There is a book lying on the table.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Auxiliary verbs are unstressed</td>
<td>Hon ska dricka.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>She is going to drink.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Notice also:</td>
<td>Jag måste gå nu.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>For contrast, verbs are stressed</td>
<td>Han målar inte väggarna</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>utan tapetserar dem.</td>
<td></td>
<td></td>
<td></td>
<td>He does not paint the walls but wallpapers them.</td>
</tr>
</tbody>
</table>
Particle verbs: the particles are stressed, the verbs unstressed

- Han satte på sig hatten.
  He put on his hat.
- Föraren kördde om bilen.
  The driver overtook the car.

Adverbial

- Inte is unstressed

  - Hon vill inte. De är inte hemma.
    She does not want to. They are not at home.

Other adverbials are usually stressed whether first or last in the sentence

  - Här är han nu. Därför vill vi inte vänta länge.
    Here he is now. That is why we do not want to wait any longer.
  - Stänger den inte tidigt idag?
    Doesn’t it close early today?

2.2 Word stress

Word stress is found only in words that have sentence stress.

1 Non-compounds:

Of these words, some 35 per cent are monosyllables, 40 per cent have initial stress on the first syllable and 25 per cent non-initial stress on a different syllable:

**Words with initial stress:**

<table>
<thead>
<tr>
<th>nyckel</th>
<th>varn</th>
<th>köper</th>
</tr>
</thead>
<tbody>
<tr>
<td>key</td>
<td>winter</td>
<td>buys</td>
</tr>
<tr>
<td>hallon</td>
<td>gata</td>
<td></td>
</tr>
<tr>
<td>raspberry</td>
<td>street</td>
<td></td>
</tr>
</tbody>
</table>

**Words with non-initial stress:**

words with the prefixes be-, för-:

<table>
<thead>
<tr>
<th>strida</th>
<th>tala</th>
<th>sök</th>
</tr>
</thead>
<tbody>
<tr>
<td>contest</td>
<td>pay</td>
<td>attempt</td>
</tr>
</tbody>
</table>
words with the suffix -era:

<table>
<thead>
<tr>
<th>park</th>
<th>serve</th>
</tr>
</thead>
<tbody>
<tr>
<td>par'kera</td>
<td>ser'vera</td>
</tr>
</tbody>
</table>

many foreign loans:

<table>
<thead>
<tr>
<th>restaurant</th>
<th>review</th>
<th>incapable</th>
</tr>
</thead>
<tbody>
<tr>
<td>restau'rang</td>
<td>re'vy</td>
<td>inka'pabel</td>
</tr>
</tbody>
</table>

etymologist

<table>
<thead>
<tr>
<th>director</th>
<th>register</th>
</tr>
</thead>
<tbody>
<tr>
<td>etymo'log</td>
<td>re'gister</td>
</tr>
</tbody>
</table>

words with foreign suffixes:

<table>
<thead>
<tr>
<th>director</th>
<th>gymnast</th>
<th>musician</th>
</tr>
</thead>
<tbody>
<tr>
<td>regi'ssör</td>
<td>gym'na</td>
<td>musi'kant</td>
</tr>
</tbody>
</table>

2 Compounds:

Compound words have a stress on each of the parts of the compound, but the melody of each part is different. This also varies from region to region.

In central Swedish:

<table>
<thead>
<tr>
<th>house key</th>
<th>central hospital</th>
</tr>
</thead>
<tbody>
<tr>
<td>husnyckel</td>
<td>centrallasarett</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>railway track</th>
<th>truck driver</th>
</tr>
</thead>
<tbody>
<tr>
<td>järvvägsräls</td>
<td>lastypeförare</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>State Railways</th>
<th>Swedish Ball Bearing Company</th>
</tr>
</thead>
<tbody>
<tr>
<td>S J (Statens järnvägar)</td>
<td>SKF (Svenska kullagerfabriken)</td>
</tr>
</tbody>
</table>

2.3 Accent

There are two distinct accents (tones) for Swedish words of two or more syllables with sentence stress (and therefore also word stress). Compare the words skriver and gammal:

<table>
<thead>
<tr>
<th>writes</th>
<th>old</th>
</tr>
</thead>
<tbody>
<tr>
<td>skri-ver</td>
<td>gam-mal</td>
</tr>
</tbody>
</table>

Both have stress on the first syllable, but the balance of the stress differs:
They also have different tone patterns or melodies.

Gammal has accent 2 (tonal accent) with two tone peaks, falling-rising in central Swedish. (Notice that the second peak in accent 2 is identical with accent 1.)

Skriver has accent 1 with one tone peak (rising), the same as in stressed monosyllabic words:

\[
\begin{align*}
\text{en bil} & \quad \text{en buss} & \quad \text{en man} \\
\text{a car} & \quad \text{a bus} & \quad \text{a man}
\end{align*}
\]

### Functions of accent 1/accent 2

Accent 2 is only found in polysyllabic words. The main function of accent 2 is to show that two syllables belong together – it has a ‘connective function’:

<table>
<thead>
<tr>
<th>Accent 1</th>
<th>Accent 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>![fem ton](fem ton)</td>
<td><img src="femton" alt="femton" /></td>
</tr>
<tr>
<td>five tons</td>
<td>fifteen</td>
</tr>
<tr>
<td>![Vi äter inte rått kött.](Vi äter inte rått kött.)</td>
<td>![Vi äter inte råttkött.](Vi äter inte råttkött.)</td>
</tr>
<tr>
<td>We don’t eat raw meat.</td>
<td>We don’t eat rat meat.</td>
</tr>
<tr>
<td>![Det var en vits i predikan.](Det var en vits i predikan.)</td>
<td>![Det var en vitsig predikan.](Det var en vitsig predikan.)</td>
</tr>
<tr>
<td>There was a joke in the sermon.</td>
<td>It was a witty sermon.</td>
</tr>
</tbody>
</table>

Accent 2 can also have a ‘distinctive function’: there are about 350 homophones which are distinguished only by their accents. Many of these minimal pairs are inflected forms of originally monosyllabic (accent 1) and originally bisyllabic (accent 2) words:
## Rules for accent 2

<table>
<thead>
<tr>
<th>Accent 1 is found</th>
<th>Accent 2 is found</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 In all <strong>monosyllabic</strong> words:</td>
<td>1 In most <strong>compounds</strong>:</td>
</tr>
<tr>
<td>➟ ➚ ➘ ➚ ➘ ➚ ➘</td>
<td>➟ ➚ ➘ ➚ ➘ ➚ ➘</td>
</tr>
<tr>
<td>bo<strong>k</strong> b<strong>i</strong>l k<strong>a</strong>llt <strong>f</strong>örst</td>
<td>järnväg lastbil bokhylla</td>
</tr>
<tr>
<td>book car cold first</td>
<td>railway truck bookshelf</td>
</tr>
<tr>
<td></td>
<td>sjukhus</td>
</tr>
<tr>
<td></td>
<td>hospital</td>
</tr>
<tr>
<td>2 In some <strong>bisyllabic</strong> words detailed below</td>
<td>2 In most other <strong>polysyllabic words</strong> with stress on the first syllable:</td>
</tr>
<tr>
<td>➟ ➚ ➘ ➚ ➘ ➚ ➘ ➚ ➘</td>
<td>➟ ➚ ➘ ➚ ➘ ➚ ➘ ➚ ➘</td>
</tr>
<tr>
<td><strong>flicka</strong> po<strong>jke</strong> sexton börjar</td>
<td>cars the cats spoken written easiest</td>
</tr>
<tr>
<td>girl boy sixteen begins</td>
<td></td>
</tr>
</tbody>
</table>
A The following features ‘block’ Exceptions to this blocking
accent 2 (i.e. with accent 1) (i.e. with accent 2)

(i) Endings in a vowel + \( l \): 
* Nouns: 
  
  cykel  segel  fågel  medel  nyckel  
  cycle  sail  bird  means  key  

  * Adjectives: 
  
  enkel  simpel  
  easy  simple  

(ii) Endings in a vowel + \( n \): 
* Nouns: 
  
  öken  socken  tecken  vatten  fruktan  tävlan  
  desert  parish  sign  water  fear  competition  

  * Adjectives: 
  
  egen  ledsn  öppen  skriven  
  own  sad  open  written  
  (and other Conjugation 4 participles)  

(iii) Endings in a vowel + \( r \): 
* Nouns: 
  
  vinter  teater  nummer  fönster  moder  syster  sommar  
  winter  theatre  number  window  mother  sister  summer  

  Plurals with *mutation* + *er*: 
  
  böcker  fötter  händer  
  books  feet  hands  

  (cf. flickor  stolar  katter) 
  girls  chairs  cats  

  Plurals without *mutation*: 
  
  nätter  städer  
  nights  cities  

Rules for accent 2
Adjectives:

vacker mager läcker – pretty thin delicious

Verbs in -er (present tense): Verbs in -ar (present tense)

ringer läser skriver äter tittar målar badar lagar
rings reads writes eats looks paints bathes mends

(iv) Adjective comparative endings in -re, superlative endings in -erst:

längre yngre lägre större (cf. lättare lättast)
longer younger lower bigger easier easiest

överst ytterst
uppermost outermost

(v) Adjective endings in -isk, -sk:

typisk komisk engelsk
typical comical English

(vi) Nouns ending in -is, -iker:

dagis kompis godis lekis
nursery friend sweets nursery school

musiker tekniker
musician technician

(vii) Verbs with unstressed initial syllables:

betalar förstår
pays understands

(vii) Verbs ending in -era:

fotograferar studerar socialiserar
takes photographs studies socialises
B All nouns with end articles have the same accent as in the form without end article

<table>
<thead>
<tr>
<th>en bil</th>
<th>bilen</th>
<th>en klocka</th>
<th>klockan</th>
</tr>
</thead>
<tbody>
<tr>
<td>a car</td>
<td>the car</td>
<td>a clock</td>
<td>the clock</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>en kompis</th>
<th>kompisen</th>
<th>en invandrare</th>
<th>invandraren</th>
</tr>
</thead>
<tbody>
<tr>
<td>a friend</td>
<td>the friend</td>
<td>an immigrant</td>
<td>the immigrant</td>
</tr>
</tbody>
</table>

C Notice however that the verb accents often change through the paradigm

<table>
<thead>
<tr>
<th>läsa</th>
<th>läs!</th>
<th>läser</th>
<th>läste</th>
<th>läst</th>
</tr>
</thead>
<tbody>
<tr>
<td>read</td>
<td>read</td>
<td>reads</td>
<td>read</td>
<td>read</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>dricka</th>
<th>drick!</th>
<th>dricker</th>
<th>drack</th>
<th>druckit</th>
</tr>
</thead>
<tbody>
<tr>
<td>drink</td>
<td>drink</td>
<td>drinks</td>
<td>drank</td>
<td>drunk</td>
</tr>
</tbody>
</table>
3.1 Gender and noun type

3.1.1 Gender

Swedish nouns are divided into non-neuter gender (sometimes called *en*-words or N-words or common gender) and neuter gender (sometimes called *ett*-words or T-words). This division is expressed in the choice of the indefinite article (see 3.2.1):

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>en bil</em></td>
<td><em>ett hus</em></td>
</tr>
<tr>
<td>a car</td>
<td>a house</td>
</tr>
<tr>
<td><em>en flicka</em></td>
<td><em>ett äpple</em></td>
</tr>
<tr>
<td>a girl</td>
<td>an apple</td>
</tr>
</tbody>
</table>

Gender determines the end (definite) article singular and plural (see also 3.5.1 f):

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Singular</strong></td>
<td><strong>Plural</strong></td>
</tr>
<tr>
<td><em>bilen</em></td>
<td><em>bilarna</em></td>
</tr>
<tr>
<td>the car</td>
<td>the cars</td>
</tr>
<tr>
<td><em>flickan</em></td>
<td><em>flickorna</em></td>
</tr>
<tr>
<td>the girl</td>
<td>the girls</td>
</tr>
<tr>
<td><em>huset</em></td>
<td><em>husen</em></td>
</tr>
<tr>
<td>the house</td>
<td>the houses</td>
</tr>
<tr>
<td><em>äpplet</em></td>
<td><em>äpplena</em></td>
</tr>
<tr>
<td>the apple</td>
<td>the apples</td>
</tr>
</tbody>
</table>

Gender is also important for the selection of a plural ending (see 3.2.2 ff) and for the agreement of pronouns, adjectives and past participles (see 4.1, 4.2.4, 7.3.2):

*Huset är stort*  
the house is big

*flickan är stor*  
the girl is big
Gender and noun type

3.1.2 Gender rules

Gender is only partly predictable for Swedish: the meaning or form (often suffixes) of some nouns may tell us whether we are dealing with a non-neuter or neuter noun, but in many cases we cannot predict gender accurately by either form or meaning. What follows is a guide to those clues available to us for predicting gender by the meaning or form of a word:

1 Non-neuter by meaning:

(a) Most human beings: **en far, en lärare**
   *Exceptions: ett barn, ett biträde, ett geni*

(b) Most animals: **en fisk, en höna**
   *Exceptions: ett djur, ett får, ett bi, ett lejon*

(c) Days, parts of the day: **en fredag, en timme**
   *Exception: ett dygn*

(e) Months, seasons: **januari var kall; hösten, våren**

(f) Trees, flowers, shrubs: **granen, apeln, rosen**
   *Exceptions: ett träd or compounds in -träd*

2 Non-neuter by form are nouns ending in:

- **-a**
  **en gata, en krona, en människa**
  *Exceptions: ett drama, ett öga*

- **-are**
  **en lärare, en stockholmare**
  *Exception: ett altare*

- **-dom**
  **en sjukdom, kristendomen**

- **-else**
  **en rörelse, en styrelse**
  *Exception: ett fångelse*

- **-het**
  **en svaghet, en personlighet**

- **-ing/-ning**
  **en parkering, en höjning**

- **-ion**
  **en station, en religion**

- **-ism**
  **realismen, socialismen**

- **-nad**
  **en byggnad, tystnaden**

- **-or**
  **en dator, en agitator**
3 Neuter by meaning:
(a) Continents: Asien är överbefolkat. Asia is overpopulated.
(b) Countries: Sverige är glesbefolkat. Sweden is sparsely populated.
(c) Provinces: Norrland är kallt. Norrland is cold.
(d) Towns: Stockholm är stort. Stockholm is big.
Notice the ‘hidden agreement’ in these four cases where there is no article on the noun to indicate gender.
(e) Letters of the alphabet: ett a, ett b
(f) Nouns from other parts of speech: nuet, jaget, ett nej

4 Neuter by form are nouns ending in:
-ande ett antagande
   Exceptions: people – en sökande, en studerande
-ende ett leende, ett utseende
-um ett faktum, ett museum, ett gymnasium

### 3.1.3 Types of noun

The three main types of noun are:

1. Common nouns: katt (cat), stol (chair), pojke (boy)
2. Abstract nouns: glädje (joy), sjukdom (illness), mjukhet (softness)
3. Proper nouns: Gustav, Stockholm, Sverige (Sweden), Volvo

A further important distinction is made between count nouns and non-count nouns (see also 3.4.1, 4.5.7 (3)):

Count nouns are often concrete things and creatures:

   bulle (bun), träd (tree), student (student)

Some abstracts are count nouns: skratt (laugh), färg (colour)

Non-count nouns are often substances:

   vatten (water), bensin (petrol), luft (air)

Some abstracts are non-count nouns: vithet (whiteness), lycka (happiness)
3.2 Indefinite declension

3.2.1 Indefinite forms

Swedish has indefinite and definite forms of the noun. The indefinite singular form is often indicated by the use of the indefinite article – either en or ett – before the noun, depending on the gender of the noun:

Non-neuter  
en mor  a mother  For constructions with adjectives, see 4.1–4.3.6 ff.
en timme  an hour

Neuter  
e tt hus  a house
ett äpple  an apple

As in English a whole species or family may be denoted by either definite singular or indefinite plural:

Ekorrar/Ekorren finns överallt i Europa.
Squirrels are/The squirrel is found throughout Europe.

The indefinite article is the same as the numeral en, ett, ‘one’. The indefinite plural of Swedish nouns is formed by adding one of several different endings to the noun, see 3.2.2 ff.

3.2.2 Plurals

Regular plurals are expressed by the addition of one of the following endings:

-or -ar -er -r -n ⊗/zero (ie. no plural ending) -s

Nouns are often grouped by their plural ending in declensions which correspond to these endings:

Declension

1 en gata  a street  två gator  two streets
2 en sjö  a lake  två sjöar  two lakes
3 en park  a park  två parker  two parks
4 en sko  a shoe  två skor  two shoes
5 ett yrke  a profession  två yrken  two professions
6 ett barn  a child  två barn®  two children
7 en sprinkler  a sprinkler  två sprinklers  two sprinklers
Plurals of Swedish nouns are very largely predictable. The decisive factors in the choice of a plural ending are:

1. Gender – Whether it is a non-neuter or neuter noun:
   - **en arm** → **två armar**
   - **ett hus** → **två hus**
   - **en krona** → **två kronor**
   - **ett stycke** → **två stycken**

2. Whether the neuter noun ends in a vowel or a consonant:
   - **ett kvitto** → **två kvitton**
   - **ett parti** → **två partier**

3. Whether the neuter noun ending in a vowel has stress on the last syllable:
   - **ett 'ställe** → **två ställen**
   - **ett bageri** → **två bagerier**

4. Whether the non-neuter noun has stress on the last syllable:
   - **en station** → **två stationer**

5. Which of the following suffixes the non-neuter noun without stress on the last syllable possesses:
   - **-e en pojke** → **två pojkar**
   - **-a en krona** → **två kronor**
   - **-ande en studerande** → **två studerande**
   - **-are en läkare** → **två läkare**
   - **-er en indier** → **två indier**
   - **-(n)ing en tidning** → **två tidningar**
   - **-tion en lektion** → **två lektioner**
   - **-het en nyhet** → **två nyheter**
   - **-nad en byggnad** → **två byggnader**

3.2.3 below shows these factors both as rules and in diagrammatic form.
3.2.3 Plurals – predictability

There are six main rules for predicting the plural forms of nouns:

1. Non-neuter nouns ending in unstressed -a have a plural in -or (and drop -a).
   
en flicka  två flickor

2. Non-neuter nouns ending in unstressed -e have a plural in -ar (and drop -e).
   
en pojke  två pojkar

3. Non-neuter nouns with stress on the last syllable have a plural in -er.
   
en armé  två arméer

4. Neuter nouns ending in a stressed vowel have a plural in -er.
   
ett geni  två genier

5. Neuter nouns ending in an unstressed vowel have a plural in -n.
   
ett yrke  två yrken

6. Neuter nouns ending in a consonant have a plural in -zero (ie. no plural ending, shown below as ⊗).
   
ett barn  två barn⊗

It is possible to formulate a number of additional rules for prediction:

7. Non-neuter nouns ending in suffix -are, -ande have a plural in -zero.
   
en lärare  två lärare⊗
en sökande  två sökande⊗

8. Non-neuter nouns ending in suffix -er have a plural in -zero.
   
en tekniker  två tekniker⊗

9. Nouns (always non-neuter) ending in suffix -(n)ing have a plural in -ar.
   
en tidning  två tidningar
10 Nouns (always non-neuter) ending in the stressed suffixes -het, -nad, -ion have a plural in -er.

- en nyhet  två nyheter
- en byggnad  två byggnader
- en station  två stationer

Notes:
1 It is often difficult to predict the plurals of monosyllabic non-neuter nouns ending in a consonant. Such nouns add either -ar or -er:
- en bil  två bilar
- en färg  två färger
- en hund  två hundar
- en park  två parker

2 Nouns ending in -el, -en, -er tend to add -ar after dropping the -e of the final syllable:
- en fågel  två fåglar
- en vinter  två vintrar
- en fröken  två fröknar

Notice, however, that some loanwords take -er:
- en muskel  två muskler
- en fiber  två fiber

<table>
<thead>
<tr>

<td>Neuter – ends in vowel/consonant?</td>
</tr>
<tr>
<td>Consonant +0</td>
</tr>
</tbody>
</table>
Plural forms

Whilst plurals in the majority of cases are predictable from the form or pronunciation of the noun (see 3.2.2 ff), it is also useful to gather nouns into groups (often called ‘declensions’) according to their plural ending:

### 3.3.1 Plurals in -or (first declension)

These comprise only non-neuter nouns, which include:

1. Virtually all nouns of two or more syllables ending in -a. These drop the -a before adding the plural ending:
   
<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>en blomma</td>
<td>två blommor</td>
<td>flower(s)</td>
</tr>
<tr>
<td>en människa</td>
<td>två människor</td>
<td>person(s)</td>
</tr>
</tbody>
</table>

2. Very few others:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>en toffel</td>
<td>två tofflor</td>
<td>slipper(s)</td>
</tr>
<tr>
<td>en ros</td>
<td>två rosor</td>
<td>rose(s)</td>
</tr>
</tbody>
</table>

### 3.3.2 Plurals in -ar (second declension)

These comprise only non-neuter nouns, which include:

1. Most monosyllabic nouns ending in a consonant:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>en hund</td>
<td>två hundar</td>
<td>dog(s)</td>
</tr>
<tr>
<td>en arm</td>
<td>två armar</td>
<td>arm(s)</td>
</tr>
</tbody>
</table>

2. Some monosyllabic nouns ending in a vowel:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>en sjö</td>
<td>två sjöar</td>
<td>lake(s)</td>
</tr>
<tr>
<td>en å</td>
<td>två åar</td>
<td>river(s)</td>
</tr>
</tbody>
</table>

3. Nouns ending in unstressed -e. These drop the -e before adding the plural ending:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>en pojke</td>
<td>två pojkar</td>
<td>boy(s)</td>
</tr>
</tbody>
</table>
4 Many nouns ending in unstressed -en, -el, -er. These drop the -e of the last syllable before adding the plural ending:

- **en fågel** $+ar \rightarrow två fåglar$ bird(s)
- **en vinter** $+ar \rightarrow två vintrar$ winter(s)

5 Many nouns ending in -(n)ing:

- **en övning** $+ar \rightarrow två övningar$ exercise(s)
- **en tävling** $+ar \rightarrow två tävlingar$ competition(s)

6 Notice the following irregular nouns:

- **en dotter** $+ar \rightarrow två döttrar$ daughter(s)
- **en mo(de)r** $+ar \rightarrow två mödrar$ mother(s)
- **en mun** $+ar \rightarrow två munnar$ mouth(s)
- **en morgon** $+ar \rightarrow två morgnar$ morning(s)
- **en sommar** $+ar \rightarrow två somrar$ summer(s)

7 Notice there is one neuter noun:

- **ett finger** $+ar \rightarrow två fingrar$ finger(s)

### 3.3.3 Plurals in -er (third declension)

These comprise both non-neuter and neuter nouns, which include:

1 Some monosyllabic non-neuter nouns ending in a consonant:

- **en park** $+er \rightarrow två parker$ park(s)
- **en färg** $+er \rightarrow två färger$ colour(s)

2 Many nouns of both genders with stress on the final syllable (often loans):

- **en miljö** $+er \rightarrow två miljöer$ environment(s)
- **en restaurang** $+er \rightarrow två restauranger$ restaurant(s)
- **en student** $+er \rightarrow två studenter$ student(s)
- **ett myteri** $+er \rightarrow två myterier$ mutiny (mutinies)
3 Some nouns ending in unstressed -en, -el, -er. These drop the -e of the last syllable before adding the plural ending:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Translation</th>
</tr>
</thead>
<tbody>
<tr>
<td>en möbel</td>
<td>+er → två möbler</td>
<td>piece(s) of furniture</td>
</tr>
<tr>
<td>en fiber</td>
<td>+er → två fibrer</td>
<td>fibre(s)</td>
</tr>
</tbody>
</table>

4 A number of nouns which change their root vowel:

- **A → Ä**: en hand +er → två händer hand(s)
en tand +er → två tänder tooth (teeth)
en strand +er → två stränder beach(es)
ett land +er → två länder country (countries)
en stad +er → två städer town(s)

- **O → Ö**: en son +er → två söner son(s)
en ledamot +er → två ledamöter member(s)

- **O → Ö + vowel shortening:**
  en fot +er → två fötter foot (feet)
en bok +er → två böcker book(s)
en rot +er → två rötter root(s)

### 3.3.4 Plurals in -r (fourth declension)

These comprise mostly non-neuter nouns ending in a vowel, which include:

1 Nouns ending in -e, -ie, -je, -else, -arie:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Translation</th>
</tr>
</thead>
<tbody>
<tr>
<td>en linje</td>
<td>+r → två linjer</td>
<td>line(s)</td>
</tr>
<tr>
<td>en bakelse</td>
<td>+r → två bakelser</td>
<td>cream cake(s)</td>
</tr>
<tr>
<td>ett fängelse</td>
<td>+r → två fängelser</td>
<td>prison(s)</td>
</tr>
<tr>
<td>en bibliotekarie</td>
<td>+r → två bibliotekarier</td>
<td>librarian(s)</td>
</tr>
</tbody>
</table>

Notice: en bonde +r → två bönder farmer(s)
2 Some nouns ending in -o, -u, -å, -ö:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>en sko</td>
<td>+r</td>
<td>två skor</td>
</tr>
<tr>
<td>en tå</td>
<td>+r</td>
<td>två tår</td>
</tr>
</tbody>
</table>

### 3.3.5 Plurals in -n (fifth declension)

1 These comprise only neuter nouns ending in an unstressed vowel:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>ett hjärta</td>
<td>+n</td>
<td>två hjärtan</td>
</tr>
<tr>
<td>ett ansikte</td>
<td>+n</td>
<td>två ansikten</td>
</tr>
<tr>
<td>ett meddelande</td>
<td>+n</td>
<td>två meddelanden</td>
</tr>
<tr>
<td>ett leende</td>
<td>+n</td>
<td>två leenden</td>
</tr>
<tr>
<td>ett bi</td>
<td>+n</td>
<td>två bin</td>
</tr>
<tr>
<td>ett konto</td>
<td>+n</td>
<td>två konton</td>
</tr>
</tbody>
</table>

2 Notice the following irregular -n plurals:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>ett öga</td>
<td></td>
<td>två ögon</td>
</tr>
<tr>
<td>ett öra</td>
<td></td>
<td>två öron</td>
</tr>
<tr>
<td>ett huvud</td>
<td></td>
<td>två huvuden</td>
</tr>
</tbody>
</table>

### 3.3.6 Plurals in -zero (no plural ending, sixth declension)

These comprise both neuter and non-neuter nouns, which include:

1 Many neuter nouns ending in a consonant:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>ett hus</td>
<td>+zero</td>
<td>två hus</td>
</tr>
<tr>
<td>ett barn</td>
<td>+zero</td>
<td>två barn</td>
</tr>
<tr>
<td>ett fönster</td>
<td>+zero</td>
<td>två fönster</td>
</tr>
</tbody>
</table>

2 Most non-neuter nouns ending in -are, -er, -ande, -ende denoting people and professions:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>en läkare</td>
<td>+zero</td>
<td>två läkare</td>
</tr>
<tr>
<td>en studerande</td>
<td>+zero</td>
<td>två studerande</td>
</tr>
</tbody>
</table>
3 A few non-neuter nouns with vowel change in the plural:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Translation</th>
</tr>
</thead>
<tbody>
<tr>
<td>en musiker</td>
<td>två musiker</td>
<td>musician(s)</td>
</tr>
<tr>
<td>en gående</td>
<td>två gående</td>
<td>pedestrian(s)</td>
</tr>
<tr>
<td>en man</td>
<td>två män</td>
<td>man (men)</td>
</tr>
<tr>
<td>en bro(de)r</td>
<td>två bröder</td>
<td>brother(s)</td>
</tr>
<tr>
<td>en mus</td>
<td>två möss</td>
<td>mouse (mice)</td>
</tr>
<tr>
<td>en gás</td>
<td>två gäss</td>
<td>goose (geese)</td>
</tr>
</tbody>
</table>

4 Nouns of measurement of both genders:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Translation</th>
</tr>
</thead>
<tbody>
<tr>
<td>en kilometer</td>
<td>två kilometer</td>
<td>kilometre(s)</td>
</tr>
<tr>
<td>en mil</td>
<td>två mil</td>
<td>Swedish mile(s)</td>
</tr>
<tr>
<td>ett ton</td>
<td>två ton</td>
<td>tonne(s)</td>
</tr>
<tr>
<td>en liter</td>
<td>två liter</td>
<td>litre(s)</td>
</tr>
</tbody>
</table>

5 Some Latin and Greek loanwords of both genders possess alternative Swedish plurals in zero (marked ⊗):

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Translation</th>
</tr>
</thead>
<tbody>
<tr>
<td>ett centrum</td>
<td>två centrum</td>
<td>centre(s)</td>
</tr>
<tr>
<td>ett faktum</td>
<td>två faktum</td>
<td>fact(s)</td>
</tr>
<tr>
<td>ett lexikon</td>
<td>två lexikon</td>
<td>dictionary</td>
</tr>
<tr>
<td></td>
<td></td>
<td>(dictionaries)</td>
</tr>
</tbody>
</table>

3.3.7 Plurals in -s (seventh declension)

The plural in -s is used with many non-neuter loanwords that retain their foreign character but do not have stress on the final syllable:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Translation</th>
</tr>
</thead>
<tbody>
<tr>
<td>en happening</td>
<td>+s</td>
<td>två happenings</td>
</tr>
</tbody>
</table>

When the loan becomes familiar in Swedish a Swedish plural often replaces the -s:

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Translation</th>
</tr>
</thead>
<tbody>
<tr>
<td>en reporter</td>
<td></td>
<td>två reportrar</td>
</tr>
</tbody>
</table>

Many such nouns are rarely found in the singular:

pickels, cornflakes, shorts
When forming the definite plural, the -s ending is regarded as if it were part of the stem, and the noun treated as if it had a zero plural with -en being added:

jeansen  the jeans

### 3.3.8 Collective nouns

A few nouns have special collective non-count forms. These include

<table>
<thead>
<tr>
<th>Singular</th>
<th>Plural</th>
<th>Collective plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>ärta</td>
<td>ärtor</td>
<td>ärter</td>
</tr>
<tr>
<td>mygga</td>
<td>myggor</td>
<td>mygg</td>
</tr>
<tr>
<td>polis</td>
<td>poliser</td>
<td>polis</td>
</tr>
<tr>
<td>man</td>
<td>män</td>
<td>man/mannar</td>
</tr>
</tbody>
</table>

Examples:

- två ärtor på min tallrik  two peas on my plate
- ärter med fläsk           peas with pork
- tre myggor på handen      three mosquitoes on my hand
- mycket mygg i fjällen     a lot of mosquitoes in the mountains
- Poliserna/polisen kom i flera bilar. The police arrived in several cars.
- Det satt tre män utanför.  Three men sat outside.
- en officer och trettio man an officer and 30 men

### 3.3.9 Nouns with no plural form or no singular form

1. Nouns with no plural form comprise:

   (a) Nouns which, because of their meaning, possess no plural form:

       Abstract nouns: fattigdom, poverty; glädje, joy; köld, cold
Some names of substances: guld, gold; snö, snow; kol, coal; luft, air.

Some collective nouns: boskap, cattle; folk, people.

(b) Non-neuter nouns ending in unstressed -an which occasionally ‘borrow’ a plural from other synonymous words:

- en önskan två önskningar wish
- en början två inledningar introduction
- en tävlan två tävlingar competition
- en anmälan två anmälningar report

2 Nouns with no singular form include:

1 decl. sopor, rubbish; byxor, trousers
2 decl. pengar, money
3 decl. grönsaker, vegetables; kalsonger, underpants; kläder, clothes
5 decl. glasögon, spectacles; hängslen, braces
6 decl. livsmedel, groceries
7 decl. shorts, jeans

### 3.4 Differences in number between Swedish and English

#### 3.4.1 Differences in number

Swedish may have a plural where English has a singular and vice versa:

1. Non-count singular in English, count plural in Swedish:

   - advice råd
   - business affärer
   - income inkomst(er)
   - information upplysningar
   - knowledge kunskap(er)
   - money pengar
   - furniture möbler
   - news nyheter
   - applause applåder
   - homework läxor
   - cash kontanter

2. Count plural in English, often non-count singular in Swedish:

   - contents innehåll
   - drugs narkotika, knark
   - stairs trappa
   - spirits sprit

Note: en nyhet a piece of news, en möbel a piece of furniture
3 Count plural in English, count singular in Swedish:

- scissors (en) sax
- scales (en) våg
- tweezers (en) pincett
- pincers (en) tång

Note: These Swedish nouns also have plural forms (två saxar, pincetter, vågar, tänger) corresponding to, for example, two pairs of scissors.

### 3.5 Definite declension

#### 3.5.1 Forms with end article singular

The definite form of the noun is indicated by the use of the end (definite) article, -en for singular non-neuter nouns, -et for singular neuter nouns (cf. indefinite en, ett, 3.2.1). If a noun ends in a vowel the end article is -n or -t. The end article in Swedish is not a separate word but a suffix which is added to the end of the noun:

<table>
<thead>
<tr>
<th>Indefinite</th>
<th>Definite (Form with end article)</th>
</tr>
</thead>
<tbody>
<tr>
<td>a car</td>
<td>en bil</td>
</tr>
<tr>
<td>a house</td>
<td>ett hus</td>
</tr>
<tr>
<td></td>
<td>the car bilen</td>
</tr>
<tr>
<td></td>
<td>the house huset</td>
</tr>
</tbody>
</table>

The form of the noun with end article singular (ie, the singular definite) can be predicted from the gender and ending of the noun as shown in the following rules:

1. Non-neuter ending in a consonant: arm +en → armen
   (other than -l or -r)
2. Non-neuter ending in a vowel
   (stressed or unstressed):
   - ficka +n → flickan
   - industri +n → industrin
3. Non-neuter ending in an unstressed vowel +l/r:
   - fågel +n → fågeln
   - moder +n → modern
   - doktor +n → doktorn
4. Neuter ending in a consonant: hus +et → huset
5. Neuter ending in an unstressed vowel: yrke +t → yrket
6 Neuter ending in a stressed vowel: \[\text{geni} \quad +\text{et} \rightarrow \text{geniet}\]

Notice that the stem of the following nouns in -el, -en, -er drops an -e before adding the end article:

\[\begin{align*}
\text{öken} & \quad +\text{en} \rightarrow \text{öknen} \\
\text{tecken} & \quad +\text{en} \rightarrow \text{tecknen} \\
\text{exempl} & \quad +\text{et} \rightarrow \text{exemplet} \\
\text{finger} & \quad +\text{et} \rightarrow \text{fingret}
\end{align*}\]

Notice that neuters ending in -eum, -ium drop the letters -um before adding the end article:

\[\text{museum} +\text{et} \rightarrow \text{museet}\]

Notice also some short forms in spoken Swedish that are increasingly found in written Swedish:

\[\text{stan (from staden), dan (from dagen), sommarn (from sommare), knät (from knäet), idén (from idéen), direktörn (from direktören), lärarn (from läraren)}\]

### Nouns – forms with end article singular – predictability chart

<table>
<thead>
<tr>
<th>Rule</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Ends in a consonant +en armen</td>
</tr>
<tr>
<td>2</td>
<td>Non-neuter-ends in a vowel +n industrin</td>
</tr>
<tr>
<td>3</td>
<td>Ends in an unstressed vowel +l, r +n fågeln</td>
</tr>
<tr>
<td>4</td>
<td>Non-neuter/Neuter? Ends in a consonant +et huset</td>
</tr>
<tr>
<td>5</td>
<td>Neuter unstressed +t yrket</td>
</tr>
<tr>
<td>6</td>
<td>Neuter stressed +et geniet</td>
</tr>
</tbody>
</table>

### 3.5.2 Forms with end article plural

The end article plural is either -na, -a, or -en. The form of the noun with end article plural (ie. plural definite) can be predicted from the following rules (see also 3.2.3 for plural forms):

1 Plurals ending in a vowel + r (both genders):

\[\begin{align*}
\text{flickor} & \quad +\text{na} \rightarrow \text{flickorna} \\
\text{armar} & \quad +\text{na} \rightarrow \text{armarna}
\end{align*}\]
3 Nouns

Notice that plurals of nouns in -are drop the final -e:

- **arbetare** +na → **arbetarna**
- **läkare** +na → **läkarna**

2 Plurals ending in a consonant other than -r (both genders):

- **hus** +en → **husen**
- **män** +en → **männen**

Notice that stems of polysyllabic nouns in -el, -en, -er drop an -e:

- **exempel** +en → **exemplen**
- **tecken** +en → **tecknen**
- **fönster** +en → **fönstren**

3 Plurals of neuter nouns ending in a vowel which have added +n to form their plural:

- **yrken** +a → **yrkena**

<table>
<thead>
<tr>
<th>Nouns – forms with end article plural – predictability chart</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plural indefinite ending in:</td>
</tr>
<tr>
<td>vowel + r +na</td>
</tr>
<tr>
<td>vowel + n (neuter) +a</td>
</tr>
<tr>
<td>consonant (not r) +en</td>
</tr>
<tr>
<td>flickorna</td>
</tr>
<tr>
<td>armarna Rule 1</td>
</tr>
<tr>
<td>filmerna</td>
</tr>
<tr>
<td>yrkena Rule 3</td>
</tr>
<tr>
<td>barnen</td>
</tr>
<tr>
<td>borden</td>
</tr>
<tr>
<td>exemplen Rule 2</td>
</tr>
<tr>
<td>husen</td>
</tr>
</tbody>
</table>

48
3.6 Article use

In many cases usage is similar in the two languages, e.g. both use definite articles for familiar ideas and indefinite articles for new ideas. The paragraphs below outline major differences in usage.

3.6.1 End article in Swedish, no article in English

1 Abstract nouns and nouns in a general sense:

   Svenskarna älskar naturen.  Swedes love nature.
   Historien upprepar sig.     History repeats itself.
   Sådant är livet.            Such is life.
   Han fruktar döden.          He fears death.
   Priserna stiger jämt.       Prices are always rising.

2 Locations:

   Olle går i kyrkan/skolan.  Olle goes to church/school.
   Eva åker till staden.      Eva is going to town.
   Eva är i staden.           Eva is in town.
   Lars studerar vid universitetet. Lars is (studying) at university.

3 Days, seasons, festivals, mealtimes:

   På fredagarna åker vi bort. On Fridays we go away.
   På vintern spelar de ishockey. In winter they play ice hockey.
   Vi ses på nyårsdagen!     Be seeing you on New Year’s Day!
   Efter middagen läste jag en bok. After dinner I read a book.

See also 10.3.3.
3.6.2 End article in Swedish, indefinite article in English

1 Prices:

Osten kostar 130 kronor kilot.
The cheese costs 130 kronor a kilo.

2 Frequency of occurrence:

Jag tjänar 500 kronor i timmen, dvs 4000 kronor om dagen.
I earn 500 kronor an hour, i.e. 4,000 kronor a day.

3.6.3 No article in Swedish, definite article in English

1 Instruments, machines:

Han spelar piano. He is playing the piano.
De lyssnar på radio. They are listening to the radio.
Vi tittar på tv. We are watching (the) TV.

2 Proper names:

Vi är bjudna till Janssons ikväll.
We have been invited to the Janssons tonight.

3 Nouns after nästa, samma, fel, rätt, följande, föregående (cf. 4.3.3 (6)):

De bor i nästa hus. They live in the next house.
Samma dag kom vi hem. The same day we came home.
Det var rätt/fel hus. It was the right/wrong house.
Gör det på följande sätt! Do it in the following way.

3.6.4 No article in Swedish, indefinite article in English

1 Nationality, profession, religious and political belief:

Per är norrman. Per is a Norwegian.
Han är lärare. He is a teacher.
Moberg var socialist. Moberg was a socialist.
Hon är katolik. She is a Catholic.
Exceptions:

(a) When the noun is qualified by an adjective:
   Hon är en god katolik. She is a good Catholic.
(b) When the noun is preceded by a preposition:
   Hon är gift med en lärare. She is married to a teacher.
(c) When the noun is qualified by a relative clause:
   Hon är en lärare som kan sin sak. She is a teacher who knows her stuff.

2 In many idiomatic expressions with a singular count noun, when only one is obvious and inferred:

De väntar barn och söker bostad/lägenhet.
They are expecting a child and looking for somewhere to live/a flat.

Hon har inte körkort/bil.
She has not got a driving licence/a car.

Han var utan arbete.
He was without a job.

3 Nouns with the words vilken, hur . . . än:

Vilken skön dag!
What a beautiful day!

Hur fint hus de än har, är det inte lika bra som vårt.
However nice a house they may have, it is not as nice as ours.

3.6.5 End article in Swedish, possessive pronoun in English

Parts of the body, clothing:

Hon skall tvätta håret/händerna.
She is going to wash her hair/hands.

Hon tog av sig skorna/kappan.
She took off her shoes/coat.

Han har ont i ryggen/magen.
He has a pain in his back/stomach.
3.6.6 Article use with demonstrative pronouns

<table>
<thead>
<tr>
<th>Den här etc.</th>
<th>Den etc.</th>
<th>Denna etc.</th>
</tr>
</thead>
<tbody>
<tr>
<td>+ End article</td>
<td>+ End article</td>
<td>No end article</td>
</tr>
</tbody>
</table>

See also 5.8.

Non-neuter den här filmen den filmen denna film
den där filmen this/that film this/that film
Neuter det här kortet det kortet detta kort
det där kortet this/that card this/that card
Plural de här filmerna de filmerna dessa filmer
de där filmerna these/those films these/those films
de här korten de korten dessa kort
de där korten these/those cards these/those cards

*Exception*: where den/det/de are determinative pronouns, see 5.9.

3.6.7 No article after the possessive

As in English, nouns following a possessive *never* take a definite article (see also 5.5):

<table>
<thead>
<tr>
<th>Pennan</th>
<th>the pen</th>
<th>Min pennan</th>
<th>my pen</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bordet</td>
<td>the table</td>
<td>Mitt bord</td>
<td>my table</td>
</tr>
</tbody>
</table>

This also applies to constructions with noun + adjective (see also 4.3.3):

<table>
<thead>
<tr>
<th>Min röda pennan</th>
<th>my red pen</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mitt stora bord</td>
<td>my big table</td>
</tr>
</tbody>
</table>
3.7 Genitives

3.7.1 The genitive

See 10.3.5 for the translation of English expressions with ‘of’.

1 The Swedish genitive is formed by adding -s to the noun. Notice that there is no apostrophe:

<table>
<thead>
<tr>
<th>en flickas</th>
<th>flickans</th>
<th>flickors</th>
<th>flickornas</th>
</tr>
</thead>
<tbody>
<tr>
<td>a girl’s</td>
<td>the girl’s</td>
<td>girls’</td>
<td>the girls’</td>
</tr>
</tbody>
</table>

Exceptions

(a) No -s after a noun ending in -s, -x:

Marx skrifter Marx’s writings
en kaktus taggar a cactus’s spines

(b) No -s after place names ending in a vowel:

Uppsala slott Uppsala Castle
(cf. Gripsholms slott)

2 Latin genitive endings are found in some names:

Jesu liv (← Jesus) Jesus’s life
Kristi himmelsfärd (← Kristus) Christ’s ascension

3 The genitive -s is usually placed on the last word of the group:

mannen på gatans åsikter the views of the man in the street
Karl den tolftes död the death of Charles XII

4 The noun following a genitive never takes an end article:

gårdens ägare the owner of the farm
Sveriges huvudstad the capital of Sweden
årets sista dag the last day of the year
In addition to denoting possession or belonging in a wide sense, the genitive is also used in the following senses:

(a) In measurement:

- **ett par timmars sömn** a couple of hours’ sleep
- **ett fyrtifem minuters program** a 45-minute programme

(b) To express ‘a kind (sort) of’:

- **en sorts fisk** a kind of fish
- **alla sorters mat** all kinds of food
- **ett slags fisk** a kind of fish
- **alla slags mat** all kinds of food

(c) In names:

- **Jag handlar alltid hos Olssons.** I always shop at Olsson’s.
- **Vi bor mitt emot Perssons.** We live opposite Persson’s.

(d) In some old genitive case endings which remain in a few set phrases after till:

- **gå till fots/skogs/bords/sängs** go on foot/into the forest/to table/to bed
- **gå till väga** set about (something)
- **vara till salu/till låns** be for sale/on loan
Swedish adjectives inflect. In the indefinite declension they agree with the noun in gender (singular only) and in number both attributively and predicatively. They also add inflexional endings in the definite declension.

### Indefinite forms

<table>
<thead>
<tr>
<th></th>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Attributive</strong></td>
<td>en stor® bil</td>
<td>ett stort hus</td>
<td>stora bilar/hus</td>
</tr>
<tr>
<td></td>
<td>a big car</td>
<td>a big house</td>
<td>big cars/houses</td>
</tr>
<tr>
<td>god® mat</td>
<td>varmt vatten</td>
<td>raka vägar</td>
<td>straight roads</td>
</tr>
<tr>
<td>good food</td>
<td>hot water</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Predicative</strong></td>
<td>bilen är stor®</td>
<td>huset är stort</td>
<td>bilarna/husen är stora</td>
</tr>
</tbody>
</table>
| the car is big | the house is big | the cars/houses are big |}

### Definite forms

<table>
<thead>
<tr>
<th></th>
<th>det stora huset</th>
<th>de stora bilarna/husen</th>
</tr>
</thead>
<tbody>
<tr>
<td>the big car</td>
<td>the big house</td>
<td>the big cars/houses</td>
</tr>
</tbody>
</table>

### Notes:

1. For the inflexion of adjectives and past participles, see 4.2.1 ff, 7.3.1.

2. An alternative form of the adjective, in -e, is sometimes found in the definite singular before non-neuter nouns that clearly indicate a male person (cf. 4.3.1 (2)). This form is more frequent in non-fiction and formal prose, and today occurs only rarely in spoken Swedish except in southern Sweden:

   - den gamle mannen, the old man
   - den store ledaren Napoleon, the great leader Napoleon
3 The definite ending in -e also occurs, as a compulsory form, on the adjective ending in -ad, superlative in -ast (cf. 4.3.1 (2)):

- den nymålade stugan the newly painted cottage
- det billigaste huset the cheapest house

### 4.2 Indefinite declension

#### 4.2.1 Indefinite forms – regular

**Main rule:** Most adjectives including all those that end in -(l)ig add -t in the neuter form and -a in the plural (non-neuter and neuter):

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>+⊗ (no ending)</td>
<td>+t</td>
<td>+a</td>
</tr>
</tbody>
</table>

**Examples:**

- en fin® tavla ett fint hus fina taylor/hus
  - a fine picture a fine house fine pictures/houses
- en rolig® film ett roligt skämt roliga filmer/skämt
  - a funny film a funny joke funny films/jokes

#### 4.2.2 Indefinite forms – variations

**Adjectives ending in:**

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 long vowel</td>
<td>short vowel</td>
<td>long vowel</td>
</tr>
<tr>
<td>+t</td>
<td>+t +a</td>
<td></td>
</tr>
<tr>
<td>fri</td>
<td>fritt</td>
<td>fria</td>
</tr>
<tr>
<td>rå</td>
<td>rått</td>
<td>råa</td>
</tr>
</tbody>
</table>

Like fri: ny (new), slö (blunt)

Note that blå (blue) and grå (grey) have optional plural forms: blå/blåa, grå/gråa.

<table>
<thead>
<tr>
<th>2 long vowel</th>
<th>short vowel</th>
<th>long vowel</th>
</tr>
</thead>
<tbody>
<tr>
<td>+t</td>
<td>+tt</td>
<td>+t +a</td>
</tr>
<tr>
<td>vit</td>
<td>vitt</td>
<td>vita</td>
</tr>
</tbody>
</table>

Like vit: het (hot), fet (fat), våt (wet)

Note that many loanwords in long vowel +t do not add an extra -t in the neuter form: akut, desperat, diskret, konkret, privat, separat, etc.
Like lätt: rätt (right), trött (tired), mätt (replete)

Like exakt: abstrakt, elegant, intelligent, intressant, perfekt

This group also includes some indigenous monosyllabic adjectives: brant (steep), fast (firm), kort (short), stolt (proud), tyst (silent).

Like glad: bred (wide), död (dead), god (good), röd (red)

Like hård: ond (evil), vild (wild), mild (mild), värd (worth), and past participles of second conjugation (IIa) verbs: stängd (closed), berömd (famous), bestämd (definite)

Like älskad: all first conjugation past participles, e.g. kortfattad (concise), koncentrerad (concentrated). See 7.3.2.

Like dum: tom (empty), grym (cruel), hjälpsam (helpful), långsam (slow), väldsam (violent). See 14.2.

Like sann: grann (pretty), noggrann (careful), tunn (thin). See 14.2.
Adjectives

10  

-"el/-er  

-enkel  

-"el+/t/-er+t  

-enkelt  

-"l+a/-r+a  

-enkla  

enkel  

vacker  

vackert  

simple  

vackra  

Like enkel: acceptabel (acceptable), flexibel (flexible)

Like vacker: säker (sure), mager (thin), nykter (sober)

11  

-"en  

-mogen  

-e+t  

-moget  

-"n+a  

-mogna  

skriven  

skrivet  

ripe  

mogna  

written

Like mogen: egen (own), ledsen (sad), nyfiken (curious), öppen (open), vaken (awake), erfaren (experienced) and past participles of fourth conjugation verbs. See 7.3.1 f.

12  

-gammal  

-gammalt  

-gamla  

old

13  

-liten  

-litet  

-små  

little

The definite forms (see 4.1) of liten are lilla (non-neuter/neuter) and små (plural).

4.2.3 Indeclinable adjectives

Some adjectives do not inflect in either definite or indefinite declension, unlike those in 4.2.1 f. These include those ending in -s, -e, -a and some others:

1 Adjectives ending in -s:

These are historically noun genitives.

eytt medelålders biträde  
a middle-aged assistant

Includes: gammaldags (old-fashioned), stackars (poor), utrikes (foreign), avsides (remote).

Exceptions: adjectives ending in -öö: nervös nervöst nervösa nervous
adjectives ending in -is: vis vist visa wise
2 Adjectives ending in -e:

**ett öde hus**  a deserted house

Includes: **främmande** (foreign), **gyllene** (golden), **ense** (agreed), **ordinarie** (regular) and all present participles and comparatives in -are, -re:

**omfattande kunskaper**  wide knowledge

**ett större hus**  a bigger house

3 Adjectives ending in -a:

**ett bra tag**  a good while

Includes: **sakta** (slow), **stilla** (peaceful), **äkta** (genuine), **extra** (extra), **samma** (the same), **nästa** (the next), **förra** ((the) last), **nutida** (present day)

4 Some indeclinable adjectives are only used attributively:

**de stackars flickorna**  the poor girls

**i fjärran länder**  in foreign parts

**det dåtida Stockholm**  the Stockholm of that time

5 Some indeclinable adjectives are only used predicatively:

**Arbetet var slut för dagen.**  Work had finished for the day.

**Bilen är sönder.**  The car is unserviceable.

**Jag är ense med dig.**  I agree with you.

6 Some indeclinable adjectives may be used either attributively or predicatively:

**Jag slog fel nummer.**  I dialled the wrong number.

**Flera siffror är fel.**  Several figures are wrong.

**en öde ö**  a desert island

**Landskapet var helt öde.**  The countryside was totally desolate.
4.2.4 Indefinite constructions

The indefinite noun phrase (in this case: indefinite premodifier + adjective + noun) usually expresses something general and non-specific.

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 When no word precedes adjective + noun:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>god® mat</td>
<td>vackert väder</td>
<td>raka vägar</td>
</tr>
</tbody>
</table>

2 When one of the following premodifiers precedes adjective + noun:

| en | ett | två | a/two |
| någon | något | några | a/some/any |
| ingen | inget | inga | no |
| en enda | ett enda | – | a single |
| en annan | stor® ett annat | stort andra | (an)other |
| pojke | hus | pojkar/hus |
| en likadan | ett likadant | likadana | (a) similar |
| en sådan | ett sådant | sådana | such (a) |
| vilken | vilket | vilka | which |
| varje | varje | – | each |
| | | många | many |
| | | flera | several |
| | | alla | all |
| | | få | few |
| | | olika | different |
| | | somliga | some |
| | | åtskilliga | several |

4.2.5 Agreement and lack of agreement

Generally speaking Swedish adjectives in the indefinite agree with the noun which they qualify:

**Gården är stor®, men huset är litet med mörka rum.**
The farm is big but the house is small with dark rooms.

Notice, however, the following special cases where there is lack of agreement:
1 Constructions according to meaning:

Folk är mer intresserade av idrott än politik.
People are more interested in sport than politics.

Cf. lite(t) folk
few people

Statsrådet var säker på sin sak.
The minister was sure of her case.

Notice also:

laget . . . de (the team . . . they); paret . . . de (the couple . . . they);
affärssbiträdet . . . han/hon (the shop assistant . . . he/she);
barnet . . . hon/han (the child . . . he/she);
polisen . . . de (the police . . . they)

2 Some nouns used without articles or an additional complement in a
general, abstract or collective sense require the neuter form of the adjective:

ärter är gott.
Peas are good /to eat/.
Att äta ärter är gott.
Det är gott med ärter.

Danska är svårt.
Danish is difficult.
Att lära sig danska är svårt.
Det är svårt att lära sig danska.

But note:

De här ärterna är goda.
These peas are good.
Hans danska är obegriplig.
His Danish is unintelligible.

4.3 Definite declension

4.3.1 Definite form of the adjective: -e or -a?

1 Forms in -a are used:

(a) With non-neuter nouns in the singular:
    den vackra flickan
den nya stolen

(b) With adjectival nouns in the singular referring to a female person:
    den sjuka (damen)
(c) With plural nouns of both genders (except those in 2(a), (b) below):
   de fina blommorna
dea unga pojkarna
de billiga husen

(d) With neuter nouns in the singular
det höga trädet

2 Forms in -e are used:

(a) With past participles ending in -ad:
den nymålad stugan
det nymålande huset
de nymålande husen/stugorna

(b) With superlatives ending in -ast:
den vackraste flickan
det billigaste huset
de billigaste husen

(c) With singular nouns that clearly refer to a male person:
   (More common form, see 1(a) above):
den långa pojken

(d) With singular adjectival nouns referring to a male person:
   (Compulsory form, see 4.4.1):
den sjuke (mannen)

Note: äkta (genuine, married), före detta (former, ex-) have no e-form:

Evas äkta man
Barbros före detta man

Remember: e-forms are used with adjectives in -ad, -ast and with masculine

The definite noun phrase (i.e. definite premodifier + adjective + noun) usually
expresses something specific (cf. indefinite noun phrase, 4.2.4). This is the
basic type of definite construction. The noun is defined by:

(1) the front (adjectival) article: den, det or de
(2) the definite ending on the adjective: -a (or -e)
(3) the end article on the noun: -(e)n, -(e)t, -na, -a or -en

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>den nya bilen</td>
<td>det nya huset</td>
<td>de nya bilarna/husen</td>
</tr>
<tr>
<td>the new car</td>
<td>the new house</td>
<td>the new cars/houses</td>
</tr>
</tbody>
</table>
The construction above is sometimes called ‘double definition’. Constructions with the demonstrative den här, etc., (see 5.8) are an extension of this type:

\[ \text{den här nya bilen} \quad \text{det här nya huset} \quad \text{de här nya bilarna/husen} \]

this new car \quad this new house \quad these new cars/houses

4.3.3 Definite construction Type 2 – firmans nya bil

In many cases the adjective has a definite ending -a/-e while there is no end article on the noun (cf. 4.3.2). This occurs after the following types of word:

1 The genitive:

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>firmans nya bil</td>
<td>mannens nya hus</td>
<td>barnets nya kompisar</td>
</tr>
<tr>
<td>the firm’s new car</td>
<td>the man’s new house</td>
<td>the child’s new friends</td>
</tr>
<tr>
<td>Olles nya bil</td>
<td>Olles nya hus</td>
<td>Olles nya kompisar</td>
</tr>
<tr>
<td>Olle’s new car</td>
<td>Olle’s new house</td>
<td>Olle’s new friends</td>
</tr>
</tbody>
</table>

Note: the genitive of measurement (which takes the indefinite endings in -⊗, -t, -a, 3.7.1):

\[ \text{ett trettiminuters långt program} \] (a 30-minute (long) programme)

2 The possessive:

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>min nya dator</td>
<td>mitt nya hus</td>
<td>mina nya skor</td>
</tr>
<tr>
<td>my new computer</td>
<td>my new house</td>
<td>my new shoes</td>
</tr>
</tbody>
</table>

Exceptions:

1 egen takes an indefinite ending after the possessive and genitive:

\[ \text{mammas egen} \quad \text{Olle} \quad \text{Mummy’s very own Olle} \]
\[ \text{deras eget fina hus} \quad \text{their own nice house} \]

2 after var sin/sitt the adjective may be in either the definite or indefinite form:

\[ \text{Pojkarna fick var sin ny(\text{o}) cykel.} \quad \text{The boys each got a new bicycle.} \]
3 The demonstratives denna, detta, dessa (cf. den här, etc., 5.8):

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>denna mörka skog</td>
<td>detta vackra träd</td>
<td>dessa mörka skogar</td>
</tr>
<tr>
<td>this dark forest</td>
<td>that beautiful tree</td>
<td>these dark forests</td>
</tr>
<tr>
<td>dessa vackra träd</td>
<td></td>
<td>dessa vackra träd</td>
</tr>
<tr>
<td>these beautiful trees</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Denna etc., is usually found only in written Swedish.

4 The determinative pronoun den, det, de (see 5.9):

De lata studenter som inte pluggade blev underkända i skrivningen.
Those lazy students who did not study failed the exam.

5 The relative pronoun vars (see 5.10):

Mannen vars lilla dotter är sjuk, är mycket orolig.
The man whose little daughter is ill is very worried.

Vars is usually found only in written Swedish.

6 Others:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>samma</td>
<td>samma dumma fråga</td>
</tr>
<tr>
<td>nästa</td>
<td>nästa vackra helg</td>
</tr>
<tr>
<td>följande</td>
<td>följande svåra problem</td>
</tr>
<tr>
<td>föregående</td>
<td>föregående långa brev</td>
</tr>
</tbody>
</table>

**4.3.4 Definite construction Type 3 – svenska språket**

The front article (cf. 4.3.2) is sometimes omitted:

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>Svenska akademin</td>
<td>Röda korset</td>
<td>Förenta nationerna</td>
</tr>
<tr>
<td>the Swedish Academy</td>
<td>the Red Cross</td>
<td>the United Nations</td>
</tr>
</tbody>
</table>

This happens:

1 When an adjectival expression becomes a proper noun and the adjective loses its stress:

Cf. det 'vita 'huset the white house
Vita 'huset the White House (in Washington)
Cf. det 'röda 'korset the red cross
Röda 'korset the Red Cross (aid organization)

2 In some cases when a contrast is expressed or implied and the noun is unstressed:

Det är 'stora flickan som fyller år, inte 'lilla flickan.
It is the big girl who is having a birthday, not the little girl.

3 In some cases when the (stressed) adjective provides stylistic marking in the phrase (in spoken Swedish):

Det är ju 'rena smörjan! That's utter rubbish!

The main kinds of Type 3 construction are found:

(a) In geographical locations:

Gamla stan the Old Town
Döda havet the Dead Sea
Förenta staterna the United States

(b) With nationality adjectives:

franska revolutionen the French Revolution
brittiska flottan the British navy

(c) With colours:

gula febern (the) yellow fever
Röda halvmånen the Red Crescent

(d) With words for location:

på högra sidan on the right hand side
i mellersta lådan in the middle drawer

(e) With compass points:

södra stambanan the main (railway) line to the south
västra halvklotet the western hemisphere
(f) With ordinal numbers:

förra hjälpen first aid
för andra gången for the second time

(g) With the words båda, förra, hela, halva, själva, ena, enda, rena rama, blotta: hela året om (all year round); gå halva vägen (walk half the way); själva tanken är briljant (the thought itself is brilliant); ha ont i ena benet (have a pain in one leg); det var rena rama skojet (it was a complete joke)

### 4.3.5 Definite construction Type 4 – första klass

This is a relatively infrequent construction in which there is neither front article nor end article (nor necessarily any word preceding the adjective). It is used:

1. In forms of address and with proper nouns:
   - **Käre far!** Dear father (in letters, for example)
   - **Lilla vän!** My little friend!
   - **gamle herr Nilsson** old Mr Nilsson
   - **Lille Albert** Little Albert

2. With some ordinal numbers and other words denoting position in a series:
   - **Vi ska resa första klass.** We’re travelling first class.
   - **De kom i sista stund.** They arrived at the last moment.

3. Often with superlatives:
   - **med största nöje** with great pleasure
### 4.3.6 Definite constructions – summary chart

</tbody>
</table>
Adjectival nouns and nationality words

4.4.1 Adjectival nouns

1. There are three cases where the adjective is used independently, as if it were a noun:

(a) When the noun may easily be supplied: (inflected as an adjective)

Gamla bilar är billigare än nya (bilar).
Old cars are cheaper than new ones.

Ett rött hus och ett vitt (hus).
A red house and a white one.

Alla de äldre (människorna) var trötta.
All the elderly people were tired.

(b) When the noun is not usually supplied. As the examples below show, this is almost invariably when the noun would otherwise describe one or more people, or in cases where the noun tinget (= thing) could be supplied. Adjectival nouns of this kind are inflected as adjectives:

en blind (människa)
a blind person

Man bör hjälpa de blinda, de döva och de handikappade.
One should help the blind, the deaf and the disabled.

Notice that, in the singular, the e-form is compulsory in written Swedish for masculines:

den blinde (mennen) cf. den blinda (kvinnan) (see 4.3.2)

Det sista han gjorde var att skratta.
The last thing he did was laugh.

Det bästa jag vet är inlagd sill.
The best thing I can think of is pickled herring.

Du är den ende jag älskar.
You are the only one (i.e. the only man) I love.

Du är den enda jag älskar.
You are the only one (i.e. the only woman) I love.

Det enda du kan göra är att vänta.
The only thing you can do is wait.
(c) When the conversion to noun is complete: (inflected as a noun –
takes end article)

- lillan: the little girl
- lillen: the little boy
- högern: the Right (in politics)
- vänstern: the Left (in politics)

2 As in English, deletion of the noun is common in Swedish in the plural
definite:

De unga, de gamla, de sjuka och de fattiga måste hjälpas av
de mera välbeställda.
The young, the old, the sick and the poor must be helped by the
better off.

But the noun is more often deleted in Swedish, as the number and gender
are indicated by the article and adjectival ending:

Cf. 'the tall man’ with:
- den lång (mennen)
- den långa (kvinnan)
- det långa (tinget)
- de långa (människorna/tingen)

3 Swedish adjectival nouns can be formed from the following:

(a) The indefinite: en bekant (an acquaintance), en död (a dead person).

(b) The non-neuter singular definite: den gamle (the old man), den
gamla (the old woman), den enskilda (the individual person).

(c) The neuter singular definite: det nya (the new thing), det enda (the
only thing), det första (the first thing).

(d) The definite plural: de kriminella (the criminal community).

(e) The definite form of the superlative: det dumaste (the most stupid
thing), det mest överraskande (the most surprising thing).

(f) The present participle: de närvarande (those present), den
inneboende (the lodger/inmate), de överlevande (the survivors).

(g) The past participle: en misstänkt (a suspect), en nygift (a newly
wed), en okänd (a stranger), den sårade (the wounded person), de
skadade (the injured).
4 ‘The English’: Expressions of nationality such as ‘the English (people)’, ‘the French (people)’ are rarely translated by adjectival nouns. Common nouns indicating the male inhabitants are used instead (see 4.4.2 below).

The English lost the battle of Hastings.

*Engelsmännen förlorade slaget vid Hastings.*

The French take their holidays in August.

*Fransmännen tar semester i augusti.*

<td>italienska (-or)</td>
<td>italienska</td>
<td>italiensk</td>
<td>Italien</td>
</tr>
</tbody>
</table>
4.5 Comparison of adjectives

4.5.1 Comparison with -are, -ast

The comparative has one form only for both genders, definite and indefinite. The superlative has two forms, an indefinite and a definite form. For the definite forms of the superlative see 4.5.6.

A large number of Swedish adjectives form their comparative and superlative forms by adding the endings -are, -ast to the positive form:

<table>
<thead>
<tr>
<th>Positive</th>
<th>Comparative</th>
<th>Superlative</th>
</tr>
</thead>
<tbody>
<tr>
<td>glad</td>
<td>gladare</td>
<td>gladast</td>
</tr>
<tr>
<td>happy</td>
<td>happier</td>
<td>happiest</td>
</tr>
</tbody>
</table>
| This group includes all those adjectives in 4.2.2 (1–6, 8–10) above, including the frequent group ending in -(l)ig:
| rolig    | roligare    | roligast    |
| funny    | funnier     | funniest    |
| Notice, however, that some adjectives compared in this way drop the -e in their final syllable before adding -are, -ast (see 4.2.2 (10, 11)):
| vacker   | vackrare    | vackrast    |
| pretty   | prettier    | prettiest   |
| Adjectives in a short vowel +m/n (4.2.2 (8)) double the vowel when adding the endings -are, -ast (see 14.2 (3)):
| grym     | grymmare    | grymmast    |
| cruel    | crueller    | cruellest   |

Notice that many adjectives which in English compare with 'more, most' in Swedish add -are, -ast:

<table>
<thead>
<tr>
<th>Comparative</th>
<th>Superlative</th>
</tr>
</thead>
<tbody>
<tr>
<td>intelligentare</td>
<td>intelligentast</td>
</tr>
<tr>
<td>intressantare</td>
<td>intressantast</td>
</tr>
<tr>
<td>modernare</td>
<td>modernast</td>
</tr>
<tr>
<td>skickligare</td>
<td>skickligast</td>
</tr>
<tr>
<td>svårare</td>
<td>svårast</td>
</tr>
</tbody>
</table>

more, more intelligent
more, more interesting
more, most modern
more, more skilful
more, most difficult

Notes:
1 Past participles in -d, -t tend to compare with mer(a), mest or with -are, -ast:
   en mer(a) bortskämd flicka a more spoiled girl
2 Those adjectives in -d, -dd, -t, -en which resemble past participles tend to add -are, -ast:
   en vidsyntare lærare a more broad-minded teacher
3 Past participles ending in -en tend to compare with -are, -ast:
   en frusnare brevbärare a colder postman
4.5.2 Comparison with -re, -st

There is a small group of commonly used monosyllabic adjectives which, with the exception of hög, change the stem vowel in the comparative and superlative forms as well as adding -re, -st:

<table>
<thead>
<tr>
<th>Positive</th>
<th>Comparative</th>
<th>Superlative</th>
</tr>
</thead>
<tbody>
<tr>
<td>O → Ö: stor</td>
<td>större</td>
<td>störst</td>
</tr>
<tr>
<td>gröv</td>
<td>grövre</td>
<td>grövst</td>
</tr>
<tr>
<td>Å → Ä: låg</td>
<td>lägre</td>
<td>lägst</td>
</tr>
<tr>
<td>lång</td>
<td>längre</td>
<td>längst</td>
</tr>
<tr>
<td>trång</td>
<td>trängre</td>
<td>trängst</td>
</tr>
<tr>
<td>få</td>
<td>färre</td>
<td>–</td>
</tr>
<tr>
<td>Ū → Y: ung</td>
<td>yngre</td>
<td>yngst</td>
</tr>
<tr>
<td>tung</td>
<td>tyngre</td>
<td>tyngst</td>
</tr>
<tr>
<td>Ö: hög</td>
<td>högre</td>
<td>högst</td>
</tr>
</tbody>
</table>

4.5.3 Irregular comparison

There is a small group of adjectives which compares by adopting a different stem:

<table>
<thead>
<tr>
<th>Positive</th>
<th>Comparative</th>
<th>Superlative</th>
</tr>
</thead>
<tbody>
<tr>
<td>god/bra</td>
<td>bättre</td>
<td>bäst</td>
</tr>
<tr>
<td>dålig</td>
<td>sämre</td>
<td>sämst</td>
</tr>
<tr>
<td>dålig/ond</td>
<td>värre</td>
<td>värst</td>
</tr>
<tr>
<td>gammal</td>
<td>äldre</td>
<td>äldst</td>
</tr>
<tr>
<td>liten</td>
<td>mindre</td>
<td>minst</td>
</tr>
<tr>
<td>många</td>
<td>fler(a)</td>
<td>flest</td>
</tr>
<tr>
<td>mycket</td>
<td>mer(a)</td>
<td>mest</td>
</tr>
</tbody>
</table>
**4.5.4 Comparison with mer, mest**

A large and varied group of adjectives compares using the adverbs *mer* and *mest* rather than an ending. This group includes:

1. Most past participles:

   - **komplicerad**
     - **Positive**: komplicerad
     - **Comparative**: mer komplicerad
     - **Superlative**: mest komplicerad
     - **Complicated**
     - **More complicated**
     - **Most complicated**

   - **ansträngd**
     - **Positive**: ansträngd
     - **Comparative**: mer ansträngd
     - **Superlative**: mest ansträngd
     - **Strained**
     - **More strained**
     - **Most strained**

   **Exceptions**: Past participles ending in -en often add an inflexional ending:
   - **frusen**
     - **Positive**: frusen
     - **Comparative**: frusnare
     - **Superlative**: frusnast
     - **Cold (lit. frozen)**
     - **Colder**
     - **Coldest**

2. All present participles:

   - **omfattande**
     - **Positive**: omfattande
     - **Comparative**: mer omfattande
     - **Superlative**: mest omfattande
     - **Wide-ranging**
     - **More wide-ranging**
     - **Most wide-ranging**

3. All adjectives of two or more syllables ending in -isk:

   - **fantastisk**
     - **Positive**: fantastisk
     - **Comparative**: mer fantastisk
     - **Superlative**: mest fantastisk
     - **Fantastic**
     - **More fantastic**
     - **Most fantastic**

Notice that all adjectives compared using *mer* and *mest* also inflect according to the indefinite and definite declensions (see 4.5.6):

- **ett mera typiskt exempel**
  - A more typical example

- **den mest fantastiska matchen**
  - The most fantastic match

There is an increasing tendency to use *mer*, *mest* as an alternative to inflectional comparisons:

- **Det är mest troligt att han avgår.**
  - It’s most likely that he will resign.

### 4.5.6 Comparison (indefinite and definite)

1. The comparative (when formed with -(a)re (see 4.5.1 ff)) is indeclinable:

<table>
<thead>
<tr>
<th></th>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Indefinite</strong></td>
<td></td>
<td></td>

<td>de vackrare flickorna/större husen</td>
<td></td>
</tr>
<tr>
<td>the prettier girl</td>
<td>the bigger house</td>
<td>the prettier girls/bigger houses</td>
<td></td>
</tr>
</tbody>
</table>

2. The superlative (when formed with -(a)st (see 4.5.1 ff)) inflects in the definite form when used attributively, but does not inflect when used predicatively:

<table>
<thead>
<tr>
<th></th>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Predicative</strong></td>

<td></td>
<td></td>
</tr>
</tbody>
</table>
4.5.7 Use of comparatives and superlatives

1 god, bra:
Godare, godast = more/most pleasant-tasting.
Bättre and bäst are used in a general sense.

- den godaste middagen the best dinner
- Cf. den bästa uppsatsen the best essay

2 dålig:
Värre, värst = more/most of a bad property:

- den värsta lögn jag har hört the worst lie I have heard
Sämre, sämst = less/least of a good property, i.e. poorer/poorest:

- byxor av sämre kvalitet trousers of poorer quality

3 mer, mest/fler, flest = more, most
Mer(a), mest are only used with non-count nouns, while fler(a) and flest are only used with count nouns:

- Vill du ha mer kaffe? Would you like more coffee?
- De flesta svenskar gillar sill. Most Swedes like pickled herring.

If a comparison is implied when using de flesta, the noun following takes the end article:

- Vem fick de flesta rösterna? Who received most votes?

4 Absolute comparative (i.e. the comparative element is lost, the adjective indicates a high degree):

- Han har vunnit en större summa. (= en ganska stor summa)
  He has won a fairly large sum.

Cf. relative comparative:

- Summan var större än han trodde.
  The sum was larger than he thought.

Notice: flera = several (cf. 3 above):

- Jag har varit här flera gånger. I have been here several times.
Absolute superlative (i.e. the comparative element is lost, the adjective indicates a very high degree):

De var de bästa vänner. They were the best of friends.
(mycket goda vänner)

Cf. relative superlative:

De bästa vännerna i vår klass var Per och Ulf. The best friends in our class were Per and Ulf.
### 5.1 Personal and reflexive pronouns – form

<table>
<thead>
<tr>
<th>Subject pronouns</th>
<th>Object pronouns</th>
<th>Reflexive pronouns</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Singular</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1 jag</td>
<td>l mig</td>
<td>me mig (mej)</td>
</tr>
<tr>
<td>2 du</td>

</tr>
<tr>
<td>1 vi</td>
<td>we oss</td>
<td>us oss</td>
</tr>
<tr>
<td>ni</td>
<td>you er</td>
<td>you er</td>
</tr>
<tr>
<td>3 de (dom)</td>
<td>they dem (dom)</td>
<td>them sig (sej)</td>
</tr>
</tbody>
</table>

**Notes:**
1. Unlike English ‘I’, jag does not have a capital letter except at the beginning of a sentence. Jag is pronounced [ja] unless stressed.
2. Du/ni, dig/er, etc., occasionally have initial capital letters in official communications.
3. Both de and dem are pronounced [dɔːm] except in liturgical and formal language. The written form dom is accepted in personal letters and modern fiction, especially in dialogue, though cultivated Swedish retains de and dem in writing. This has not extended to the use of dom as a front article before the adjective: de rika [dɔːm rɪkə].
4. In personal letters and modern fiction the spellings mej, dej and sej are occasionally found for mig, dig and sig.
5. Det is pronounced [deː].
6. There is no separate disjunctive form of the pronoun in Swedish, but the subject form is used for this purpose: – Hallå du! – Vem? Jag? ‘Hallo there!’; ‘Who, me?’ (See also 5.2(3).)
Use of personal pronouns

1 du/ni: In the singular most people now use the familiar du. Although ni is sometimes still used as a polite form of address to people being served in restaurants, shops, airports, etc., to many Swedes ni now sounds old-fashioned and stand-offish. (See also 5.7.) Note the following idiomatic expressions:

- Du, kan du hjälpa mig? I say/Hey, can you give me a hand?
- Snälla du, hjälp mig! Will you/Please help me!

2 han/hon: han is also used to refer to so-called ‘higher animals’ irrespective of their true gender.

- Vilken björn! Han är enorm.
  What a bear! He’s enormous.

Hon is used to refer to the clock when telling the time and also to the noun människa (human being):

- Hur mycket är klockan? Hon är fyra.
  What’s the time? It’s four o’clock.

- En människa måste bestämma sig för hur hon vill leva.
  A person has to decide how he (or she) wants to live.

3 den/det/de: In addition to serving as personal pronouns, these words may also be used as demonstrative pronouns (see 5.8).

Det also has a number of idiomatic usages:

(a) as a complement of vara/bli when the verb is followed by a noun or pronoun, irrespective of gender or number:

- Vad var det? Det var en katt/jag.
  What was that? It was a cat/me.

- Vem är hon? Det är min mamma.
  Who’s she? She’s my mum.

- Bröderna Olsson. Det är två fina killar.
  The Olsson brothers, they’re a couple of fine lads.

(b) as a formal subject (see 12.6.1, 12.7.7):

- Det är svårt att lära sig tyska. It’s hard to learn German.
Det finns ingen matta på golvet.
There’s no carpet on the floor.

Det bor många svenskar här.
There are a lot of Swedes living here.

Note that Swedish may use det + any intransitive verb in this way. English generally uses only the verb ‘to be’.

(c) in passive constructions without a real subject (see 7.5.17):

Det skrivs/pratas mycket om henne.
There’s a lot written/said about her.

Det hörs att hon inte är svensk.
You can hear she’s not Swedish.

(d) as an impersonal subject:

Det blåste och det snöade.
It was windy and snowing.

Det kändes mycket kallt.
It felt very cold.

Det syns att han är sjuk.
You can see he’s ill.

Hur står det till?
How are you?/How are things going?

Hur gick det?
What happened?

(e) as an object of verbs expressing ‘think/believe/hope/say’, etc.
(cf. English ‘so’):

Är han död? De fruktar/tror/hoppas/säger det.
Is he dead? They fear/think/hope/say so.

Note also:

Olle var hungrig. Och det var vi också.
Olle was hungry. And so were we.

(f) in answer to questions, without an English equivalent, as a complement of vara/bli or an object of auxiliary verbs:

Är du rik? Nej, det är jag inte.
Are you rich? No, I’m not.

Kan du svenska? Ja, det kan jag.
Do you speak Swedish? Yes, I do.

Note also:

Hon ser snäll ut, och det är hon.
She looks kind, and she is too.

(g) without an English equivalent when referring back to a whole clause:

Han påstår att han bor i villa, men det gör han inte.
He claims that he lives in a detached house, but he doesn’t.
### Summary of the major uses of *det*:

</tr>
</tbody>
</table>

#### 5.3 Reflexive pronouns

The reflexive pronoun is used when the object of a sentence or clause is also the subject. Reflexive forms are identical to object forms for all but the third person:

- **Jag har skurit mig.**  
  I have cut myself.

- **Stäng dörren efter dig!**  
  Close the door behind you.
  *Du* is understood as subject in imperatives.

- **Han har skurit sig.**  
  He has cut himself.

- **Han stängde dörren efter sig.**  
  He closed the door behind him.

- **De hade inga pengar på sig.**  
  They had no money on them.

Note that the reflexive forms must be used in Swedish. There is a great deal of difference between **Han sköt honom** (Object, ‘He shot him’) and **Han sköt sig** (Reflexive, ‘He shot himself’)! 
There is one important and frequent exception to the main rule. After verbs followed by object and infinitive constructions (see 7.5.1 (3)) the reflexive pronoun idiomatically refers to the object, and the personal pronoun to the subject of the main clause:

*Han (S) bad doktorn (O) tvätta sig (RP).*

He asked the doctor to wash himself.

*Han (S) bad doktorn (O) tvätta honom (PP).*

He asked the doctor to wash him.

The reflexive pronouns are used with a number of verbs (see 7.5.14) regarded as expressing reflexive actions in Swedish, but where the reflexive idea is absent in English:

*gifta sig* (get married), *raka sig* (have a shave)

### 5.4 Själv

*Själv* (-t, -a) is only used for emphasis. It is not itself reflexive (cf. 5.3 above):

*Jag kan göra det själv.* I can do it myself.

*Killarna själva målade huset.* The boys painted the house themselves.

*Han älskar bara sig själv.* He only loves himself.

### 5.5 Possessive pronouns

In Swedish the possessive pronoun and possessive adjective have the same form:

*Boken är min.* The book is mine.

*Det är min bok.* It is my book.

First and second person possessives agree with the noun:

*Det är din hatt, ditt paraply och dina stövlar.*

Third person possessives ending in -s do not inflect:

*Det är hans hatt, hans paraply och hans stövlar.*
Reflexive possessives are given in brackets in the following table. These forms are explained more fully in 5.6.

<table>
<thead>
<tr>

</tr>
<tr>
<td></td>
<td>sin</td>
<td>sitt</td>
</tr>
</tbody>
</table>

Notes:
1. Possessive pronouns have no genitive form:
   - min brors böcker — my brother’s books
2. Noun + ‘of’ before a possessive pronoun in English is usually rendered in Swedish by till and object pronoun (see 10.3.5 (1c)):
   - a friend of mine — en vän till mig
3. The possessive pronoun dess is reserved almost exclusively for formal written Swedish. The definite article is often used as a Swedish equivalent to ‘its’:
   - Vättern och dess omgivningar. — Lake Vättern and its surroundings.
   - Filmen minns jag men inte titeln. — I recall the film but not its title.
4. English possessive adjectives with parts of the body, clothing, etc., are generally rendered by the Swedish definite article if there is no doubt as to ownership:
   - Ouch! I’ve twisted my ankle.
   - Take off your shoes!
   - He has lost his memory.
5. In spoken Swedish the possessive pronouns for the first and second persons plural have colloquial forms våran/vårat, er/erat which exist alongside the standard written forms. See 1.2.10 (2), Note 5.
5.6 Non-reflexive and reflexive possessives: *hans* or *sin*?

1. The reflexive possessives *sin/sitt/sina* (inflected according to the gender/number of the noun qualified) refer to possession by the third person subject (noun, personal, interrogative, or indefinite pronoun) of the clause:

   He loves his wife, his child and his parents.
   
   *Han älskar sin fru, sitt barn och sina föräldrar.*

   Sin/sitt/sina cannot be used to qualify the subject of the clause:

   His wife loves him.
   
   *Hans fru älskar honom.*

2. The non-reflexive forms do not refer back to the subject of the clause:

   *Olle is cross. Why? Because Åke went out with his wife.*
   
   *Olle är sur. Varför det? Därför att Åke gick ut med hans fru.*

   The non-reflexive possessive pronouns *hans*, *hennes*, *dess*, *deras* (indeclinable) may qualify the subject or object of a clause:

   *His wife is a teacher. I've seen his wife at school.*
   
   *Hans fru är lärare. Jag har sett hans fru på skolan.*

   There are two ways of maintaining a distinction between the areas of usage of these different forms:

   (a) Draw an arrow to the ‘possessor’. Is the ‘possessor’ the subject of the clause?

   (b) Can you insert the word ‘own’ before the object in English? If so, use a form of *sin/sitt/sina*. If not, then use a non-reflexive form.

3. A problem arises when there is more than one clause in the sentence:

   *They think that their teacher is boring.*
   
   *De tycker att deras lärare är tråkig.*

   Here ‘their teacher’ is the subject of the subordinate clause and ‘their’ does not refer back, but qualifies the subject. Therefore use *deras*. 
4 A confusing case occurs when the possessive precedes the subject:

Despite his appearance he was very young.

*Trots sitt utseende var han mycket ung.*

5 In clauses with ellipsis (object + infinitive), when there is no finite verb in the clause, *sin/sitt/sina* may refer to the implied subject of the clause:

I heard her call her husband.  *Jag hörde henne ropa på sin man.*

S IS O S IS ←

I saw him kick his dog.  *Jag såg honom sparka sin hund.*

S IS O S IS ←

To test this, expand the ellipted clause into a full clause and apply the basic rules (see 1, 2 above):

*Jag såg att han sparkade sin hund.*

S /SC S ← O

6 Note the idiomatic use of *sin/sitt/sina* in such phrases as:

*Det är inte lätt att älska sin nästa.*

Loving your neighbour is not easy.

*Att offra sin hälsa på cigaretter är dumt.*

It’s stupid to sacrifice your health for cigarettes.

7 Note the idiomatic use of *sin/sitt/sina* in abbreviated comparisons:

*Han är längre än sin fru.*  He is taller than his wife.

cf.

*Han är längre än hans fru är.*  He is taller than his wife is.

8 Note the use of *sin/sitt/sina* in expressions with *var sin* etc.:

*Vi fick var sin banan.*  We got a banana each.

*Flickorna fick var sitt äpple.*  The girls got an apple each.

Notice that *var* is indeclinable in such phrases, and that the choice of *sin/sitt/sina* is determined by the gender/number of the noun qualified.
Forms of address

For personal pronouns see 5.1 f.

1 By far the most common forms of address in modern Swedish are *du* (you, singular) and *ni* (you, plural). From the 1960s onwards, as old class barriers became less marked, *du* became almost universally accepted in Sweden. There are, however, a number of alternative conventions.

2 Formal or polite *ni* is still used occasionally for both singular and plural ‘you’ in more conservative circles, amongst older people who are not on first-name terms, and (with a capital letter: see 14.1 (5)) in formal business and official communications.

3 Titles: Previously a title and a third person construction were sometimes used to convey formal deference when addressing someone. (English has a similar construction. Cf: ‘Would madam like to try on the coat?’ and *Skulle damen vilja prova kappan?*) Unless used ironically, this form of address is reserved only for very formal occasions in modern Swedish.

   **Har kungen några önskemål?**
   Do you have any wishes, Your Majesty?

4 Impersonal constructions: Especially when asking a question, impersonal constructions provide a very neutral – but by no means unfriendly or impolite – form of address between people not personally acquainted.

   *Vad får det lov att vara?*  Can I help you? (in a shop)

   *Hur var namnet?*  What is your name?

   *Önskas socker?*  Do you take/Would you like sugar?

5 *Man* is used:

   (a) as an alternative to *du* as a slightly ironic form of address:

   **Har man sovit bättre i natt?**  Did you sleep better last night?

   (b) as an equivalent to English ‘one’ or ‘you’:

   **Man kan aldrig veta.**  You never know/One never knows.

6 Pejorative expressions: Swedish uses the possessive pronoun (5.5) not the personal pronoun in pejorative expressions such as *Din dumbom!* (You fool!), *Era idioter* (You idiots!), and also in *Din stackare!* (You poor thing!).
## Demonstrative pronouns

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>den flickan</strong></td>
<td><strong>det huset</strong></td>
<td><strong>de flickorna/husen</strong></td>
</tr>
<tr>
<td>this/that girl</td>
<td>this/that house</td>
<td>these/those girls/houses</td>
</tr>
<tr>
<td><strong>den här flickan</strong></td>
<td><strong>det här huset</strong></td>
<td><strong>de här flickorna/husen</strong></td>
</tr>
<tr>
<td>this girl</td>
<td>this house</td>
<td>these girls/houses</td>
</tr>
<tr>
<td><strong>den där flickan</strong></td>
<td><strong>det där huset</strong></td>
<td><strong>de där flickorna/husen</strong></td>
</tr>
<tr>
<td>that girl</td>
<td>this house</td>
<td>those girls/houses</td>
</tr>
<tr>
<td><strong>denna flicka</strong></td>
<td><strong>detta hus</strong></td>
<td><strong>dessa flickor/hus</strong></td>
</tr>
<tr>
<td>this/that girl</td>
<td>this/that house</td>
<td>these/these girls/houses</td>
</tr>
<tr>
<td><strong>samma flicka</strong></td>
<td><strong>samma hus</strong></td>
<td><strong>samma flickor/hus</strong></td>
</tr>
<tr>
<td>the same girl</td>
<td>the same house</td>
<td>the same girls/houses</td>
</tr>
<tr>
<td><strong>en sådan flicka</strong></td>
<td><strong>ett sådant hus</strong></td>
<td><strong>sådana flickor/hus</strong></td>
</tr>
<tr>
<td>such a girl</td>
<td>such a house</td>
<td>such girls/houses</td>
</tr>
</tbody>
</table>

**Notes:**

1. Den etc. (always stressed when used as a demonstrative pronoun) is preferred with abstract nouns:
   - *Det året kom vi till Sverige.* That year we arrived in Sweden.
2. Den här, den där, etc., are found in both speech and writing, and require an end article on the noun.
3. Denna, detta, etc., are generally reserved for written Swedish and require no end article on the noun.
4. As in English, demonstratives may be used predicatively (i.e. independently of a noun). They then take the number/gender of the noun to which they refer:
   - *De här tavlorna är dyrare än de där.* These pictures are more expensive than those.
   - *Detta är något nytt.* This is something new.
   - *Jag tar det här, inte det där.* I’ll take this one, not that one.
   - Note that the demonstrative *de* (these, those) has an object form when used predicatively:
     - *Jag tar de här skorna, inte dem.* I’ll take these shoes, not those.
5. Samma is only used attributively; densamma, etc., is used predicatively and in more formal Swedish. There is neither front nor end article with *samma*.
   - *Vi ses nästa vecka. Samma tid, samma plats.* See you next week. Same time, same place.
   - *Hon är alltid densamma.* She’s always the same.
6. Sådan is preceded by the singular indefinite article, not followed by it as in English. In colloquial Swedish it is combined with här/där:
   - *en sådan (här) flicka* such a girl/a girl like this
   - *Jag tar fem sådana.* I will have five of those.
   - *En sådan stor bil han har!* What a big car he has!
5.9 Determinative pronouns

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>den flicka</td>
<td>det hus</td>
<td>de flickor</td>
</tr>
<tr>
<td>som</td>
<td>som</td>
<td>/hus som</td>
</tr>
</tbody>
</table>

1. The determinative is a kind of demonstrative that directs attention to a following relative clause. When the determinative qualifies a noun, the noun has no end article (cf. demonstratives 5.8 above):

Cf. Demonstrative:

*De turisterna därborta fick mycket sol.*
Those tourists over there got a lot of sun.

Determinative:

*De turister som åkte till Island fick mycket sol, medan de turister som åkte till Italien fick regn varje dag.*
Those/The tourists who went to Iceland got a lot of sun, whilst those/the tourists who went to Italy had rain every day.

2. Determinatives are used when the following relative clause is essential to the sentence (‘restrictive clause’). Notice that a contrast is often implied. If the relative clause is merely an afterthought and may be deleted (‘non-restrictive clause’), then an end article is used. Cf.

*De fabriker som anställer ungdomar bör hjälpas. (restrictive)*
(Only) those firms employing young people should be helped.

*Fabrikerna, som anställer ungdomar, bör hjälpas.*
The firms, which employ young people, should be helped.

3. When the determinative is used without a noun *de som* is now accepted as an object form for *dem som*:

*Jag kände ingen av de som/dem som var där.*
I knew none of those who were there.

*Samhället straffar de som/dem som bryter mot lagen.*
Society punishes those who break the law.
Relative pronouns introduce a subordinate (relative) clause, referring back to a correlative in the main clause:

\[
\text{Han är en vän som man kan lita på.}
\]

He is a friend whom one can rely on.

Relative pronouns include:

- **som** the most frequent relative pronoun which, who, what, that
- **vars** genitive of **som**, sing. and plural whose (written Swedish)
- **vilkas** genitive of **som**, plural only whose (written Swedish)
- **vilken** n-n.
- **vilket** n. = **som** who, which, what, that
- **vilda** pl.
- **vad** what

Examples of use:

**Ser du pojken som leker därborta?**
Do you see the boy who is playing over there?

**Mannen, vars dotter ska gifta sig, är sjuk.**
The man whose daughter is getting married is ill.

**Föräldrarna, vars/vilkas dotter ska gifta sig, är sjuka.**
The parents whose daughter is getting married are ill.

**Det är allt, vad jag vet.**
That's all that I know.

Notes:

1 Vilken, etc., is rarely used other than in formal Swedish. Note, however, that **vilket** (not **som**) must be used to refer back to a whole clause:

\[
\text{Hon har börjat studera, vilket gläder mig.}
\]
She's started studying, which pleases me.

2 **Som** may be omitted when it does not serve as a subject in a subordinate clause:

\[
\text{Han är den intelligentaste student (som) jag har träffat.}
\]
He's the most intelligent student (that) I've met.
But:

Ser du pojken som står där borta?

Can you see the boy (who is) standing over there?

3 In contrast to English, a preposition does not appear in the same clause directly before som:

Den man som du pratar om . . .

The man of whom you are speaking

The man that you are speaking of . . .

4 When used as the subject of a relative clause vad is followed by som (see 5.11 (4)):

Vi vet inte vad som hände honom.

We don’t know what happened to him.

5.11 Interrogative pronouns (v-words)

Interrogative pronouns introduce a direct or indirect question.

Interrogative pronouns (v-words) include:

vem, vilka who (sg.), who (pl.)

vad [vaːd] or [va] what

vad . . . för något/någonting what (spoken Swedish)

vilken n-n., vilket n., vilka pl. which

när when

var where

hur how

varför why

Notes:

1 When rendering English ‘who’ remember that vem is only used in the singular, vilka is only used in the plural:

Vem var det som ringde?

Who was it that phoned?

Vilka är det som kommer ikväll?

Who are coming tonight?

2 ‘What kind of’ is often rendered in spoken Swedish by vad för en/ett + singular noun or vad för + plural noun:

Vad köpte du för (en) bil?

What kind of car did you buy?

Vad köpte du för (ett) hus?

What kind of house did you buy?

Vad köpte du för böcker?

What kind of books did you buy?

3 Vilken etc. may be used attributively and predicatively:

Vilka dikter har du redan läst?

Which poems have you already read?

Vilken vill du läsa nu?

Which (one) do you want to read now?
4 Notice that *som* is inserted after *vad*, *vilken* etc. + noun when this is the subject of a subordinate clause (indirect question):

- Jag undrar *vad* (*O*) *han* (*S*) gör. I wonder what he's doing.
- Jag undrar *vad* (*O*) *som* (*S*) händer. I wonder what's happening.
- Jag undrar *vem* *som* (*S*) kommer. I wonder who's coming.
- Jag undrar *vilka böcker* (*S*) *som* är dina. I wonder which books are yours.

5 Notice the use of *vilken*, etc., in exclamations:

- Vilken härlig dag! What a lovely day!
- Vilket hemskt väder! What awful weather!

6 Notice other interrogatives using *hur*: *hur länge?* (how long?); *hur långt?* (how far?); *hur mycket?* (how much?); *hur många* (how many?); *hur dags?* (what time?).

## 5.12 Indefinite pronouns

Indefinite pronouns include:

<table>
<thead>
<tr>
<th>Non-neuter</th>
<th>Neuter</th>
<th>Plural</th>
</tr>
</thead>
<tbody>
<tr>
<td>någon</td>
<td>något</td>
<td>några</td>
</tr>
<tr>
<td>ingen</td>
<td>inget</td>
<td>inga</td>
</tr>
<tr>
<td>all</td>
<td>allt</td>
<td>alla</td>
</tr>
<tr>
<td>varje</td>
<td>varje</td>
<td>varje</td>
</tr>
<tr>
<td>varenda</td>
<td>vartenda</td>
<td>varanda</td>
</tr>
<tr>
<td>var</td>
<td>vart</td>
<td>var</td>
</tr>
<tr>
<td>var och en</td>
<td>vart och ett</td>
<td>varandra</td>
</tr>
<tr>
<td>varannan</td>
<td>vartannat</td>
<td>varandra</td>
</tr>
<tr>
<td>vem som</td>
<td>vad som</td>
<td>vilka som</td>
</tr>
<tr>
<td>helst</td>
<td>helst</td>
<td>helst</td>
</tr>
</tbody>
</table>

Possessive form of *man*: ens one's
Object form of *man*: en one, you
Reflexive form of *man*: sig oneself (see 5.3)
Reflexive possessive form of *man*: sin one’s own (see 5.6)

Note also the pronominal adverbs:

- någonsin sometime, ever
- någonstans somewhere
5 Pronouns

Notes:

1 (a) *Ingen etc./inte någon*, etc., are alternatives as object in a main clause with simple tense (present, past):

   **De (S) såg ingen/inte någon (O) i skogen.** They saw no-one in the forest.

(b) *Inte någon*, etc., must be used as the object in a main clause with complex tense (perfect, pluperfect, modal + main verb) or in a subordinate clause. When *inte någon* constructions are found in the subordinate clause, *inte* precedes the finite verb (see also 12.7.5):

   **Jag har inte sett någon (O) i skogen.** I haven’t seen anyone in the forest.
   **Jag kan inte se någon (O).** I can’t see anyone.
   **De sa, att de inte hade sett någon (O) i skogen.** They said that they hadn’t seen anyone in the forest.

2 (a) *All*, etc., may be used with or without a definite article on the noun following in much the same way as in English:

   **Alla böcker är dyra.** All books are expensive.
   **Alla böckerna hade sålts.** All the books had been sold.

(b) English ‘all’ = ‘the whole (of)’ is usually rendered by *hela* + the noun with end article singular:

   **Har du läst hela boken?** Have you read all (of) the book?

(c) *Allt* corresponds to ‘everything’; *alla* corresponds to ‘everyone’:

   **Han säljer allt till alla.** He sells everything to everyone.

3 *Varje* (indeclinable), and *var/vart* are synonymous but not always interchangeable:

(a) *Varje* is common in spoken Swedish, and is used pronominally only after a preposition:

   **Fem påsar med 12 kg i varje.** Five bags with 12 kilos in each.
   **Varje påse innehåller 12 kg.** Each (bag) holds 12 kilos.

(b) *Var/vart* is preferred before ordinals:

   **Han kommer var tredje vecka.**
   He comes every third week/every three weeks.

4 *Varenda/vartenda* and *var och en/vart och ett* are more emphatic than *varje/var*.

(a) *Varenda* is used attributively before the indefinite form of the noun:

   **Vartenda fel ska rättas.** Every single error must be corrected.

(b) *Var och en* is often followed by *av* + plural noun or pronoun:

   **Var och en (av oss) gick hem till sig.** Each one (of us) went home.
   **Var och en av bilarna var rostig.** Every single one of the cars was rusty.

5 *Varandra* is restricted in meaning to ‘one another/each other’:

   **Vi känner inte varandra.** We don’t know each other.

6 (a) *Man* is used far more commonly in Swedish than the rather stilted English ‘one’. It occasionally replaces *jag*. Note the form *en* is used as an object or after prepositions:

   **Man vet aldrig vad som kan hända en.**
   You never know what might happen to you.

(b) The possessive forms *ens* and *sin/sitt/sina* are non-reflexive and reflexive respectively (cf. 5.6):

   **Ens ord kan missförstås.** One’s words may be misunderstood.
   **Man måste göra sin plikt.** One must do one’s duty.
## 6.1 Cardinal and ordinal numbers

<table>
<thead>
<tr>
<th>Cardinal numbers</th>
<th>Ordinal numbers</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 noll</td>
<td>första</td>
</tr>
<tr>
<td>1 ett/en</td>
<td>andra</td>
</tr>
<tr>
<td>2 två</td>
<td>tredje</td>
</tr>
<tr>
<td>3 tre</td>
<td></td>
</tr>
<tr>
<td>4 fyra</td>
<td>fjärde</td>
</tr>
<tr>
<td>5 fem</td>
<td>femte</td>
</tr>
<tr>
<td>6 sex</td>
<td>sjätte</td>
</tr>
<tr>
<td>7 sju</td>
<td>sjunde</td>
</tr>
<tr>
<td>8 åtta</td>
<td>åtonde</td>
</tr>
<tr>
<td>9 nio [niː] or [nɪː]</td>
<td>nionde</td>
</tr>
<tr>
<td>10 tio [tiː] or [tɪː]</td>
<td>tionde</td>
</tr>
<tr>
<td>11 elva</td>
<td>elfte</td>
</tr>
<tr>
<td>12 tolv</td>
<td>tolfte</td>
</tr>
<tr>
<td>13 tretton</td>
<td>trettonde</td>
</tr>
<tr>
<td>14 fjorton [fjɔːtɔn]</td>
<td>fjortonde</td>
</tr>
<tr>
<td>15 femton</td>
<td>femtonde</td>
</tr>
<tr>
<td>16 sexton</td>
<td>sextonde</td>
</tr>
<tr>
<td>17 sjutton</td>
<td>sjuttonde</td>
</tr>
<tr>
<td>18 arton</td>
<td>artonde</td>
</tr>
</tbody>
</table>
6.2 Major uses of cardinal and ordinal numbers

1 Cardinal numbers have a special form that may be used as a noun.

(a) **En etta, en tvåa, en trea etc.**:

   (i) The number itself, position in a race:  **Hon kom tvåa.**
   (ii) Bus, tram number:  **Ta femman till stationen.**
   (iii) Size of flat (number of rooms):  **De har en trea i Åby.**
   (iv) Size of clothes, shoes:  **Fyrtiettorna passar bäst.**
2 Ordinal numbers

(a) Ordinal numbers (indeclinable in form) are frequently found after the front article, possessive adjective or noun in the genitive:

- **Det är den första idag.** It’s the first (day of the month) today.
- **Det här är Olles tredje bil.** This is Olle’s third car.
- **Vårt andra barn heter Viola.** Our second child is called Viola.

(b) 1:a, 2:a, 3:e, etc., are common abbreviations for första, andra, tredje, etc. In Swedish the number alone is often sufficient to indicate an ordinal:

- **måndagen 4 juni** = **måndagen den fjärde juni**
- **3 pers. sing.** = **tredje person singularis**

3 Fractions

Fractions are largely formed from ordinal numbers by adding -del:

- \(\frac{1}{4} = \text{en fjärdedel}, \frac{3}{5} = \text{tre femtedelar},\) etc.

Note that the -de of ordinals ending in -onde is assimilated in fractions:

- \(\frac{1}{4} = \text{en åttondel}\)
- \(\frac{1}{10} = \text{en tiondel},\) etc.
- \(1\frac{1}{2} = \text{en och en halv/halvannan} – \text{(e.g. halvannan timme)}\)
  \(\text{ett och ett halvt/halvtannat} – \text{(e.g. halvtannat år)}\)
- \(2\frac{1}{2} = \text{två och en halv}\)
- \(\frac{1}{4} = \text{en fjärdedel}\)
- \(\frac{3}{4} = \text{två tredjedelar}\)
- \(\frac{1}{5} = \text{en femtedel}\)
- \(\frac{1}{9} = \text{en niondel}\)
Half = halv (-t, -a), i.e. an adjective which inflects:

- **en halv sida** (NB: word order)
  half a page

- **halva sidan**
  half the page

- **ett halvt äpple**
  half an apple

- **fem och ett halvt år** (NB: sing.)
  five and a half years

- **två och ett halvt äpple** (NB: sing.)
  two and a half apples

- **halv två**
  half past one (see 6.3)

Half = hälft -en, er i.e. a noun which inflects:

- **första hälften av filmen**
  the first half of the film

- **hälften så stor som i fjor**
  half as big as last year

4 Decimals

| 3,5  | tre komma fem | 3.5 (NB: three point five) |
| 3 000 | tretusen | 3,000 |
| 3 000 000 | tre miljoner | 3,000,000 |

5 -tal: Neuter nouns may be formed by adding -tal (also -tals) to cardinal numbers to render:

(a) an approximate number:

- **Han skrev ett hundraltal brev.**
  He wrote a hundred or so letters.

- **Tusental sjöfåglar dödades.**
  Thousands of seabirds were killed.
(b) a decade or century:

en författare från 1900-talet
an author from the 20th century

EU på 90-talet
the EU in the (19)90s

6 Dates

(a) Years are usually given in figures, but if written out in full are
written as one word. The word *hundra* is not omitted in spoken
or written Swedish and there is no *och* between the hundreds and
tens:

1984       nittonhundraåttifyra
2007       tjugohundrasju

(b) The English preposition ‘in’ before years has no equivalent in
Swedish (see 10.3.2):

Han är född (år) 1944.
He was born in 1944.

(c) Days of the month: see 2(b) above.

7 Telephone numbers. The digits after the regional/mobile dialling code
are frequently given in pairs: thus 0709-12 34 56 is spoken as ‘noll sju
noll nio – tolv trettifyra femtisex’.

8 Temperature

– 5°C  Det är fem grader kallt or Det är minus fem
       grader.

+ 15°C Det är femton grader (varmt) or Det är plus femton
       (grader).

9 Money

3:00     tre kronor

103:50   etthundratre och femti/etthundratre kronor och
         femti öre
### 6.3 Time by the clock

**1** What is the time? etc.

**Hur mycket är klockan?** What time is it?

**Vad är klockan?**

**Klockan/Hon är ett.** The time/It is one o’clock.

**Klockan är en minut över/i ett.** It is one minute past/to one.

**Klockan är fem (minuter) över tre.** It is five (minutes) past three.

**Klockan är (en) kvart över fyra.** It is (a) quarter past four.

**Klockan är fem (minuter) i halv sex.** It is 25 (minutes) to six.

**Klockan är halv sex.** It is half past five.

**Klockan är fem (minuter) över halv sex.** It is 25 (minutes) to six.

**2** ‘What time . . .?’ etc.

**Hur dags/När går tåget?** What time/When does the train leave?
Klockan tre. At three o'clock.
Klockan fem och fyrtifem. At five forty-five.
Klockan kvart i sex. At a quarter to six.
kl. 05.45 = (noll) fem fyrtifem (At) 05.45 (in timetables etc.)

Notes:
1 ‘Half past’ an hour in English is always expressed as ‘half (to)’ the next hour in Swedish:
   halv fem half past four
   halv ett half past twelve
2 Swedes have a special way of expressing time in the period between 21 minutes past the hour and 21 minutes to the hour (see clock diagram):
   sex minuter i halv fyra 3.24
   tre minuter över halv två 1.33
3 The word minuter is often omitted, but as a general rule it is best retained.
7.1 Verb forms in outline

In modern Swedish there is only one form of the verb for all persons, singular and plural, in each of the various tenses of the verb (cf., however, 7.2.7 Note 2).

Swedish has no continuous form of the verb (cf. 7.5.5 (3)) but, like English, employs auxiliary verbs to help form the future, perfect and pluperfect tenses (7.5.7 ff).

For learning purposes it is a convenient simplification to consider the formation of the tenses as the addition of an ending to the basic part of the verb – the stem (see below).

There are four principal types or conjugations of Swedish verbs. Conjugations I, II and III are weak conjugations, forming the past tense by the addition of an ending. All their forms can be built up simply on the basis of their infinitive/present forms. Conjugation IV is strong, forming its past tense by changing the stem vowel. The table summarizes generalized endings for each conjugation and tense:

<table>
<thead>
<tr>
<th>Conjugation</th>
<th>Imperative</th>
<th>Infinitive</th>
<th>Present</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>arbeta</td>
<td>arbeta</td>
<td>arbetar</td>
</tr>
<tr>
<td>IIa</td>
<td>ring</td>
<td>ringa</td>
<td>ringer</td>
</tr>
<tr>
<td>IIb</td>
<td>köp</td>
<td>köpa</td>
<td>köper</td>
</tr>
<tr>
<td>III</td>
<td>sy</td>
<td>sy</td>
<td>syr</td>
</tr>
<tr>
<td>IV</td>
<td>bit</td>
<td>bita</td>
<td>biter</td>
</tr>
<tr>
<td></td>
<td>bjud</td>
<td>bjuda</td>
<td>bjuder</td>
</tr>
</tbody>
</table>
### The four conjugations

#### 7.2.1 First conjugation

<table>
<thead>
<tr>
<th>Conjugation</th>
<th>Past stem + de/te/dde</th>
<th>Supine stem + t/tt</th>
</tr>
</thead>
<tbody>
<tr>
<td>l</td>
<td>arbetade</td>
<td>arbetat</td>

<tr>
<td>ll</td>
<td>ringde</td>
<td>ringt</td>
</tr>
<tr>
<td>llb</td>
<td>köpte</td>
<td>köpt</td>
</tr>
<tr>
<td>III</td>
<td>sydde</td>
<td>sytt</td>
</tr>
<tr>
<td>IV</td>
<td>stem with vowel change</td>
<td>stem with vowel change + it</td>
</tr>
<tr>
<td></td>
<td>drack</td>
<td>druckit</td>
</tr>
<tr>
<td></td>
<td>bjöd</td>
<td>bjudit</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Conjugation</th>
<th>Present participle stem + (a)n(de/ende)</th>
<th>Past participle stem + d/t/dd/en</th>
</tr>
</thead>
<tbody>
<tr>
<td>l</td>
<td>arbetande</td>
<td>arbetad</td>
</tr>
<tr>
<td>ll</td>
<td>ringande</td>
<td>ringd</td>
</tr>
<tr>
<td>llb</td>
<td>köpande</td>
<td>köpt</td>
</tr>
<tr>
<td>III</td>
<td>syende</td>
<td>sydd</td>
</tr>
<tr>
<td>IV</td>
<td>bitande</td>
<td>biten</td>
</tr>
<tr>
<td></td>
<td>bjudande</td>
<td>bjuden</td>
</tr>
</tbody>
</table>

**Infinitive** | **Present** | **Past** | **Supine** | **Past participle**
---|---|---|---|---
+ ⊗ | +r | +de | +t | +d

- **arbeta**: work
- **studera**: study

Includes: two-thirds of all verbs (a quarter of all active verbs) and all new verbs, e.g. dejta (date), jobba (work), parkera (park), surfa (surf).
Some very frequent conjugation I verbs are:

- berätta (tell), bruka (use), börja (begin), fråga (ask), förklara (explain), handla (shop), kalla (call), kostta (cost), lämna (leave), mena (think, mean), spela (play), svara (answer), tala (speak), verka (seem), visa (show), öka (increase), öppna (open).

### 7.2.2 Irregular verbs of the first conjugation

Irregular forms are marked *. Forms within brackets ( ) are less common.

<table>
<thead>
<tr>
<th>Infinitive</th>
<th>Present</th>
<th>Past</th>
<th>Supine</th>
<th>Past participle</th>
</tr>
</thead>
<tbody>
<tr>
<td>besluta</td>
<td>beslutar/</td>
<td>beslutade/</td>
<td>beslutat/</td>
<td>beslutad/</td>
</tr>
<tr>
<td></td>
<td>besluter</td>
<td>beslöt</td>
<td>beslutit</td>
<td>besuten</td>
</tr>
<tr>
<td>betala</td>
<td>betalar</td>
<td>betalade</td>
<td>betalt*</td>
<td>betald*</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>(betalat)</td>
<td>(betalad)</td>
</tr>
<tr>
<td>koka</td>
<td>kokar/</td>
<td>kokade/</td>
<td>kokat/</td>
<td>kokad/</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>(kokte*)</td>
<td>(kokt*)</td>
</tr>
</tbody>
</table>

### 7.2.3 Second conjugation

The second conjugation is divided into two types:

IIa – stem in voiced consonant, past tense in -de

IIb – stem in voiceless consonant (i.e. -k/-p/-s/-t/-x) or in -n, past tense in -te

#### IIa

<table>
<thead>
<tr>
<th>Infinitive</th>
<th>Present</th>
<th>Past</th>
<th>Supine</th>
<th>Past participle</th>
</tr>
</thead>
<tbody>
<tr>
<td>+a</td>
<td>+er</td>
<td>+de</td>
<td>+t</td>
<td>+d</td>
</tr>
<tr>
<td>följa</td>
<td>följer</td>
<td>följde</td>
<td>följt</td>
<td>föld</td>
</tr>
<tr>
<td>bygga</td>
<td>bygger</td>
<td>byggde</td>
<td>byggt</td>
<td>byggd</td>
</tr>
</tbody>
</table>
The following patterns vary slightly from the main paradigm:

1. Stem in -r. No ending in present tense:

   köra  kör  körde  kört  körd  drive

   Like köra: lära (learn), höra (hear), röra (move), störa (disturb), begära (demand), föra (lead), hyra (rent).

2. Stem in vowel + d. Doubling of -d in past tense and past participle but lose the -d and double the -t in the supine:

   betyda  betyder  betydde  betytt  betydd  mean

   Like betyda: föda (feed/bear), träda (step), antyda (hint), lyda (obey).

3. Stem in consonant + d. Add only -e in past tense and drop the -d in the supine. In the past participle no extra -d is added:

   använda  användär  använde  användt  använd  use

   Like använda: tända (light), sända (send), hända (happen).

4. Stem in -l. No ending in present tense:

   tåla  tålr  tålde  tälte  tåld  tolerate

   Like tåla: mala (grind).

5. Stem in -mm. Single m before consonant or in final position. See 14.2:

   glömma  glömmer  glömde  glömt  glömd  forget

   Like glömma: drömma (dream), gömma (hide), skrämma (frighten).

6. Stem in -nn. Single n before consonant. See 14.2:

   känna  känner  kände  känt  känd  know

   Like känna: bränna (burn), påminna (remind).

7. Stem in mutated vowel + j. Mutation and j in infinitive, present tense only:

   välja  väljer  valde  valt  vald  choose

   dölja  döljer  dolde  dolt  dold  conceal
Like välja: vänja (get used to), svälja (swallow).
Like dölja: smörja (lubricate).

8 Infinitive, present only in mutated vowel:

böra  böër  borde  bort – ought, should

Like böra: töra (be likely).

IIb

<table>
<thead>
<tr>
<th>Infinitive</th>
<th>Present</th>
<th>Past</th>
<th>Supine</th>
<th>Past participle</th>
</tr>
</thead>
<tbody>
<tr>
<td>köpa</td>
<td>köper</td>
<td>köpte</td>
<td>köpt</td>
<td>köpt</td>
</tr>
<tr>
<td>trycka</td>
<td>trycker</td>
<td>tryckte</td>
<td>tryckt</td>
<td>tryckt</td>
</tr>
</tbody>
</table>

The following patterns vary slightly from the main paradigm:

1 Stem in -vowel + t. Doubling of final consonant in supine and past participle:

möta  möter  mötte  mött  mött  meet

Like möta: byta (exchange), mäta (measure), sköta (look after).

2 Stem in -consonant + t. Add only -e in past tense, no ending in supine and past participle:

gifta  gifter  gifte  gift®  gift®  marry

Like gifta: mista (lose), lyfta (lift), smälta (melt), fästa (attach).

7.2.4 Irregular verbs of the second conjugation

Irregular forms are marked *. Forms preceded by + exist only in compounds, e.g. medhavd mat, food brought along.
7.2.5 Third conjugation

<table>
<thead>
<tr>
<th>Infinitive</th>
<th>Present</th>
<th>Past</th>
<th>Supine</th>
<th>Past participle</th>
</tr>
</thead>
<tbody>
<tr>
<td>sy</td>
<td>syr</td>
<td>sydde</td>
<td>sytt</td>
<td>sydd</td>
</tr>
<tr>
<td>bo</td>
<td>bor</td>
<td>bodde</td>
<td>bott</td>
<td>+bodd</td>
</tr>
</tbody>
</table>

Includes: most verbs with stems ending in a long stressed vowel other than -a.
The stem vowel is shortened before the past tense ending in -dde and supine ending in -tt. This is a small and non-productive group. Vowels involved are:

- e  ske (occur), bete (behave)
- o  tro (believe), ro (row), bero (depend)
- y  bry (care), fly (flee), avsky (hate), gry (dawn)
- ö  strö (strew)
- ä  klä (dress)
- å  nå (reach)

Note: Several verbs of this group possess longer forms which are now formal or archaic:

<table>
<thead>
<tr>
<th>Infinitive</th>
<th>Present</th>
</tr>
</thead>
<tbody>
<tr>
<td>klä</td>
<td>(klåda) klär (klåder)</td>
</tr>
<tr>
<td>bre</td>
<td>(breda) brer (breder)</td>
</tr>
<tr>
<td>spä</td>
<td>(spåda) spär (spåder)</td>
</tr>
<tr>
<td>trä</td>
<td>(tråda) trär (tråder)</td>
</tr>
</tbody>
</table>

7.2.6 Irregular verbs of the third conjugation

Irregular forms are marked *. Forms preceded by + exist only in compounds, e.g. nedgångna skor, down-at-heel shoes.

<table>
<thead>
<tr>
<th>Infinitive</th>
<th>Present</th>
<th>Past</th>
<th>Supine</th>
<th>Past participle</th>
</tr>
</thead>
<tbody>
<tr>
<td>be</td>
<td>ber</td>
<td>bad*</td>
<td>bett</td>
<td>+bedd ask</td>
</tr>
<tr>
<td>dö</td>
<td>dör</td>
<td>dog*</td>
<td>dött</td>
<td>– die</td>
</tr>
<tr>
<td>få</td>
<td>får</td>
<td>fick*</td>
<td>fatt</td>
<td>– get</td>
</tr>
<tr>
<td>ge</td>
<td>ger</td>
<td>gav*</td>
<td>gett/givit</td>
<td>given give</td>
</tr>
<tr>
<td>gå</td>
<td>går</td>
<td>gick*</td>
<td>gått</td>
<td>+gången walk, go</td>
</tr>
<tr>
<td>le</td>
<td>ler</td>
<td>log*</td>
<td>lett</td>
<td>– smile</td>
</tr>
<tr>
<td>se</td>
<td>ser</td>
<td>såg*</td>
<td>sett</td>
<td>sedd see</td>
</tr>
<tr>
<td>stå</td>
<td>står</td>
<td>stod*</td>
<td>stått</td>
<td>stådd stand</td>
</tr>
</tbody>
</table>

Note: Two verbs of this group possess longer forms which are now formal or archaic:

<table>
<thead>
<tr>
<th>Infinitive</th>
<th>Present</th>
</tr>
</thead>
<tbody>
<tr>
<td>ge</td>
<td>(giva)</td>
</tr>
<tr>
<td>be</td>
<td>(bedja)</td>
</tr>
</tbody>
</table>
### Fourth conjugation: introduction

<table>
<thead>
<tr>
<th>Infinitive</th>
<th>Present</th>
<th>Past</th>
<th>Supine</th>
<th>Past participle</th>
</tr>
</thead>
<tbody>
<tr>
<td>-a</td>
<td>+er</td>
<td>Vowel change</td>
<td>Vowel change +it</td>
<td></td>
</tr>
<tr>
<td>dricka</td>
<td>dricker</td>
<td>drack</td>
<td>druckit</td>
<td>drucken</td>
</tr>
</tbody>
</table>

This conjugation includes only strong verbs, i.e. those whose past tense is formed not by adding an ending but by changing the stem vowel. This vowel change often applies also to the supine:

- flyga
- flyger
- flög
- flugit
- flugen
- fly

Strong verbs are best learned individually, but many follow the same vowel change sequence or gradation series. The vowel is often the same in the infinitive/present and supine/past participle, and forms are largely predictable.

**Notes:**

1 Several strong verbs in this group possess longer forms which are now formal or archaic:

<table>
<thead>
<tr>
<th>Infinitive</th>
<th>Present</th>
</tr>
</thead>
<tbody>
<tr>
<td>dra</td>

<td>(bliva)</td>
</tr>
<tr>
<td>blir</td>
<td>(bliver)</td>
</tr>
</tbody>
</table>

2 The past tense of strong verbs until the early 1900s possessed a separate plural form in written Swedish which often had a different stem vowel from the singular. These forms (given in brackets) are now archaic:

- blev (blevo), bjöd (bjödo), fann (funno), bar (buro), bad (bådo), var (voro)
## Fourth conjugation: gradation series i – e – i

### 7.3 Participles and supine

#### 7.3.1 Supine and past participle forms

<table>
<thead>
<tr>
<th>Conj.</th>
<th>Supine</th>
<th>Past participle</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Non-neuter</td>
<td>Neuter</td>
</tr>
<tr>
<td>I</td>
<td>älskat</td>
<td>älskad</td>
</tr>
<tr>
<td>IIa</td>
<td>böjt</td>
<td>böjd</td>
</tr>
<tr>
<td>IIb</td>
<td>köpt</td>
<td>köpt</td>
</tr>
<tr>
<td>III</td>

<td>sydd</td>
</tr>
<tr>
<td>IV</td>
<td>bitit</td>
<td>biten</td>
</tr>
<tr>
<td></td>
<td>bjudit</td>
<td>bjuden</td>
</tr>
</tbody>
</table>

**Notes:**
1. The supine is the same as the neuter form of the past participle in conjugations I, II, III.
2. In conjugation IV the supine ends in -it and the neuter past participle in -et.
3. Even in the non-neuter form IIb verbs have a past participle in -t.
7.3.2 Use of the supine and past participle

1 The supine is used with har/hade to form the perfect and pluperfect tenses respectively. No other verbs are used before the supine. It does not inflect.

Olle har tvättat bilen. Olle has washed the car.

Han hade tvättat den innan det började regna. He had washed it before it began to rain.

2 The past participle is used as an adjective and inflects as follows (see also 4.2 ff, 7.3.1):

<table>
<thead>
<tr>
<th></th>
<th>Indefinite attributive</th>
<th>Definite attributive</th>
</tr>
</thead>
<tbody>
<tr>

<td></td>
</tr>
<tr>
<td></td>
<td>den nytvättade bilen</td>
<td></td>
</tr>
<tr>
<td></td>
<td>det nymåla huset</td>
<td></td>
</tr>
</tbody>
</table>

Note: The past participle is also used with forms of vara or bli to construct one type of passive. See 7.5.17.
7.3.3 Present participle

Form

Verbs with stem ending in:
- a consonant or -a (Conj. I, II, IV):
  Present participle consists of: stem + (a)nde:
  ropande, ringande, skrivande
- a long vowel
  (Conj. III and many irregular verbs):
  Present participle consists of: stem + ende:
  troende, stående

Use

1. Present participles are only rarely used in Swedish like the English ‘-ing’ forms, notably after the verbs komma, gå, bli and verbs of motion:
   - **De kom springande.** They came running.
   - **Han blev sittande/liggande.** He remained sitting/lying.
   - **Sjungande Internationalen marscherade studenterna genom gatorna.**
     Singing the Internationale the students marched through the streets.

2. Normally the present participle is used in one of the following ways:
   - (a) An adjective: en heltäckande matta, en genomgripande förändring
   - (b) A noun: ett erbjudande, ett påstående, en studerande
   - (c) An adverb: Han var påfallande lat. Vädret var övervägande mulet.
   - (d) A preposition: Angående/Beträffande/Rörande det här fallet . . .

7.4 Translating verbs

7.4.1 Some problems in translating English verbs

These notes isolate only very common problems. They are not dictionary definitions.

Arrive/leave

1. arrive [of people] anlända, komma

   The students arrive today. **Studenterna kommer idag.**
2 arrive [of trains, boats, planes, etc.] ankomma

The plane gets in at eight (o’clock).

Flygplanet ankommer klockan åtta.

3 leave [intransitive] avgå, resa, åka, gå

They left early.

De gick tidigt.

4 leave [transitive] lämna

They left their car in the car park.

De lämnade bilen i parkeringen.

Ask

1 enquire fråga

We asked him what he was called.

Vi frågade honom vad han hette.

2 ask [someone to do something] be

We asked him to come.

Vi bad honom komma.

3 ask [questions] ställa

The police asked us a lot of questions.

Polisen ställde en massa frågor.

Change

1 alter ändra, förändra

The law has changed recently.

Lagen ändrades nyligen.

2 change one’s mind ändra sig

He changed his mind several times.

Han ändrade sig flera gånger.

3 exchange [something for something else: e.g. clothes] byta

He changed trains at Hallsberg.

Han bytte tåg i Hallsberg.
4 change gear, change money växla
   The driver changed down.    Föraren växlade ner.

Drive
1 drive a vehicle [i.e. sit behind the wheel] köra
   Olle drives a bus.    Olle kör buss.

2 travel [i.e. be driven] åka
   We drove to Norway this summer.    Vi åkte till Norge i sommar.

3 provide the power for something driva
   What is it that drives him on?    Vad är det som driver honom?

Feel
1 feel [transitive] känna
   Suddenly he felt the pain.    Plötsligt kände han smärtan.

2 feel [intransitive] känna sig
   He felt tired.    Han kände sig trött.

3 feel [i.e. ‘is experienced as’: deponent] känna
   It feels cold.    Det känns kallt.

Go
1 go by vehicle åka, resa, fara
   I am going to America.    Jag reser till Amerika.

2 go [generally; esp. walk, leave] gå
   I really must go.    Jag måste verkligen gå.
Grow
1  grow [intransitive] växa
   Rice grows in China.   Ris växer i Kina.
2  grow [transitive] odla
   People grow rice in China.   Folk odlar ris i Kina.
3  increase in size öka
   The number is growing all the time.   Antalet ökar ständigt.

Know
1  know [facts] veta
   Do you know what he is called?   Vet du vad han heter?
2  know [people] känna
   Do you know him?   Känner du honom?
3  know [languages, specialisms] kunna
   Do you know French?   Kan du franska?

Live
1  dwell, reside bo
   He lives in Stockholm.   Han bor i Stockholm.
2  be alive leva
   Linné lived in the 18th century.   Linné levde på 1700-talet.

Put
1  place horizontally lägga
   Put the book on the table!   Lägg boken på bordet!
2  place upright ställa
   Put the bottle on the table!   Ställ flaskan på bordet!
3  fix sätta
   Put the curtains up!  Sätt upp gardinerna!

4  insert into stoppa
   Don’t put your hands in your pockets!  Stoppa inte händerna i fickorna!

See
1  see se
   Can you see the lighthouse from here?  Kan du se fyrtornet härifrån?

2  meet träffa
   There’s a Mr Smith to see you.  En herr Smith vill träffa dig.

Stop
1  movement stanna
   She stopped the car.  Hon stannade bilen.

2  cease doing sluta
   He stopped talking.  Han slutade tala.

Think
1  hold an opinion tycka
   I think it’s a boring film.  Jag tycker att det är en tråkig film.

2  ponder tänka
   She sat thinking about it.  Hon satt och tänkte på det.

3  intend tänka
   He is thinking of buying a car.  Jag tänker köpa en bil.
4 believe tro

I think it might rain.  
Jag tror att det kommer att regna.

Want

1 want (to do) vilja

I want to go home  
Jag vill gå hem.

2 want (to have) vilja ha

I want a new car.  
Jag vill ha en ny bil.

7.4.2 Translating the English verb ‘to be’

No fewer than five Swedish verbs other than vara are used to translate different senses of the English verb ‘to be’.

In order to indicate location three verbs are often used in preference to vara, namely ligga (main meaning = lie), sitta (main meaning = sit) andstå (main meaning = stand).

1 ligga

(a) Used of towns, buildings and places:

Sverige ligger i Skandinavien.  
Sweden is in Scandinavia.

Staden ligger vid en liten sjö.  
The town is/lies by a little lake.

I centrum ligger många banker.  
In the centre there are many banks.

(b) Used of objects which lie horizontally:

Var ska tidningen ligga?  
Where should the newspaper be/go?

Kläderna låg utströdda på golvet.  
The clothes lay strewn across the floor.

(c) Notice also:

Hans son låg vid universitetet.  
His son was at university.

Jag låg och läste. ( = Jag läste)  
I was (lay) reading.
2 sitta
(a) Used of objects that are fixed in position:

Tavlorna sitter snett. The pictures are crooked.
Sitter nyckeln i låset? Is the key in the lock?
Muttern sitter fast. The nut is stuck.
Dina glasögon sitter på näsan. Your glasses are on your nose.

(b) Notice also:

Olle sitter i fängelse/i sammanträde/i en kommitté. Olle is in prison/at a meeting/on a committee.

Jag satt och drack te. I was/sat drinking tea.

3 stå
(a) Used of objects that stand vertically:

Var ska skåpet stå? Where should the cupboard stand?
Bordet står i hörnet. The table is/stands in the corner.
Står inte boken på hyllan? Isn’t the book on the shelf?

(b) = be (written):

Detta står på sidan 10 i boken. That is on page 10 of the book.

4 To indicate transition (change of state) or existence, two verbs are used in preference to vara, namely bli (indicating transition) and finns (indicating existence):

(a) bli (transition)

Vad tänker du bli när du har tagit din examen? What do you intend to be when you have graduated?

Han blir sju år idag. He will be seven today.

Han blev förvånad över att höra nyheten. He was surprised to hear the news.

Bli inte arg! Don’t get angry!

Vad blev resultatet? What was the result?
Det finns många sjöar i Sverige.
There are a lot of lakes in Sweden.

I Uppsala finns det en domkyrka.
In Uppsala there is a cathedral.

### 7.5 The use of the infinitive and different verbal constructions

#### 7.5.1 Infinitive – verbal use

1. In two-verb constructions after the modal auxiliaries kan, ska, vill, måste, etc. (7.5.10–7.5.11):

   - Han kan komma ikväll. He can come tonight.
   - Måste du göra det? Do you have to do that?
   - Får jag följa med? May I come along?
   - Ska du åka bort över jul? Are you going away over Christmas?
   - Vill du åka bort? Do you want to go away?

2. In two-verb constructions after modal equivalents:

   - De brukar åka bort. They usually go away.
   - Jag hoppas kunna åka. I hope to be able to go away.
   - Hon tänker inte gifta sig. She doesn’t intend to get married.
   - Det verkar vara sant. It appears to be true.

Modal equivalents include:

<table>
<thead>

</tr>
</tbody>
</table>
lova promise (to)  våga dare to
lyckas succeed in  vägra refuse to
låtsas pretend to  ämna intend to
orka manage to  önska wish to

Notes:
1 After the following verbs att is optional: börjar (att), begin; försöker (att), try; slutar (att), stop
2 In spoken Swedish and informal language there is a tendency to omit att after kommer (cf. 7.5.9):
   Han kommer inte vinna i år.  He will not win this year.
3 In object + infinitive constructions, often with the verbs se (see), höra (hear), låta (allow, let), tillåta (permit), anse (consider):
   Vi såg honom göra det.  We saw him do it.
   Jag hörde henne sjunga.  I heard her sing.
   Han lät kaffet kallna.  He allowed the coffee to cool.
4 In reflexive object + infinitive constructions, often with the verbs säga sig (say), påstå sig (claim), förklara sig (declare), tro sig (consider), anse sig (consider):
   Hon säger sig vara lycklig.  She says that she is happy.

7.5.2 Infinitive – nominal use

Infinitive phrases (att + infinitive) often function as if they were noun phrases:

1 As the subject:

   Att bada i havet är skönt.
   Swimming in the sea is wonderful.

   Det är skönt att bada i havet.
   It is wonderful to swim in the sea. (see 12.7.7)

Note that the predicative adjective is inflected as if it referred to a neuter singular noun and that det is often found as a formal anticipatory subject.
2 As the object:

**Hon älskar att köra bil.**  She loves driving/to drive.

3 After a preposition or a stressed verb particle:

**Han gick utan att säga någonting.**  He left without saying anything.

**Jag tycker om att läsa rysare.**  I like reading thrillers.

**Du måste tänka på att byta jobb.**  You must think of changing jobs.

Note that in expressions indicating an intention för att is used:

**Han kom hit för att vila sig.**  He came here (in order) to rest.

4 When qualifying a noun or pronoun:

**Konsten att skriva.**  The art of writing.

**Jag har ingenting att säga.**  I have nothing to say.

---

### 7.5.3 Use of the infinitive in English and Swedish

1 English infinitive = Swedish infinitive. The use of the infinitive in the two languages is often identical, notably in two-verb constructions (see 7.5.1, 7.5.4), adjectival constructions and in certain object and infinitive constructions.

<table>
<thead>
<tr>
<th>English</th>
<th>Swedish</th>
</tr>
</thead>
<tbody>
<tr>
<td>You really must hurry.</td>
<td>Ni måste verkligen skynda er.</td>
</tr>
<tr>
<td>It’s not easy to do that.</td>
<td>Det är inte lätt att göra det.</td>
</tr>
<tr>
<td>They saw me come back.</td>
<td>De såg mig komma tillbaka.</td>
</tr>
</tbody>
</table>

2 However, Swedish often has a full clause when English has object + infinitive after verbs like ‘want’ or ‘wish’ (NB: att is a conjunction here), after ‘wait/long for’, ‘count/rely on’, and after an interrogative:

- **What do you want me to do?**  **Vad vill du att jag skall göra?**
- **They waited for the rain to stop.**  **De väntade på att regnet skulle upphöra.**
- **They don’t know what to do.**  **De vet inte vad de ska göra.**
Translating ‘-ing’ forms

1. For the English continuous (or progressive) tense see 7.5.5 (3).

2. English infinitive or gerund (‘-ing’ form) = Swedish infinitive (see also 7.5.1 f):

   He began to write/writing.        Han började skriva.
   It’s no use trying.              Det är inte värt att försöka.
   He left without saying goodbye.  Han gick utan att säga adjö.

3. English gerund (‘-ing’ form) = Swedish full clause:

   He admits having stolen the car.  Han medger att han har stulit bilen.
   We thanked him for coming.       Vi tackade honom för att han kom.

Present tense

1. The present tense is used much as in English. It has five main uses:

   (a) Present action:

      Jag sitter hemma nu och läser tidningen.  
      I’m sitting at home reading the paper.

   (b) Universal action:

      Jorden går runt solen.  The Earth goes round the Sun.

   (c) Repeated action:

      Lektionerna börjar klockan 9.  Lessons start at 9 o’clock.

   (d) Future action:

      Om en vecka reser jag bort. (See also 7.5.9.)  
      In a week’s time I’m going away.

   (e) Historic present (to create an illusion of present):

      27 november bryter Strindberg upp från Klam och reser över Berlin och Danmark hem.  
      On 27 November Strindberg leaves Klam and travels home via Berlin and Denmark.
2 Notice the following minor difference of usage:

Present in Swedish = past in English when an action is completed in the past but a tangible result remains:

**När är du född?** When were you born?

**Jag är född 1951.** I was born in 1951.

(cf. **När var Napoleon född?** – when a person is dead)

**Slottet är byggt på 1300-talet.**
The castle was built in the 14th century.

3 The English continuous (or progressive) tense with forms in ‘-ing’ corresponds in Swedish to:

(a) Simple present tense

I am sitting in my study. **Jag sitter på arbetsrummet.**

I am sitting reading. **Jag sitter och läser.**

(b) **Håller på att** + infinitive, which is used to stress the continuity of an action:

He is (busy) painting the bathroom.

**Han håller på att måla badrummet.**

I’m (in the process of) learning Greek.

**Jag håller på att lära mig grekiska.**

7.5.6 *Past tense*

Sometimes known as the imperfect or preterite tense, the past tense in Swedish is used much as in English, namely to express an action completed at a point of time in the past.

1 The past tense is often used in conjunction with a time marker, often an adverb:

**I fjol/Då reste vi till Grekland.**

Last year/Then we went to Greece.

2 The past tense may express a repeated action:

**Som liten skrek han ofta.**

As a small child he yelled a lot.
3 The past tense may inject a note of politeness or caution into a demand or intention, especially with the modal auxiliary (see 7.5.11):

- **Jag skulle vilja ha en sådan, tack.** I would like one of those, please.
- **Kunde du möjligen hjälpa mig?** Could you possibly help me?

(Cf. **Jag vill ha . . .** I want . . .)

(Cf. **Kan du . . .** Can you . . .)

4 The past tense may possess a modal sense (see 7.5.11):

- **Om jag hade tid skulle jag skriva en bok.** If I had time I would write a book.

5 Swedish past tense = English present tense in exclamations and on first impressions:

- **Det var snällt av dig att komma.** It is kind of you to come.
- **Detta var verkligen gott!** This is really good!

### 7.5.7 Perfect tense

The perfect tense is formed by using *har* with the supine (see 7.3.2). The verb *har* is often omitted in the subordinate clause in written Swedish:

- **Då jag inte (har) fått svar på mitt brev, skriver jag igen.**
  As I have not received a reply to my letter, I am writing again.

The perfect tense in Swedish is, as in English, used to indicate a link between past and present, the relevance of a completed action in the past to a present situation:

- **Vi har alltid rest till Spanien förr, men nu föredrar vi Grekland.**
  We have always gone to Spain before, but now we prefer Greece.

The tense indicates an indeterminate length of time or point in time but the point of reference is usually the present.

1 Time markers are used to indicate present time:

- **Nu har jag avslutat boken.**
  Now I have finished the book.
2 As in English the perfect may indicate that an action has taken place and is still taking place:

De har varit gifta i många år.
They have been married for many years.

3 Unlike English the perfect may express future:

Om en månad har vi glömt/kommer vi att ha glömt allting.
In a month we will have forgotten everything.

4 Perfect in Swedish = past in English, when the present result is emphasized rather than the action in the past:

Vem har skrivit Röda rummet? Who wrote ‘The Red Room’?
Var har du lärt dig svenska? Where did you learn Swedish?
Det har jag aldrig tänkt på. I never thought of that.

7.5.8 Pluperfect tense

The pluperfect tense is formed by using hade with the supine (see 7.3.2). The verb hade is often omitted in the subordinate clause in written Swedish:

Om jag inte (hade) hittat boken vet jag inte vad jag hade gjort.
If I hadn’t found the book I don’t know what I would have done.

The pluperfect tense is used much as in English. It expresses an action that took place before an action expressed by the past tense:

Innan han kom hit hade han köpt blommor.
Before he came here he had bought some flowers.

Other uses:
1 The pluperfect tense may express the result of a completed action:

Då hade vi redan gett upp allt hopp.
By then we had already given up all hope.

2 The pluperfect may indicate that an action had taken place and at some point in the past was still taking place:

De hade varit gifta i många år när de skildes.
They had been married for many years when they got divorced.
The pluperfect may have a modal sense (see 7.5.11) indicating an unreal situation:

Om det bara inte varit så halt på vägen hade jag klarat mig.
If only it hadn’t been so icy on the road I would have been all right.

7.5.9 **Future tense**

There are three ways of expressing the future in Swedish:

1 Present tense + time marker is the most common construction. *Bli* is often used instead of *är* in this instance:

- **Jag åker snart.** I’ll be going soon.
- **I år reser vi utomlands.** This year we are going abroad.
- **Det gör jag imorgon.** I’ll do that tomorrow.
- **Det blir ljus om en timme.** It will be light in an hour.

2 *Kommer att* + infinitive is objective and often (but not always) found with an impersonal subject:

- **Det kommer att regna ikväll.** It is going to rain tonight.
- **Ni kommer att bli förvånade.** You will be surprised.

Increasingly *att* is omitted:

- **Denna fråga kommer bli viktigare i framtiden.**
  This issue will become more important in the future.

3 *Ska* + infinitive often indicates intention and is often found with a personal subject:

- **Jag ska titta på TV ikväll.** I am going to watch TV tonight.
- **Ska du resa imorgon?** Are you leaving tomorrow?

Notice, however, that *ska* + infinitive may on occasion be objective when used with an impersonal subject:

- **Det ska bli auktion.** There is going to be an auction.
  ( = *Det blir/kommer att bli auktion.*)
7.5.10  Mood and modal verbs

The attitude of the speaker to the activity contained in the verb is expressed by one of the following:

Modal verb + main verb (infinitive, 7.5.1):

\[ \text{Vi måste springa.} \quad \text{We must run.} \]

Subjunctive (7.5.12):

\[ \text{Det vore roligt att träffa honom.} \quad \text{It would be nice to meet him.} \]

Imperative (7.5.13):

\[ \text{Gå ut härifrån!} \quad \text{Get out of here!} \]

Modal verbs have irregular forms:

<table>

7.5.11  Use of modal verbs

1  ska (or skall) (past tense skulle)

(a) Future: see 7.5.9.

(b) Conditional:

\[ \text{Om jag hade tid, skulle jag resa.} \quad \text{If I had time, I would go away.} \]
\[ \text{Jag skulle knappast tro det.} \quad \text{I would scarcely believe it.} \]
(c) Polite use (use past tense):

**Jag skulle vilja be dig om en tjänst.** I would like to ask a favour.

NB: Ska often translates English ‘will’. See 7.5.9.

2 vill (past tense ville)

(a) ‘want to, will’: *Never* simple future, cf. 7.5.9.

**Jag vill åka utomlands.** I want to go abroad.

(Cf. **Ska de åka utomlands?** Are they going abroad?)

But, note:

Will you give me a hand with this? **Vill du hjälpa mig med detta?**

(b) ‘would like’, ‘would have liked’ when followed in Swedish by ha:

**Vill du ha ett glas öl?** Would you like a glass of beer?

i.e. Will you have a glass of beer?

(c) Polite use (especially when past tense is chosen):

**Jag ville helst inte stanna.** I would rather not stay.

3 måste

(a) Compulsion – ‘must/have to’ in positive expressions:

**Jag måste tyvärr sluta nu.**

I have to finish now, unfortunately.

(b) Concession – ‘do not have/need to’ in negative expressions:

**Du måste ju inte äta så mycket!**

You don’t have/need to eat so much.

Cf. ‘Must not’ (prohibition) is expressed by **får inte**:

**Du får inte äta så mycket!**

You must not eat so much!

4 bör, borde

Suitability:

**Du borde få lite frisk luft.**

You ought to/should get some fresh air.
5 kan, kunde

(a) Possibility:

Vi kan följa med i kväll. We can/are able to come along tonight.

(b) Ability:

Eva kan köra bil. Eva can drive.

(c) Concession:

Det kan du ha rätt i. You may be right about that.

7.5.12 Subjunctive

The subjunctive is rare in Swedish now. It is generally found only in the form vore (from vara) and in some fixed expressions:

Det vore roligt om du kunde följa med. It would be nice if you could come.

Tack vare din hjälp . . . Thanks to your help . . .

Leve konungen! Long live the King!

Gud bevare oss! God help us!

7.5.13 Imperative

1 Form: The imperative is the same as the stem. This means that it is the same as the infinitive for conjugations I and III and the infinitive minus -a for conjugations II and IV. Imperatives are often followed by an exclamation mark in Swedish.

<table>
<thead>
<tr>
<th>Imperative</th>
<th>cf. Infinitive</th>
</tr>
</thead>
<tbody>
<tr>
<td>I  Arbeta hårdare!</td>
<td>Work harder!</td>
</tr>
<tr>
<td>IIa Släng bort den!</td>
<td>Throw it away!</td>
</tr>
<tr>
<td>IIb Hjälp mig!</td>
<td>Help me!</td>
</tr>
<tr>
<td>II irr. Gör något!</td>
<td>Do something!</td>
</tr>
<tr>
<td>III Tro mig eller inte!</td>
<td>Believe me or not!</td>
</tr>
<tr>
<td>III irr. Gå hem!</td>
<td>Go home!</td>
</tr>
<tr>
<td>IV Skriv ett brev!</td>
<td>Write a letter!</td>
</tr>
<tr>
<td>IV Var inte dum nu!</td>
<td>Don’t be stupid now!</td>
</tr>
</tbody>
</table>
2 Use: The imperative expresses a command, wish or piece of advice. Occasionally the subject is inserted in spoken Swedish, especially to underline a contrast:

Kom hit du, så ska vi dricka kaffe.
You come here and we'll have coffee.

Sitt kvar du, så städar jag.
You sit there and I'll tidy up.

Notice the difference in the position of the subject, when inserted, between Swedish and English:

Sitt kvar du . . .
You sit there . . .
FV S S FV

3 Notice the following polite uses of the imperative:

Var snäll och ge mig ett äpple! Please give me an apple.
Ge mig ett äpple är du snäll!
Var så god och stig in! Please come in!

7.5.14 Transitive, intransitive and reflexive verbs

1 Transitive verbs have a direct object (12.6.6):

John köpte huset. John bought the house.

Intransitive verbs do not have a direct object:

John sov gott. John slept well.

Ditransitive verbs have both an indirect and direct object (12.6.6):

John gav henne boken. John gave her the book.

Reflexive verbs are intransitive, as the subject does not direct the action outwards (cf. transitive) but at itself:

Han tvättade sig. He washed (himself).

2 Whereas Swedish makes firm distinctions between transitive and intransitive verbs, many English verbs may be either:

They burn the paper. De bränner pappret. (tr.)
The house burns down. Huset brinner ned. (itr.)
Mary left the letter. Mary lämnade brevet. (tr.)
Mary left early. Mary gick tidigt. (itr.)

Other pairs of transitive/intransitive verbs in Swedish are:

<table>
<thead>
<tr>
<th>Intransitive</th>
<th>Transitive</th>
</tr>
</thead>
<tbody>
<tr>
<td>sitta IV</td>
<td>sätta IIRR</td>
</tr>
<tr>
<td>ligga IV</td>
<td>lägga IIRR</td>
</tr>
<tr>
<td>sjunka IV</td>
<td>sänka IIB</td>
</tr>
<tr>
<td>spräcka IIB</td>
<td>spricka IV</td>
</tr>
<tr>
<td>falla IV</td>
<td>fälla IIA</td>
</tr>
<tr>
<td>kallna I</td>
<td>kyla IIA</td>
</tr>
<tr>
<td>vaka I</td>
<td>väcka IIB</td>
</tr>
<tr>
<td>vakna I</td>
<td></td>
</tr>
<tr>
<td>ryka IIB</td>
<td>röka IIB</td>
</tr>
<tr>
<td>tröttna I</td>
<td>trötta I</td>
</tr>
</tbody>
</table>

3 A sizeable group of ditransitive verbs (with two objects) includes: berätta, tell; visa, show; bjuda, offer; ge, give; lova, promise, låna, lend; räcka, hand, skicka, send, skänka, donate; säga, tell; sända, send

4 Many reflexive verbs in Swedish are not reflexive in English:

Vi ska tvätta/raka/kamma oss.
We shall wash/shave/comb our hair.

De gifte sig förra året.
They got married last year.

Per reste sig och sedan satte sig igen.
Per got up and then he sat down again.

Hon klädde sig i svart.
She dressed in black.

For reflexive pronouns see 5.1, 5.3.
Many reflexive verbs indicate movement:

- lägga sig  lie down
- förkyla sig  catch a cold
- röra sig  move
- lära sig  learn
- bege sig  go
- känna sig  feel
- vända sig  turn round
- förirra sig  get lost
- infinna sig  present oneself
- skynda sig  hurry up
- närmare sig  approach

### 7.5.15 s-forms

<table>
<thead>
<tr>
<th>Infinitive</th>
<th>Present</th>
<th>Past</th>
<th>Supine</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>bakas</td>
<td>bakades</td>
<td>bakats</td>
</tr>
<tr>
<td>IIa</td>
<td>böjas</td>
<td>böjs</td>
<td>böjdes</td>
</tr>
<tr>
<td>IIb</td>
<td>köpas</td>
<td>köps</td>
<td>köptes</td>
</tr>
<tr>
<td>IIb -stem in -s:</td>
<td>läsas</td>
<td>läses</td>
<td>lästes</td>
</tr>
<tr>
<td>III</td>
<td>sys</td>
<td>sys</td>
<td>syddes</td>
</tr>
<tr>
<td>IV</td>
<td>bjudas</td>
<td>bjuds</td>
<td>bjöds</td>
</tr>
</tbody>
</table>

In most cases the -s is simply added to the end of the active form, but notice especially how to form the present tense:

- bakar  + s → bakas  (i.e. delete present tense ending first)
- köper  + s → köps
- säljer  + s → säljs

Formal written Swedish retains the -e however:

- köper  + s → köpes
7.5.16 Uses of s-forms

1 Passive (see 7.5.17):
   
   **Huset målades.** The house was (being) painted.

2 Deponent: The deponent is active and intransitive, i.e. it has passive form but active meaning:
   
   **Jag hoppas att de lyckas.** I hope they succeed.
   **Vi trivs här.** We like it here.

Deponent verbs do not usually possess a form without -s. Deponents include:

- **minnas** IIa remember **kräkas** IIb vomit
- **finnas** IV be, exist **umgås** IV be friendly with
- **lätsas** I pretend **trängas** IIa push
- **synas** IIb appear **töras** IIa dare
- **tyckas** IIb seem **envisas** I persist
- **hoppas** I hope **trivas** IIa like it

3 Reciprocal: The reciprocal has a plural subject which both carries out an action and is the object of an action:

   **Vi träffas kl. 2. (= träffar varandra)**
   We will meet at 2 o’clock.

   **De kysstes bakom cykelstället.**
   They kissed behind the bicycle shed.

Other reciprocal verbs:

- **brottas** I wrestle **kramas** I hug (one another)
- **enas** I agree **ses** IV meet, rendezvous
- **följas åt** IIa accompany (one another) **skiljas åt** IIa part
- **hjälpas åt** IIb help (one another) **slåss** IV fight
- **höras** IIa be in touch (with one another) **talas vid** I talk over
Passive

Whereas active verbs often have a subject and an object, passive verbs have a subject and an agent:

Passive transformation:

Active  
Eva körde bilen.  
Eva drove the car.
S ---→ O

Passive  
Bilen kördes av Eva.  
The car was driven by Eva.
S ←-----AGENT

Many passive verbs have no agent, however:

Bilen kördes vårdslöst.  
The car was driven carelessly.

The reason is that the agent in many cases is unknown, unimportant or obvious from the context, and it is the action expressed by the verb or the object of that action (subject of the passive) which is the dominating idea:

Lunch serveras kl. 11.  
Lunch is served at 11 o’clock.

Han dödades i en bilolycka.  
He was killed in a car accident.

Mötet hålls i salen.  
The meeting is being held in the hall.

Passives with an agent are more common in impersonal written Swedish:

Skiftnyckeln uppfanns av en svensk.  
The adjustable spanner was invented by a Swede.

There are three ways of expressing the passive:

S-passive:  
Äpplena skalas.

Forms of bli + past participle:  
Äpplena blir skalade.

Forms of vara + past participle:  
Äpplena var skalade.

Forms with bli/vara are sometimes called ‘periphrastic forms’.

Use of passive forms

1. s-passive

This is by far the most common form, especially in written Swedish, and stresses the action of the verb, often indicating a repetition, command or instruction:
Frukost serveras kl. 9.
Breakfast is served at 9 o’clock.

Ordet uttalas med accent 1.
The word is pronounced with accent 1.

Felparkering straffas med böter.
Illegal parking is punishable by fine.

Öppnas här.
Open here. (E.g. on packages)

The s-passive construction often has no agent, and is often the equivalent of an active construction using man, de, någon or folk:

Nedrustning diskuteras. = Man diskuterar nedrustning.
Han anses vara frisk. = Man anser honom vara frisk.

2 bli-passive

This form stresses the action of the verb and often indicates an isolated occurrence. The bli-passive often has an agent.

Han blev påkörd av en bil.
He was run down by a car.

Vi blev avbrutna av servitrisen.
We were interrupted by the waitress.

Rekordet blev slaget av en svensk.
The record was beaten by a Swede.

Notice that blir (present tense) indicates future action (see 7.5.9):

Saken blir avgjord imorgon.
The matter will be decided tomorrow.

3 vara-passive

This form stresses a state, the result of an action, and the past participle is adjectival. It provides a static picture.

Himlen är täckt av moln. The sky is covered in cloud.
Han är bortrest för tillfället. He is away at present.
Huset är sålt. The house is/has been sold.
Väskan är stulen. The bag is/has been stolen.
4 Tense equivalents

Notice the following different ways of expressing the same idea:

<table>
<thead>
<tr>
<th>vara-passive</th>
<th>bli-passive/s-passive</th>
</tr>
</thead>
<tbody>
<tr>
<td>Present:</td>
<td>= Perfect:</td>
</tr>
<tr>
<td><strong>Middagen är förstörd.</strong></td>
<td>= <strong>Middagen har blivit förstörd/ har förstörts.</strong></td>
</tr>
<tr>
<td><strong>Vi är bjudna på fest.</strong></td>
<td>= <strong>Vi har blivit bjudna/ har bjudits på fest.</strong></td>
</tr>
<tr>
<td>Past:</td>
<td>= Pluperfect:</td>
</tr>
<tr>
<td><strong>Middagen var förstörd.</strong></td>
<td>= <strong>Middagen hade blivit förstörd/ hade förstörts.</strong></td>
</tr>
</tbody>
</table>

5 Verbs often found in the passive (given below in the tenses in which they frequently occur):

- **anses**, is considered; **betraktas**, is regarded; **byggdes**, was built; **diskuterades (diskuterats)**, was (has been) discussed; **dömdes**, was sentenced; **åtalas (åtalats)**, is (has been) charged; **grips**, has been arrested; **nämnas (nämnts)**, is (has been) named; **publiceras**, is punished; **rapporterars**, is reported; **uppges**, is stated; **sändes**, was sent; **stängdes**, was closed; **såldes**, was sold; **utsågs**, was appointed

6 Differences in use between Swedish and English:

(a) English passive = Swedish active:
   (i) ‘There’ + passive = Swedish active form:
   There was nothing to be done. = **Det var inget att göra.**
   (ii) ‘Be said to/reputed to’ = Swedish lär/ska:
   The food there is said to be good. = **Maten där lär vara god.**
   (iii) English passive = Swedish man + active:
   It is more difficult than is generally supposed. = **Det är svårare än man i allmänhet tror.**
(b) Swedish passive = English active:

(i) Det + passive (‘impersonal passive’) = ‘There is/was’ + gerund (i.e. ‘ing-’ form):

**Det dansades hela natten.**
There was dancing all night.

(ii) Some Swedish agentless passives = English intransitive verbs:

**Dörren öppnades.**
The door opened.

### 7.5.18 Compound verbs

Compound verbs are those prefixed by a particle.

In inseparable compounds the particle always remains attached:

**Han betalar räkningen.**
He pays the bill.

In separable compounds the particle may become separated from the verb:

**Värmen är avstängd.**
The heating is turned off.

**Han stängde av värmen.**
He turned off the heating.

1 *Inseparable* compounds include:

(a) Most verbs compounded with nouns, adjectives, other verbs and själv-:

    **hungerstrejka, godkänna, brännmärka, självdö**

(b) Verbs with the following prefixes:

    **Unstressed prefixes:**
    *betal, förklara*

    **Stressed prefixes:**
    *bistå, erhålla, föredra, missunna, närvara, oroa, samtycka, umgås, undkomma, vantrivas, välsigna*

2 *Separable* compounds include:

Many phrasal verbs with separable prefixes or particles. The particles, not the verbs, are always stressed:

**resa bort, frysa fast, gå förbi, ta ifrån, känna igen, gå igenom, slå ihjäl, räkna in, följa med, lägga ned, tycka om, falla omkull, slå sönder, stryka under, slå upp, dricka ur, dö ut, gå vilse**
These verbs are always compounded in the participial forms:

- **Han blev ihjälslagen.** He was killed.
- **Han är bortrest.** He has gone away.
- **ett igenkännande leende** a smile of recognition
- **en omtyckt rektor** a popular headteacher
- **en nedlagd fabrik** a closed factory

The same word may often be both a stressed particle and an unstressed preposition:

- **Han satte på tvn.** He put the TV on.
- **Han satte tvn på bordet.** He put the TV on the table.

3 Stylistic differences between separable and inseparable compound verbs:

Often the separated form is used in everyday language while the integral form is reserved for more formal written style.

- **Han lade ner böckerna på bordet.** He laid the books on the table.
- **Kungen nedlade en krans på graven.** The king laid a wreath on the grave.
- **Vi steg ner i gruvan.** We went down into the mine.
- **Kristus har nedstigit till dödsriket.** Christ has descended into Hell.
- **Hon lade fram hans pyjamas.** She laid out his pyjamas.
- **Hon framlade ett bra förslag.** She put forward a good proposal.

4 Semantic differences between separable and inseparable compound verbs:

Often the separated forms are concrete and the integral forms abstract in meaning. In some cases the semantic difference is so great as to warrant regarding the forms as two distinct verbs.

- **Jag bryter av grenen.** I break off the branch.
Jag avbryter samtalet. I interrupt the conversation.

Han strök under ordet. He underlined the word.

Han underströkt ordets betydelse. He emphasized the meaning of the word.

Lampan lyste upp rummet. The lamp lit up the room.

De upplyste mig om mitt misstag. They enlightened me as to my mistake.

5 Word order: (see also 12.6.7, 12.9.1 (8))

Notice that only a clausal adverbial (12.6.4, 12.6.7, 12.6.9) and/or a subject in inverted clauses may come between the verb and its separated particle, unlike English:

   Kasta inte ut den! Don’t throw it out!
   Kastade de inte ut den? Didn’t they throw it out?
Chapter 8
Adverbs

8.1 Forms of adverbs

1 Many adverbs derive from adjectives by adding the ending -t:

Hon var mycket vacker (adj.). She was very beautiful.
Hon sjöng mycket vackert (adv.). She sang very beautifully.

The adverb in -t is identical to the neuter form of the adjective in -t:

Huset var mycket vacker (adj.). The house was very beautiful.
Huset var vackert (adv.) målat.

2 Some adjectives ending in -lig form adverbs by adding -en or -tvis:

Han kommer möjlig en imorgon.
Naturligtvis talar han svenska. Naturally he speaks Swedish.

Notice that forms in -en, -tvis are often clausal adverbials (see 12.6.4), whilst forms in -t are other adverbials of manner (see 12.6.5):

Han är lyckligt gift. He is happily married.
Han är lyckligtvis gift. Happily/Fortunately he is married.

3 Other adverbs which are derivatives include those ending in:

-städes/-stans (location): annorstädes, någonstans elsewhere, somewhere
-ledes/-lunda (manner): således, annorlunda thus, differently
-sin (time): någonsin ever
-vart (direction): någonvart somewhere
4 Many common adverbs are not derivatives, and these include:

(a) Adverbs of time: aldrig (never), alltid (always), då (then), förr (before), genast (immediately), ibland (sometimes), igen (again), nu (now), ofta (often), strax (shortly)

(b) Adverbs of place: här/hit (here), där/dit (there), var/vart (where), hem (home), bort (away), fram (forward), in (in), ner (down) (for usage see 8.3.)

(c) Adverbs of manner: bra (well), fort (quickly), ganska (rather), precis (exactly)

(d) Modal adverbs: ju, nog, väl (for meanings and usage see 8.4(7)), inte (not)

(e) Conjunctional adverbs: alltså (therefore), också (also), så (so)

5 Negations (which are modal adverbs) and their equivalents include:

inte, icke and ej, not

Ej is usually only found in written language: ej upp, not up, (on escalators).

Icke (not inte) is usually found in compounds: en icke-kristen, a non-Christian.

Knappast, knappt, scarcely

Han sa knappast någonting. He scarcely said anything.

6 Compound adverbs are formed from an adverb + preposition (or adverb):

här (adv.) + ifrån (prep) → härifrån

Others include:

hemåt, norrut, hittills, häravter, därför, härmed, bortom, därvid

Other frequent compound adverbs are:

ännu, ändå, ibland, numera, omkring, häromdagen, nuförtiden
7 Comparative forms

Many adverbs compare like the adjectives from which they derive (see also 4.5.1 ff):

<table>
<thead>
<tr>
<th>Positive</th>

<td>närmare</td>
<td>närmast</td>
</tr>
</tbody>
</table>
8.2 Use of adverbs

1 Adverbs may qualify:

(a) A verb:  
\[\text{Han sprang fort.} \]  
He ran quickly.

(b) An adjective:  
\[\text{Sjön var otroligt vacker.} \]  
The lake was incredibly beautiful.

(c) An adverb:  
\[\text{Hon sjöng ovanligt vackert.} \]  
She sang unusually beautifully.

(d) A clause:  
\[\text{Det blir troligen regn ikväll.} \]  
It will probably rain tonight.

2 Amplifiers

(a) These are adverbs that qualify an adjective or another adverb, especially one denoting degree or kind. They include:

- mycket (very), helt (completely), alldeles (completely), ganska (quite), lagom (suitably), rätt (very), för (too), lite (a little), inte alls (not at all), bra (very)

\[\text{Det var en mycket intressant film.} \]  
It was a very interesting film.

\[\text{Det gick inte alls bra.} \]  
It didn’t go at all well.

(b) Mycket = ‘very’ when qualifying an adjective in the positive or an adverb:

\[\text{Han var mycket lång.} \]  
He was very tall.

\[\text{De gick mycket fort.} \]  
They walked very fast.

Mycket = ‘much, a lot’ when qualifying an adjective in the comparative or a verb:

\[\text{Han var mycket längre än sin bror.} \]  
He was much taller than his brother.

\[\text{Han sjöng mycket på den tiden.} \]  
He sang a lot in those days.

Cf. Väldigt mycket . . . = ‘very much . . .’

\[\text{Han är väldigt mycket rikare än alla sina bröder.} \]  
He is very much richer than all his brothers.
(c) Inte särskilt . . . = ‘not very . . .’

Han är inte särskilt rik. He is not very rich.

Cf. Inte mycket . . . = ‘not much . . .’

Han är inte mycket rikare än sin bror.
He isn’t much richer than his brother.

(d) Sometimes adverbs formed from adjectives (see 8.1) are used as amplifiers:

Det blev förskräckligt varmt. It became awfully hot.
Jag har hemskt bråttom. I am in a terrible hurry.
Vi såg en fantastiskt bra match. We saw a fantastically good match.

8.3 Adverbs indicating location and motion

Adverbs express this distinction in Swedish which is now no longer found in English. One form is found with verbs indicating location at a place, another with verbs indicating motion towards a place and a third with verbs indicating motion away from a place:

Han bor här. He lives here. Location
Han kom hit. He came here. Motion towards
Han gick härifrån. He left here. Motion away from

English used to have this distinction in ‘here/hither/hence’, ‘there/thither/thence’.

<table>
<thead>
<tr>
<th>Location</th>
<th>Motion towards</th>
<th>Motion away from</th>
</tr>
</thead>
<tbody>
<tr>
<td>Where?</td>
<td>Where to?</td>
<td>Where from?</td>
</tr>
<tr>
<td>var(?) where</td>
<td>vart(?) where (to)</td>
<td>varifrån(?) where from</td>
</tr>
<tr>
<td>här here</td>
<td>hit (to) here</td>
<td>härifrån from here</td>
</tr>
<tr>
<td>där there</td>
<td>dit (to) there</td>
<td>därifrån from there</td>
</tr>
<tr>
<td>inne in(side)</td>
<td>in in</td>
<td>inifrån from inside</td>
</tr>
<tr>
<td>ute out(side)</td>
<td>ut out</td>
<td>utifrån from outside</td>
</tr>
<tr>
<td>uppe up</td>
<td>upp up</td>
<td>uppifrån from above</td>
</tr>
<tr>
<td>nere down</td>
<td>ner down</td>
<td>nerifrån from below</td>
</tr>
<tr>
<td>hemma (at) home</td>
<td>hem (to) home</td>
<td>hemifrån from home</td>
</tr>
<tr>
<td>borta away</td>
<td>bort away</td>
<td>bortifrån from that direction</td>
</tr>
<tr>
<td>framme forward</td>
<td>fram forward</td>
<td>framifrån from the front</td>
</tr>
</tbody>
</table>
Notice the following idiomatic usages:

**Jag ringde dit igår.** I rang there yesterday.

**Vi långtar hem.** We long for home.

**Han bor tre trappor upp.** He lives on the third floor.

**Han satt längst bort.** He sat furthest away.

*Cf.* **När är vi framme?**

**När kommer vi fram?** When will we get there?

2 How to translate ‘where’:

<table>
<thead>
<tr>
<th>Location</th>
<th>Motion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interrogative</td>
<td><strong>var</strong></td>
</tr>
<tr>
<td>(V-word)</td>
<td><strong>Var är han?</strong></td>
</tr>
<tr>
<td></td>
<td>Where is he?</td>
</tr>
<tr>
<td>Relative</td>
<td><strong>där</strong></td>
</tr>
<tr>
<td></td>
<td>I know a café where we can eat.</td>
</tr>
</tbody>
</table>

The relative adverb **där/dit** follows a noun or noun phrase:

**Jag vet ett kafé där vi kan äta.**

But

**Jag vet var vi kan äta.**

It is generally possible to replace **där/dit** by **som** + preposition when it is used in this way:

**Jag vet ett kafé som vi kan äta på.**

**Jag vet ett kafé som vi kan gå till.**
8.4 Some difficult adverbs

1 Då/sedan

(a) As an adverb då = ‘then’, ‘at that moment/time’, ‘in that case’:

Det blixtrade. Då började han springa.
There was a flash of lightning. Then he began to run.

Är du vaken? Då bör du stiga upp.
Are you awake? Then you had better get up.

Note: Då can also be:

(i) a temporal conjunction = ‘when’ (see 11.2(2)):

Då vi kom hem åt vi frukost.
When we got home we ate breakfast.

(ii) a causal conjunction = ‘as’ (see 11.4(2)):

Då jag hade pengar köpte jag en bil.
As I had money I bought a car.

(b) As an adverb sedan = ‘then’, ‘after that’, ‘subsequently’:

Först klippte vi gräsmattan. Sedan rensade vi ogräs.
First we cut the lawn. Then we weeded.

Note: Sedan can also be:

(i) a temporal conjunction = ‘after’, ‘since’ (see 11.2(2)):

Sedan han for är hon inte sig lik.
Since he left she has not been herself.

(ii) a preposition = ‘since’:

Jag har känt honom sedan kriget.
I have known him since the war.

2 Därför/därför att

(a) Därför is an adverb = ‘for this reason’, ‘consequently’, ‘that is why’, ‘which is why’:

Det är varmt. Därför svettas jag.
It’s hot. That’s why I’m sweating.

(b) Därför att is a subordinating conjunction = ‘because’, ‘on account of’, ‘owing to’:

Varför svettas du? (Jag svettas) Därför att det är varmt.
Why are you sweating? (I’m sweating) Because it’s hot.
3 Eller hur?

Like French ‘n’est-ce pas?’, German ‘nicht wahr?’ this phrase concludes a sentence, corresponding to the English tag-question:

**Han har fått sina pengar, eller hur?**
He has got his money, hasn’t he?

**Han kommer hem idag, eller hur?**
He’s coming home today, isn’t he?

The phrase is rapidly being replaced by va? (derived from vad) as a tag question:

**Vi tittar på teve, va?**
We’ll watch TV, shall we?

4 Först

(a) = ‘first’ (in time expressions):

**Jag följer med, men först måste jag byta om.**
I’ll come, but first I have to change.

(b) = ‘not until, only’:

**Först igår fick jag veta det.**
It was only yesterday that I found out.

**Jag kom hem först igår.**
I didn’t get home until yesterday.

5 Gärna

(a) = ‘willingly’, ‘with pleasure’, ‘by all means’:

**Dricker du kaffe?**
Do you drink coffee?

**Ja, gärna.**
Yes, by all means.

(b) = ‘like to’:

**Han badar gärna.**
He likes to swim.

*Note:* Hellre and helst, the comparative and superlative forms of gärna, correspond to ‘prefer(s ) . . . to . . .’, ‘rather’ and ‘preferably’, ‘most of all’ respectively:

**Han dricker hellre öl än vin.**
He prefers beer to wine.

**Te eller kaffe? Hellre kaffe, tack.**
Tea or coffee? I’d rather have coffee, please.

**När vill du åka? Helst idag.**
When do you want to go? Today, preferably.

(c) = ‘certainly’:

**Han får gärna försöka.**
He can certainly try.
6 Långt/länge
(a) Långt = ‘far’ (distance):

**Hur långt är det till stan?** How far is it to town?

(b) Länge = ‘long’ (time):

**Hur länge har du bott i Sverige?** How long have you lived in Sweden?

Notice, however, that the adjective in time expressions like those below is always lång:

**Hur lång tid tar det?** How long will it take?

7 Ju, nog, väl, nämligen

As unstressed modal adverbs these words indicate the speaker’s attitude to the utterance. When stressed, however, nog = ‘enough’, väl = ‘well’, ‘rather’.

(a) Ju = ‘you know’, ‘of course’, ‘to be sure’, ‘it is true’. You expect the listener to agree.

**Det har jag ju aldrig sagt.** I’ve never said that, you know.

**Du har ju varit här förr.** You’ve been here before, of course.

**Han kommer nog imorgon.** He’ll be here tomorrow, I expect.

**Hon klarar det nog.** She’ll manage it all right.

(c) Väl = ‘surely’, ‘I hope’, ‘I suppose’. The speaker hopes the listener will agree.

**Du är väl inte sjuk?** You are not ill, surely?

**Du kommer väl?** You’ll be coming, I hope?

(d) Nämligen = ‘you understand’, ‘you see’. New information is provided.

**Du måste komma idag. Imorgon är jag nämligen i Uppsala.** You’ll have to come today. Tomorrow, you see, I’ll be in Uppsala.

Cf. **Du måste komma idag. Imorgon är jag ju i Uppsala.**

You’ll have to come today. Tomorrow, as you know, I’ll be in Uppsala.
8 Redan

(a) = ‘already’:

Är du färdig redan?
Have you finished already?

(b) = ‘even’:

Redan en ytlig undersökning visade detta.
Even a superficial investigation revealed this.

(c) = ‘as early as’:

Redan på 1600-talet var Sverige en stormakt.
As early as in the 17th century Sweden was a great power.
Interjections

Interjections are not inflected. They almost invariably come first in the sentence or clause, and are usually marked off by a comma.

1  

Ja, nej, jo, etc.

(a) In answer to a positive yes/no question ja/nej is used:

Tänker du gå på bio? Ja/Nej.
Are you thinking of going to the cinema? Yes/No.

Strong agreement is indicated by javisst or jovisst; surprise or disinterest by jaså!

(b) If the question assumes a negative answer and the answer stresses a positive response, then jo is used:

Du tänker väl inte gå på bio? Jo!
You’re not thinking of going to the cinema, are you? Yes, I am!

2  

Expressions of feeling, exclamations

<table>
<thead>
<tr>
<th>Pain:</th>
<th>aj, o, puh</th>
<th>Aj, vad det gör ont!</th>
<th>Ow, that hurts!</th>
</tr>
</thead>
<tbody>
<tr>
<td>Surprise:</td>
<td>oj, o, å</td>
<td>Oj, vad vackert!</td>
<td>Oh, how beautiful!</td>
</tr>
<tr>
<td>Disgust:</td>
<td>usch, fy, hu</td>
<td>Usch, vad hemskt!</td>
<td>Ugh, how horrible!</td>
</tr>
</tbody>
</table>

3  

Commands

Kusch, Hut = Down! (to dogs), Ptro = Whoah (to horses), Hyssch = Shhh (to children), Giv akt! = Attention! (to soldiers)
4 Imitations

Sounds made by animals:

vov vov (woof), miau (miaou), bää (baa)

Sounds made by objects:

pang (bang), plask (splash), bing-bång (ding-dong)

5 Greetings, exhortations

(a) Meeting, parting:

Goddag! (How do you do?), Välkommen! (plural: Välkomna!) (Welcome), Adjö! (formal: Goodbye), Hej då! (Bye bye), Vi ses! (Be seeing you), Hej! (Hallo), Hejsan! (Hi there!)

(b) Good wishes, thanks:

Skål! (Cheers), Gott nytt år! (Happy New Year), Varsågod! (plural: Varsågoda!) (Here you are/You're welcome), Tack (Thanks/Cheers), Tack så mycket! (Thank you), Ha den ära(n)! (Many happy returns), Gratulerar/Grattis! (Congratulations), Prosit! (Bless you)

(c) Apologies, etc.:

Förlåt! (Sorry), Ursäkta! (Excuse me/Pardon me), För all del!/Ingen fara (By all means/Don’t mention it/No problem), Hursa!/Vasa!/Förlåt (Pardon/Could you repeat that?)

6 Expletives:

10.1 Prepositions – introduction

1 Prepositions are indeclinable words or set phrases, generally unstressed in speech except when standing after a verb as a stressed particle (7.5.18, 12.6.7).

2 Swedish prepositions have the following prepositional complements:
   (a) a noun:

   **Han cyklar till staden.** He’s cycling to town.

   (b) a pronoun in the object form:

   **Vi pratade med honom.** We spoke to him.

   (c) an infinitive phrase:

   **Han gick utan att vänta.** He left without waiting.

   (d) a subordinate clause:

   **Hon var säker på att hon hade rätt.**
   She was sure that she was right.

   (e) a prepositional or adverbial phrase:

   **Vad gör vi efter idag?**
   What are we going to do after today?

   **Det håller jag för helt omöjligt.**
   I consider that totally impossible.
3 Prepositions may adopt three different positions relative to the complement:

(a) Before the complement (the majority of Swedish prepositions do this):

- bakom huset behind the house
- framför tvn in front of the TV
- hos Olssons at the Olssons’
- i augusti in August

(b) After the complement (few prepositions, called ‘postpositions’, do this; those that do are usually stressed):

- året om (all) year round
- jorden runt round the world
- oss emellan between you and me

(c) Bracketing the complement (called ‘circumpositions’):

- för tio år sedan ten years ago
- sedan ett år tillbaka for the past year
- för din skull for your sake

4 Notice that in Swedish the preposition is correctly placed as the last element in a clause:

(a) in V-questions (see 5.11):

Vad tänker du på? What are you thinking about?

(b) in relative clauses (see 12.8.1(2)):

Du är den (som) jag drömer om. You are the one of whom I dream.

(c) when the prepositional complement occupies the topic position (12.7.1):

Honom kan man inte lita på. He’s not to be relied on.

(d) in infinitive phrases:

Du är omöjlig att arbeta med. You’re impossible to work with.
(e) in exclamations:

**Vilket stort hus du bor i!** What a big house you live in!

5 Some prepositions consist of adverb + preposition:

**Han kom in i huset.** He came into the house.

**De satt framför brasan.** They sat in front of the fire.

### 10.2 The most common Swedish prepositions

Here is a list of frequent Swedish prepositions. Examples of common ways in which the ten most frequent prepositions (av, från, för, i, med, om, på, till, under, vid) are used are given in sections 10.2.1–10.2.10. Many of the remaining Swedish prepositions are used in much the same way as their English equivalents.

<table>
<thead>

<td>to(wards), for</td>
</tr>
<tr>
<td>över</td>
<td>over, above, across</td>
</tr>
</tbody>
</table>
Notes:

1 efter

(a) Efter corresponds to English ‘for’ after a number of verbs, to suggest the object of a desire or search:

- Jag längtar efter engelsk mat. I long for English food.
- Vi letar/ringer efter dem. We're looking/phoning for them.

(b) Stäng dörren efter dig! Close the door behind you!

2 För . . . sedan brackets the complement:

- Detta hände för 10 år sedan. This happened ten years ago.

3 Genom is used with the infinitive to render the English ‘by’ + ‘ing’ form in expressions such as:

- Han vann genom att fuska. He won by cheating.

4 Hos corresponds to French ‘chez’, German ‘bei’ (= at the place of work/home of):

- Vi bor hos Linds. We're staying with the Linds.
- Han är hos tandläkaren. He's at the dentist's.

Note also:

- Det står hos Freud. That's in Freud’s works.

5 Inför suggests English ‘before’, often in a figurative sense:

- Han stod inför domaren. He stood before the judge.
- Han ställs inför svårigheter. He's faced with difficulties.
- Jag var orolig inför resan. I was uneasy before (= at the prospect of) the journey.

6 Åt

(a) renders ‘to(wards)’ in set expressions of place:

- Åt vilket håll ska jag köra? Which direction shall I drive in?
- Kör åt vänster/åt norr. Drive to the left/north!

(b) may indicate an indirect object and is then rendered in English by ‘for’:

- Köp en åt mig också! Buy one for me too!

7 Över

(a) corresponds also to English ‘past’ in clock-time expressions:

- Klockan är fem minuter över två. It’s five past two.

(b) Note also:

- en karta över Sverige a map of Sweden
- en lista över deltagarna a list of participants
10.2.1 Av

Av basically suggests origin or source, although från is more common with origins that are actual locations. Av is also used to indicate the passive agent (see 7.5.17, 12.6.8, 12.7.6).

<table>
<thead>
<tr>
<th>Agent</th>
<th>Material</th>
<th>Cause</th>
<th>Location</th>
<th>Measure</th>
<th>Possession</th>
</tr>
</thead>
<tbody>
<tr>
<td>by</td>
<td>of</td>
<td>from/with</td>
<td>off/from</td>
<td>of</td>
<td>of</td>
</tr>
</tbody>
</table>

**BY**

**Huset köptes av en svensk.** The house was bought by a Swede.

**en film (skriven) av Bergman** A film (written) by Bergman

**OF**

**Huset är byggt av tegel.** The house is built of brick.

**Det står i utkanten av stan.** It’s on the edge of town.

**Kungen av Sverige** The King of Sweden

**Nio av tio svar var riktiga.** Nine out of ten answers were correct.

**Det var snällt/duktigt av dig.** That was kind/clever of you.

**FROM**

**Jag får ont i huvudet av bullret.** I get a headache from the noise.

**Får du någon glädje av det?** Do you get pleasure from that?

**WITH**

**Hon grät av rädsla/glädje.** She cried with fear/with joy.

**OFF**

**Han steg/hoppade av bussen.** He got/jumped off the bus.

*Note also:*

på grund av ‘because of, due to’; med hjälp av ‘with the aid of’; av misstag ‘by mistake’; av en händelse ‘by chance’

10.2.2 Från

Från (sometimes ifran) is used much the same as English ‘from’ to suggest origin, a point of departure or vantage.
Det står 220 meter från vägen. It’s 220 metres from the road.
När flyttade du från Sverige? When did you move from Sweden?
Utifrån det vet . . . From what we know . . .  

Note:
A number of adverbial expressions of place are formed with post-positioned ifrån (see 8.3(1)):
Var kommer du ifrån? Where do you come from?

10.2.3 För

För corresponds to English ‘for’ in a wide range of senses, but not generally with time expressions (see 10.3.2):

for to for

FÖR
ett program för barn a programme for children
Jag gör det för dig/för din skull. I do it for you/for your sake.
Tack för hjälpen! Thanks for your help!
Han är känd/berömd för det. He is renowned/famous for that.
Vad gråter du för? What are you crying for?
en gång för alla once and for all

TO
Förklara det för mig! Explain it to me!
Kan jag vara till hjälp för dig? Can I be of help to you?
Tala om för oss vad som hände. Tell us what happened.
Han berättade historien för mig. He told me the story.

Note also:
Jag är rädd för ormar. I’m afraid of snakes.
Han intresserar sig för musik. He’s interested in music.
Jag har svårtilätter för språk. I find languages hard/easy.
att skriva för hand to write by hand
dag för dag day by day
för det första/andra osv in the first/second place, etc.
Vad är det för slags bil? What kind of car is it?
I is the second most frequent word in Swedish, with many idiomatic usages beyond its basic meaning ‘in’. With public buildings and places of work or entertainment, English ‘in’ is often rendered by Swedish på (see 10.2.7, 10.3.4). For the uses of i with expressions of time, see 10.3.2.

<table>
<thead>
<tr>
<th>Location</th>
<th>Material</th>
<th>Time when</th>
<th>Time duration</th>
<th>State</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>in/on/at</td>

<td>for</td>
<td>in</td>
<td>per</td>
</tr>
</tbody>
</table>

**IN**

Han sitter i rummet.  
He is sitting in the room.

en staty i brons  
a statue in bronze

Han är i god form.  
He’s in good shape.

De kommer i april.  
They’re coming in April.

**ON**

Hon sitter i gräset/soffan.  
She’s sitting on the grass/sofa.

**AT**

Mor är i kyrkan.  
Mother’s at church.

**FOR**

De stannade i fem veckor.  
They stayed for five weeks.

**PER**

90 kilometer i timmen  
90 kilometres per hour

en gång i veckan/i månaden  
once a week/a month

*Note also:*

Går Eva i skolan/i kyrkan?  
Does Eva go to school/to church?

Klockan är fem minuter i tio.  
It’s five minutes to ten.

Jag har ont i magen/huvudet.  
I have a stomach-ache/headache.

Han tvättar sig i ansiktet.  
He washes his face. (See also 3.6.5.)
10.2.5 Med

Med may be used to render most of the meanings of English ‘with’.

<table>
<thead>
<tr>
<th>Manner</th>
<th>Possession</th>
</tr>
</thead>
<tbody>
<tr>
<td>by/with/in</td>
<td>with</td>
</tr>
</tbody>
</table>

**WITH**

<table>
<thead>
<tr>
<th>Swedish</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>Han åkte dit med sin familj.</td>
<td>He went there with his family.</td>
</tr>
<tr>
<td>Han är mannen med sex söner.</td>
<td>He’s the man with six sons.</td>
</tr>
<tr>
<td>Hur står det till med dig?</td>
<td>How are things with you?</td>
</tr>
<tr>
<td>Ät inte med fingrarna!</td>
<td>Don’t eat with your fingers!</td>
</tr>
<tr>
<td>Det värsta med honom är hans dåliga humör.</td>
<td>The worst thing with (= about) him is his bad temper.</td>
</tr>
<tr>
<td>kaffe med grädde</td>
<td>coffee with cream</td>
</tr>
</tbody>
</table>

**BY**

<table>
<thead>
<tr>
<th>Swedish</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>åka med buss/bil/tåg osv</td>
<td>travel by bus/car/train, etc.</td>
</tr>
<tr>
<td>Skicka pengarna med posten!</td>
<td>Send the money by post.</td>
</tr>
</tbody>
</table>

**IN**

<table>
<thead>
<tr>
<th>Swedish</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tala med hög röst!</td>
<td>Speak in a loud voice!</td>
</tr>
</tbody>
</table>

**Note also:**

<table>
<thead>
<tr>
<th>Swedish</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>Får jag prata med honom?</td>
<td>May I speak to him?</td>
</tr>
<tr>
<td>ha dåligt med tid/pengar osv</td>
<td>to have little time/money, etc.</td>
</tr>
<tr>
<td>Jag har inte tid med det.</td>
<td>I’ve no time for that.</td>
</tr>
</tbody>
</table>
Om is used in a great many idiomatic senses, perhaps most frequently in certain expressions indicating future time (see 10.3.2).

<table>
<thead>
<tr>
<th>Location</th>
<th>Future time when</th>
<th>Subject matter</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a)round</td>
<td>in</td>
<td>on/about</td>
</tr>
</tbody>
</table>

(A)ROUND

**Ta en halsduk om halsen!** Put a scarf round your neck.

**De kommer om en vecka.** They’re coming in a week(‘s time).

ABOUT/ON

**Vi har pratat om dig.** We have been talking about you.

**en bok om Sverige** a book about/on Sweden

**Det är synd om honom.** It’s a pity about him.

*Note also:*

- **norr om/söder om** north of/south of
- **gott om/ont om** plenty of/little (= a lack of)
- **tycka synd om** to feel sorry for someone
- **tre gånger om dagen/året** three times a day/year

In certain instances, primarily with parts of the body, **om** is used without an English equivalent (see also 3.6.5):

**Han är smutsig/kall/våt/om händerna.**
His hands are dirty/cold/wet.

**Jag fryser om tårna.** My toes are cold.

**Du är röd om kinderna.** Your cheeks are red.

**På**

På is used in many idiomatic senses in addition to the basic meaning of ‘on (top of)’. På is often used to render English ‘in’ with public buildings and places of work or entertainment (see 10.3.4). For uses of på with expressions of time, see 10.3.2.
Det ligger på bordet. It’s on the table.
Han satte hatten på huvudet. He put his hat on his head.
Vi åker dit på söndagarna. We go there on Sundays.

Jag arbetar på en bank/ett hotell. I work in a bank/a hotel.
Vi åker dit på vintern. We go there in winter.
Han gör allt på väldigt kort tid. He does everything in a very short time.

Jag har inte träffat henne på länge. I’ve not seen her for a long time.

Vi träffades på biblioteket/bion. We met at the library/cinema.
Vad gör ni på julen? What are you doing at Christmas?

Vi går på bio/matchen. We’re going to the cinema/match.

ett barn på fyra år a child of four
titeln på/priset på boken the title/price of the book
i början på augusti at the beginning of August

Note also:
Jag tänker ofta på dig. I often think of you.
Vi väntar på dig. We’re waiting for you.
på samma sätt/på detta sätt in the same way/in this way
Han är bra/dålig på att simma. He is good/bad at swimming.
10.2.8 Till

Basically till suggests movement or progression towards some target, but it may also be used to express indirect object relationships.

<table>
<thead>
<tr>
<th>Motion to</th>
<th>Time when until</th>
<th>Indirect object to/for</th>
<th>Possession of</th>
</tr>
</thead>
<tbody>
<tr>
<td>TO</td>
<td>Han reser till Amerika.</td>
<td>He’s going to America.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Han kom till makten 1929.</td>
<td>He came to power in 1929.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>ett nio till fem jobb</td>
<td>a nine-to-five job</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Vad sa han till de andra?</td>
<td>What did he say to the others?</td>
<td></td>
</tr>
<tr>
<td>UNTIL</td>
<td>Kan du stanna till imorgon?</td>
<td>Can you stay until tomorrow?</td>
<td></td>
</tr>
<tr>
<td>FOR</td>
<td>Vi åt fisk till lunch.</td>
<td>We had fish for lunch.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Han köpte en bil till mig.</td>
<td>He bought a car for me.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Vad använder du det till?</td>
<td>What do you use that for?</td>
<td></td>
</tr>
<tr>
<td></td>
<td>till exempel</td>
<td>for example</td>
<td></td>
</tr>
<tr>
<td>OF</td>
<td>Nils är en gammal vän till mig.</td>
<td>Nils is an old friend of mine.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Note also: Han är elektriker till yrket.</td>
<td>He is an electrician by trade.</td>
<td></td>
</tr>
</tbody>
</table>
### 10.2.9 Under

Basically **under** corresponds to ideas expressed by English ‘below’, ‘underneath’, etc. However, it is also used to render English ‘during’.

<table>
<thead>
<tr>
<th>Location</th>
<th>Time duration</th>
<th>Measure</th>
</tr>
</thead>
<tbody>
<tr>
<td>under/below/beneath</td>
<td>during/for</td>
<td>under/below</td>
</tr>
</tbody>
</table>

**UNDER**

- **Boken ligger under bordet.** The book is under the table.
- **Bilen körde under bron.** The car drove under the bridge.
- **barn under femton (år)** children under 15 (years old)
- **Är allt under kontroll?** Is everything under control?

**BELOW**

- **vid temperaturer under noll** at temperatures below zero

**DURING**

- **Vad gjorde du under kriget?** What did you do during the war?
- **Vi blev goda vänner under samtalets gång.** We became firm friends during the course of the conversation.
10.2.10 Vid

Vid suggests adjacency or proximity.

<table>
<thead>
<tr>
<th>Location</th>
<th>Time when</th>
</tr>
</thead>
<tbody>
<tr>
<td>by/at</td>
<td>around</td>
</tr>
</tbody>
</table>

**BY**

Vi har en stuga vid kusten. We have a cottage by/on the coast.

Han satt vid fönstret. He sat by the window.

**AT**

Han satt vid bordet. He sat at the table.

Hon studerar vid universitetet. She’s studying at university.

**AROUND**

Vi träffas vid tiotiden. We’ll meet around ten.

*Note also:*

vid ankomst/vid avgång on arrival/on departure
vid närmare eftertanke on closer consideration
en man vid namn Jansson a man called Jansson
Han är fortfarande vid liv. He’s still alive.

10.3 Translating prepositions

10.3.1 Some common English prepositions and their Swedish equivalents

Before attempting to render English prepositional phrases into Swedish, consult the table below for help in choosing a suitable Swedish equivalent.
<table>

<td>hos</td>
<td>med</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Because of the idiomatic nature of Swedish prepositional expressions of time, it is difficult to formulate rules which are both concise and 100 per cent reliable. For the sake of brevity some variations have been deliberately omitted from what follows. The aim here is to indicate a scheme of basic conventions applicable in the majority of instances.

1 ‘in’ + expressions of time

<table>
<thead>
<tr>
<th></th>
<th>Year</th>
<th>Decade/Century</th>
<th>Month</th>
<th>Season</th>
</tr>
</thead>
<tbody>
<tr>
<td>past</td>
<td>år 1949</td>
<td>på 1800-talet</td>
<td>i januari</td>
<td>i våras/på våren</td>
</tr>
<tr>
<td>habitual</td>
<td>–</td>
<td>–</td>
<td>i januari</td>
<td>på våren</td>
</tr>
<tr>
<td>present</td>
<td>–</td>
<td>–</td>
<td>i januari</td>
<td>i vår</td>
</tr>
<tr>
<td>future</td>
<td>år 2030</td>
<td>på 2200-talet</td>
<td>i januari</td>
<td>i vår</td>
</tr>
</tbody>
</table>

Notes:

1 The preposition om (Eng. ‘in’) answers the question ‘When?’ to express future action:
   De reser om en timme/om en vecka/om ett par år.
   They’re going in an hour/in a week/in a couple of years.

2 The preposition på (Eng. ‘in’) answers the question ‘How long does it/will it take?’:
   De reser dit på en timme/på en vecka.
   They can travel there in an hour/in a week.
   i.e. It will take them an hour/a week to get there.

3 I våras, etc. and i vår, etc., both render English ‘in spring’, etc., but mean ‘last spring’ and ‘next spring’ respectively.

4 For less specific expressions with seasons på våren is used for both past and future:
   Detta hände på våren för länge sedan.
   This happened in the spring many years ago.

5 The preposition på is usually omitted when the season is followed by a year date:
   Detta hände våren 1986 och kommer att hända igen våren 2062.
   This happened in the spring of 1986 and will happen again in the spring of 2062.

6 Note the idiomatic use of på to render ‘in/for’ as an expression indicating duration in negative sentences (see also 4 ‘for + duration’ below):
   Jag har inte sett henne på tre år/på länge.
   I haven’t seen her for three years/for a long time.
2 ‘on’ + expressions of time

<table>
<thead>
<tr>
<th>On +</th>
<th>Weekday</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>past</td>
<td>i söndags</td>
<td>den 1:a (första) juli</td>
</tr>
<tr>
<td>habitual</td>
<td>på söndagarna</td>
<td>den 1:a (första) juli</td>
</tr>
<tr>
<td>present</td>
<td>(idag)</td>
<td>den 1:a (första) juli</td>
</tr>
<tr>
<td>future</td>
<td>på söndag</td>
<td>den 1:a (första) juli</td>
</tr>
</tbody>
</table>

Notes:
1 I söndags, etc., and på söndag, etc., render English ‘on Sunday’ = ‘last Sunday’, etc. and ‘this/next Sunday’, etc., respectively.
2 For less specific expressions of time (på) en söndag, etc., may be used.
   Detta hände (på) en söndag för länge sedan.
   This happened on a Sunday/one Sunday a long time ago.
3 For weekday + calendar date expressions Swedish usually has the definite form of the weekday and no preposition:
   Detta hände fredagen den 1:a mars och händer igen söndagen den 5:e maj.
   This happened on Friday March 1st and will happen again on Sunday May 5th.
4 I söndags, etc., may be combined with the parts of the day:
   Detta hände i söndags morse.
   This happened on Sunday morning.

3 ‘at’ + expressions of time

<table>
<thead>
<tr>
<th>At +</th>
<th>Festival</th>
<th>Clock</th>
</tr>
</thead>
<tbody>
<tr>
<td>past</td>
<td>i julas</td>
<td>klockan 10 (tio)</td>
</tr>
<tr>
<td>habitual</td>
<td>på jul/på jularna</td>
<td>klockan 10 (tio)</td>
</tr>
<tr>
<td>present</td>
<td>i jul</td>
<td>klockan 10 (tio)</td>
</tr>
<tr>
<td>future</td>
<td>i jul/till jul</td>
<td>klockan 10 (tio)</td>
</tr>
</tbody>
</table>

Notes:
1 I julas, etc., and i jul, etc., render English ‘at Christmas’ = ‘last Christmas’, etc. and ‘this/next Christmas’, etc., respectively.
2 For less specific expressions of time på julen, etc., may be used.
   Detta hände på julen för många år sedan.
   This happened at Christmas many years ago.
3 With year-date expressions Swedish usually has the definite form of the festival and no preposition:
   Detta hände julen 1954 och kommer att hända igen julen 2027.
   This happened at Christmas 1954 and will happen again at Christmas 2027.
4 ‘for’ + duration

Swedish i + expression of time:

**Han har bott här i tre år.**
He’s lived here for three years.

Swedish under if English ‘for’ = ‘for the duration of’:

**Han bodde här under kriget.**
He lived here for the war.

Swedish på renders English ‘for/in’ in negative clauses:

**Jag har inte bott där på 5 år.**
I haven’t lived there for/in five years.

Note also:

- for a long time: **länge** (no preposition!)
- not for a long time: **inte ... på länge**

### 10.3.3 Prepositions in expressions of time – summary

<table>
<thead>
<tr>

<td>i januari</td>
<td>i januari</td>
</tr>
</tbody>
</table>

10.3.4 Translating ‘in, on, at’, etc., as expressions of place

Because of the idiomatic usages of i and på, translation of ‘in’, ‘on’, ‘at’, etc., expressing place relationships is not always straightforward. A rule of thumb (to which there are many exceptions!) is that Swedish usage requires:

<table>
<thead>
<tr>
<th>På + surface</th>
<th>I + volume</th>
</tr>
</thead>
<tbody>
<tr>
<td>tavlan på väggen</td>
<td>möss i väggen</td>
</tr>
<tr>
<td>the picture on the wall</td>
<td>mice in the wall</td>
</tr>
<tr>
<td>duken på bordet</td>
<td>duken i lådan</td>
</tr>
<tr>
<td>the cloth on the table</td>
<td>the cloth in the drawer</td>
</tr>
<tr>
<td>en sajt på webben</td>
<td>ett fel i datorn</td>
</tr>
<tr>
<td>a site on the internet</td>
<td>a fault in the computer</td>
</tr>
</tbody>
</table>

Note: Han bor på landet. He lives in the country(side).

Han sitter på en stol. He’s sitting on a (dining) chair.

Han bor i landet. He lives in the country (i.e. state).

prata i telefon
speak on the telephone

ett program i radio/TV
a programme on the radio/TV

Han sitter i en stol. He’s sitting in an armchair.
Major exceptions:

1. På = ‘in’/‘at’ with public buildings, etc.
   Vi träffades på museet/IKEA/sjukhuset/hotellet.
   We met in the museum/in IKEA/in the hospital/at the hotel.

2. På = ‘in’/‘at’ with place of work or study:
   Hon är på jobbet/på ett möte. She’s at work/in a meeting.
   Han arbetar på Volvo/på ett fik. He works at Volvo/in a café.

3. På = ‘in’/‘at’/‘on’ with places of entertainment or enjoyment:
   Vi träffades på en dans/på bion/på ett bröllop/på semester.
   We met at a dance/at the cinema/at a wedding/on holiday.

4. Hos = ‘at’ with the names of people or their professions to indicate ‘at the place of work/home of’:
   Vi var hos Olssons. We were at the Olssons’ (place).
   Han är hos frisören. He’s at the hairdresser’s.

5. Vid = ‘on’/‘at’/‘by’ with many words for things which extend lengthwise:
   Han bor vid kusten. He lives on the coast.
   Han stod vid disken/flodden. He stood at the counter/by the river.

10.3.5 Translating ‘of’

The English preposition ‘of’ may be rendered in a great many ways in Swedish. What follows provides hints on how to translate ‘of’ in some common instances:

1. Possessive ‘of’

(a) English possessive ‘of’ is commonly rendered by Swedish s-genitives
   (cf. 3.7.1):
   
   the meaning of life      livets mening
   the title of the book    bokens titel

(b) In many cases Swedish prefers a compound noun:
   
   the tops of the mountains fjälltopparna
   (cf. the mountain tops)
   the leg of the table (cf. the table leg) bordsbenet

(c) Double genitives (English: ‘of’ + possessive adjective/s-genitive noun)
   are generally constructed with till + possessive pronoun/noun in
   Swedish (cf. 10.2.8):
   
   a friend of yours/the president’s en vän till dig/presidenten
2 Appositive genitive

When English ‘of’ may be replaced by commas indicating apposition, it is rendered without a preposition in Swedish:

the kingdom of Norway (the kingdom, Norway)  
(kungariket Norge)  

the month of May  
månaden maj

Note:

The city of Stockholm (= urban area)  
(staden Stockholm)

The City of Stockholm (= municipal council)  
(Stockholms stad)

the battle of Lützen  
(slaget vid Lützen)

3 Partitive genitive

Expressions with ‘of’ indicating measure are generally rendered without a preposition in Swedish:

a cup of tea  
en kopp te

a pair of shoes  
ett par skor

12 kilos of peas  
12 kilo ärter

a large number of Swedes  
ett stort antal svenskar

Notes:

1 Half of/part of the book  
hälften av/en del av boken

2 Swedish usually has på when English ‘of’ is followed by a number:

a boy of 5  
en pojke på 5 år

a monthly wage of 25,000 kronor  
en månadslön på 25000 kronor

4 Dates

Swedish usually has no preposition for ‘of’ used in dates:

the first of January  
den 1:a (första) januari

in May of 1956  
i maj 1956

5 ‘A heart of stone’ etc.

‘Of’ indicating material is rendered by av in Swedish (cf. 10.2.1):

a heart of stone  
ett hjärta av sten

a statue of gold  
en staty av guld
6 ‘The king of Sweden’, etc.
‘Of’ indicating origin is generally rendered by Swedish av:

the king of Sweden  kungen av Sverige

7 ‘North of’ etc.
‘Of’ in locations and directions expressed by compass points or ‘left’/‘right’ is rendered by om in Swedish:

north of Malmö  norr om Malmö
left of the church  till vänster om kyrkan

Note:
the north of England/Sweden  norra England/Sverige
11.1 Coordinating conjunctions

These join clauses or elements of the same kind and are always found between the words or groups of words that they link (see 12.4). They do not affect the word order within the groups of words that they link.

Coordination (linking) of:

- two subjects
  - Hans och Greta lyssnar på jazz.
  - De sitter och lyssnar.

- two verbs
  - Jag tycker om Olle och han älskar mig.
  - Popmusik älskar jag, och det gör hon också.

- two main clauses
  - (straight word order)
  - Jag hoppas att han vinner och att han har rekordtid.

- two main clauses
  - (inverted word order)
  - Jég tycker om Ollé och han älskar mig.

- two subordinate clauses

Coordinating conjunctions include:

- och/samt and
  - Möblerna och tavlorna såldes.

- eller or
  - Pengar eller livet!

- men but
  - Han är smart men ful. See Note 2 below, 11.4(6).

- utan but
  - Han var inte full utan bara trött. See 11.4(6).

- fast but, (al)though
  - Mor var sjuk, fast det kunde jag ju inte veta.

- för as, because
  - Han kom inte för han var sjuk.

- så so
  - Det är sent, så vi går nu.

- som as
  - Då som nu var det stor arbetslöshet här.

- plus and, as well as
  - Vi köpte hela köket och badrummet plus en del möbler.
Notes:
1 Och links elements of equal weight, whereas samt links elements of unequal weight:

Kansliet samt biblioteket hålls stängda under sommaren.
(Kansliet is more important.)
The offices and library are closed during the summer.

2 Utan replaces men after a negative when the second element contradicts the first:

Han köpte inte bilen utan stal den. He did not buy the car, but stole it.

Other constructions include:

både . . . och partly . . . partly, both . . . and
såväl . . . som both . . . and
inte bara . . . utan också not only . . . but also
antingen . . . eller either . . . or
varken . . . eller neither . . . nor

11.2 Subordinating conjunctions

These link main clauses to subordinate clauses, and always introduce the subordinate clause wherever it is positioned in the sentence. Some subordinating conjunctions may therefore begin the sentence:

Jag sover när jag är trött. I sleep when I'm tired.
MC sub conj + SC

När jag är trött sover jag. When I'm tired I sleep.
sub conj + SC MC

Some Swedish subordinating conjunctions never introduce a sentence, however:

Hon kom hit för att hon ville lära sig svenska.
She came here (in order) to learn Swedish.

sub conj + SC

Subordinating conjunctions and other words (see 11.3) which introduce subordinate clauses do affect the word order and occupy the first position in the subordinate clause (see 12.8.2). There are two main types of subordinating conjunction:
1 General subordinators introduce indirect speech (att) and indirect yes/no questions (om), but impart no meaning to the clause, unlike other subordinating conjunctions in 2 below:

- **att** Han sa att han arbetade hårt. (that)
  
  cf. Jag arbetar hårt.

- **om** Jag undrar, om han arbetar så mycket. (whether, if)
  
  cf. Arbetar han så mycket?

2 Other subordinating conjunctions introduce different kinds of adverbial clause (cf. 12.6.5):

(a) Time:

- *När/Då/Sedan* han hade parkerat bilen, gick han in. (when, after)

  *Medan* gräset gror, dör kon. (while)

  *Innan* vi gick hem tackade vi värdinnan. (before)

(b) Cause:

- *Vi vann därför att vi var bäst.* (because)

  *Eftersom/Sedan* de var sämre, förlorade de. (since, as, because)

(c) Condition:

- *Om/Ifall* du är snäll ska du få glass. (if)

(d) Concession:

- Han är glad *fast(än)* han inte är kry. (although)

(e) Intention:

- Vi måste friställa folk för att vi ska rädda firman. (in order that)

  Han skrev upp det så (*att*) han skulle minnas det. (so that)

  *Se upp så* (*att*) du inte blir överkörd! (so that)

(f) Result:

- Han sprang så fort att han blev andfådd. (so ( . . . that)

(g) Comparison:

- Han är *lika stor som* hans bror. (as . . . as . . .)

  Du är inte *så gammal som* jag. (as . . . as . . .

  Hon var äldre än jag väntat mig. (than)

  *Ju äldre jag blir desto trättare blir jag.* (the . . . the . . .)
### 11.3 Other subordinators

These are words which are not conjunctions, but nevertheless introduce subordinate clauses.

1. **Interrogative pronouns (v-words) and adverbs** (cf. 5.11)

These words introduce indirect v-questions (cf. 12.2(2), 12.3):

- Jag undrade vart han hade tagit vägen. *where*
  
  cf. Vart har han tagit vägen?

- Jag undrar vem som kysser henne nu. *who*

- Jag vet inte vilken du menar. *which*

2. **Relative pronouns and adverbs** (cf. 5.10)

These words introduce relative clauses (cf. 12.8.1(2)), which usually form attributes to subjects, objects or complements:

- Brevet som jag skickade var handskrivet. *which, that*
  
  The letter (that) I sent was handwritten.

- En man vars namn jag har glömt kom fram till mig. *whose*
  
  A man whose name I have forgotten came up to me.

- Han hittade en skog där det fanns lingon. *where*
  
  He found a forest where there were lingonberries.

- **Gustav II Adolf blev med tiden tämligen fet, vilket alltid nämns i skolböckerna.**
  
  Gustavus Adolphus in time became rather fat, which is always mentioned in the textbooks.

### 11.4 Some problem conjunctions

1. ‘After’ = both preposition and conjunction in English. **Efter** is only a preposition and cannot alone introduce a clause. **Efter (det) att** is used instead.

   The house burned down shortly after they left.

   **Huset brann ner kort efter (det) att de åkte.**
2 ‘As’ = ‘for’ = för

He disappeared as he was afraid.
Han försvann för han var rädd.

‘As’ = ‘while’ = medan

As he was speaking he went red.
Medan han talade rodnade han.

‘As’ = ‘because’ = eftersom/då

As he isn’t coming we will begin.
Eftersom han inte kommer börjar vi.

‘As’ = ‘like’ = (lik)som

Now as before it is very difficult.
Nu liksom förr är det mycket svårt.

3 ‘As . . . as . . .’

• when a comparison is made in a positive clause = lika . . . som

He is as gifted as your sister.
Han är lika begåvad som din syster.

• when a comparison is made in a negative clause = så . . . som

He is not as gifted as you.
Han är inte så begåvad som du.

4 ‘Before’

• as a conjunction after a positive main clause = innan

We visited him before we came here.
Vi hälsade på honom innan vi kom hit.

• as a conjunction after a negative main clause = förrän

It was not long before he arrived.
Det dröjde inte länge förrän han kom.

• as an adverb = ‘earlier’, ‘previously’ = förr/förut/tidigare

I have never been to Dalarna before.
Jag har aldrig varit i Dalarna förr/förut/tidigare.
Conjunctions

5 ‘Both’
- as a preposition = före/innan
  We met Jan before Easter. Vi träffade Jan före/innan påsk.
- as a conjunction – ‘both X and Y’ = både . . . och . . .
  Both Erik and Eva were language students. Både Erik och Eva var språkstuderande.
- as an indefinite pronoun – ‘both Xs’ = båda (+ noun with end article)
  Both students studied languages. Båda studenterna studerade språk.

6 ‘But’
- as a conjunction after a positive clause or a negative clause not directly contradicting the first clause (i.e. but in spite of that) = men
  The essay is long but it does not say very much. Uppsatsen är lång men den säger inte mycket.
  The essay is not long but it is very boring. Uppsatsen är inte lång men den är mycket tråkig.
- as a conjunction after a negative main clause, when the second clause directly contradicts the first (i.e. but on the contrary) = utan
  The essay isn’t long but is actually quite short. Uppsatsen är inte lång utan egentligen ganska kort.

Note also:
inte bara . . . utan också . . .
Hon var inte bara vacker utan också intelligent.
She was not only beautiful but also intelligent.

- as a preposition = utom
  All students but one have passed. Alla studenter utom en har blivit godkända.
7 ‘That’

• as a subordinating conjunction = att
  They said (that) they were pleased.
  De sa (att) de var nöjda.

• as a relative pronoun (= ‘which’, ‘whom’) = som
  Buy a house (that) you like.
  Köp ett hus (som) du tycker om!

• in cleft sentences (cf. 12.7.8) = som
  It was my idea that won the prize.
  Det var min idé som vann priset.

• in the expression ‘now that’ = nu då/när
  Now that she is here we can begin.
  Nu då hon är här kan vi börja.
12.1 **Word classes and sentence elements**

Hitherto in this book we have examined word classes (or parts of speech), i.e. words grouped according to their form or meaning, e.g. nouns, verbs. In this section of the book we examine sentence elements, i.e. the function of words and groups of words in the sentence.

<table>
<thead>
<tr>
<th>Word class</th>
<th>Pronoun</th>
<th>Verb</th>
<th>Adverb</th>
<th>Verb</th>
<th>Noun</th>
<th>Adverb</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sentence</td>
<td>Subject</td>
<td>Finite</td>
<td>Clausal</td>
<td>Non-Object</td>
<td>Other</td>
<td>adverbial</td>
</tr>
<tr>
<td>Element</td>
<td>verb</td>
<td>adverbial</td>
<td>verb</td>
<td>finite</td>
<td>Object</td>
<td>verb</td>
</tr>
</tbody>
</table>

A sentence element is any word or group of words in Swedish which can be moved to the beginning of a sentence (main clause statement):

*Ikväll har vi inte köpt tidningen.*
Tonight we haven’t bought the paper.

*Tidningen har vi inte köpt ikväll.*
*Literally:* The paper we haven’t bought today.

12.2 **Sentence types**

Most sentences possess both a subject (see 12.6.1) and a finite verb (see 12.6.2).

1 In describing clauses we often use the terms FV1-clause, FV2-clause.

In FV1-clauses the finite verb comes first in the sentence.
In FV2-clauses the finite verb comes second, after some other element.
The five sentence types in Swedish are shown in the table below.

\[ S = \text{subject} \]
straight (word order) = subject – finite verb
inverted (word order) = finite verb – subject

<table>
<thead>
<tr>
<th>Sentence types</th>
<th>Position: 1 2 3 4–7</th>
<th>Word order</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Statement</strong></td>
<td><strong>Subject</strong> Finite verb etc.</td>
<td><strong>FV-2, straight</strong></td>
</tr>
<tr>
<td><strong>Han kommt hem idag.</strong></td>
<td><strong>FV-2, straight</strong></td>
<td></td>
</tr>
<tr>
<td><strong>Non-subject</strong></td>
<td><strong>Finite verb Subject etc.</strong></td>
<td><strong>FV-2, inverted</strong></td>
</tr>
<tr>
<td><em>Idag kommer han hem.</em></td>
<td><strong>FV-2, inverted</strong></td>
<td></td>
</tr>
<tr>
<td><strong>Yes/no questions</strong></td>
<td><strong>Finite verb Subject etc.</strong></td>
<td><strong>FV-1, inverted</strong></td>
</tr>
<tr>
<td><em>Kommer han hem idag?</em></td>
<td><strong>FV-1, inverted</strong></td>
<td></td>
</tr>
<tr>
<td><em>Ska han inte komma hem idag?</em></td>
<td><strong>FV-1, inverted</strong></td>
<td></td>
</tr>
<tr>
<td><strong>V-question</strong></td>
<td><strong>V-word</strong> Finite verb Subject etc.</td>
<td><strong>FV-2, inverted</strong></td>
</tr>
<tr>
<td><em>Varför kommer han hem idag?</em></td>
<td><strong>FV-2, inverted</strong></td>
<td></td>
</tr>
<tr>
<td><em>Vem kommer hem idag?</em></td>
<td><strong>FV-2, straight</strong></td>
<td></td>
</tr>
<tr>
<td><strong>S</strong></td>
<td><strong>Vad händer därborta?</strong></td>
<td><strong>FV-2, straight</strong></td>
</tr>
<tr>
<td><strong>Command</strong></td>
<td><strong>Finite verb Subject etc.</strong></td>
<td><strong>FV-1, no subject</strong></td>
</tr>
<tr>
<td><em>Kom hem nu!</em></td>
<td><strong>FV-1, no subject</strong></td>
<td></td>
</tr>
<tr>
<td><strong>Subjunctive</strong></td>
<td><strong>Wish</strong> Finite verb Subject etc.</td>
<td><strong>FV-1, inverted</strong></td>
</tr>
<tr>
<td><em>Må det gå dig väl!</em></td>
<td><strong>FV-1, inverted</strong></td>
<td></td>
</tr>
<tr>
<td><em>Leve brudparet! –</em></td>
<td><strong>FV-1, inverted</strong></td>
<td></td>
</tr>
<tr>
<td><strong>Subject</strong></td>
<td><strong>Finite verb etc.</strong></td>
<td><strong>FV-2, straight</strong></td>
</tr>
<tr>
<td><em>Vore roligt att träffas!</em></td>
<td><strong>FV-2, straight</strong></td>
<td></td>
</tr>
</tbody>
</table>

Translations: He’s coming home today. Today he’s coming home. Is he coming home today? Won’t he come home today? Why is he coming home today? Who is coming home today? What’s happening over there? Come home now! May it go well for you! Long live the bride and groom! It would be fun to meet up.

Notes:
1. *V*-questions begin with an interrogative pronoun or *v*-word (see 5.11).
2. Yes/no questions are so called because the answer to them is often ‘yes’ or ‘no’.
3. Notice the difference between *v*-questions (FV2) and yes/no questions (FV1).
Main clause structure

Many main clause sentences possess other elements not mentioned in 12.2 above. These are included in the scheme below, which may be used to analyse most main clause sentences in Swedish.

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
</tr>
</thead>
<tbody>

<td>–</td>
<td>–</td>
<td>hit ikväll?</td>
<td></td>
</tr>
<tr>
<td>Vem (O)</td>
<td>gav</td>
<td>du</td>
<td>–</td>
<td>–</td>
<td>pengarna till?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>När</td>
<td>tänker</td>
<td>de</td>
<td>–</td>
<td>åka</td>
<td>–</td>
<td>till Norge?</td>
<td></td>
</tr>
<tr>
<td>Command</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Ring</td>
<td>–</td>
<td>alltid</td>
<td>–</td>
<td>–</td>
<td>före tolv!</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Wish</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Må</td>
<td>du</td>
<td>aldrig</td>
<td>få ånga</td>
<td>dig!</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Leve</td>
<td>kungen!</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Det (S)</td>
<td>vore</td>
<td>–</td>
<td>inte</td>
<td>–</td>
<td>så dumt!</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Key: (S) = subject, (O) = object

Translations: He’s coming home today. This morning he still hadn’t packed the case. (Lit.: The case he still hadn’t packed this morning.) Then, alas, they got angry. Do they never come to Malmö? Don’t they ever come to Malmö? Who’s coming here tonight? Who did you give the money to? When are they thinking of going to Norway? Always ring before twelve! May you never regret it! Long live the king! That wouldn’t be such a bad idea!

Notes:

1. Main clause sentences always have a finite verb and usually a subject.
2. All positions except those occupied by the finite verb may be left vacant.
3. The subject usually occupies positions 1 or 3 (see 12.6.1).
4. The topic position is always occupied in statements and v-questions, but is vacant in yes/no questions.
5. Only one sentence element at a time may occupy the topic position (see 12.7.1).
6. There may be more than one finite verb, clauseal adverbial, non-finite verb, object, complement or several other adverbials.
7. V-words may be subject or object in v-questions.
12.4 Link position

The link position (L) is an additional position necessary before the topic in order to accommodate conjunctions:

<table>
<thead>
<tr>
<th>L</th>
<th>T</th>
<th>FV</th>
<th>S</th>
<th>CA</th>
<th>NFV</th>
<th>O/C</th>
<th>OA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Han kommer, men han tänker – inte stanna – länge.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Kommer du, eller – stannar du – – – hemma?</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Translations: He is coming but he’s not thinking of staying long. Are you coming or are you staying at home?

12.5 Extra positions

The extra positions ($X^1$, $X^2$) are additional positions necessary both before the topic position and after the OA position to accommodate elements of various kinds outside the clause. These elements often duplicate elements within the clause proper.

<table>
<thead>
<tr>
<th>$X^1$</th>
<th>T</th>
<th>FV</th>
<th>S</th>
<th>CA</th>
<th>NFV</th>
<th>O/C</th>
<th>OA</th>
<th>$X^2$</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 Olle,</td>
<td>han</td>
<td>är –</td>
<td>ju –</td>
<td>sjuk</td>
<td>idag,</td>
<td>han.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>Inte</td>
<td>gör</td>
<td>vi – –</td>
<td>det, – –</td>
<td>inte!</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4 I Lund,</td>
<td>där</td>
<td>vill</td>
<td>jag –</td>
<td>bo.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>5 När vi kom fram, så</td>
<td>kokade</td>
<td>vi – –</td>
<td>kaffe.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>7</td>
<td>Det</td>
<td>är – –</td>
<td>roligt –</td>
<td>att spela tennis.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Translations: 1 Olle, he’s ill today of course, he is. 2 (Now) Paris, that’s a beautiful city. 3 We’re not doing that, we’re not. 4 In Lund, that’s where I want to live. 5 When we got there we made coffee. 6 It isn’t true that time heals all wounds. 7 It is fun to play tennis.
If there is also a link position, the order is:

\[
\begin{array}{c|c|c}
L & X' & T etc. \\
\hline
\text{men} & \text{Olle,} & \text{han är rolig . . .} \\
\text{but} & \text{Olle,} & \text{he's funny}
\end{array}
\]

### 12.6 Main clause positions (sentence elements)

#### 12.6.1 Subject and formal subject

The subject (S) may be:

- a noun phrase:
  - \text{Snön ligger djupt.} \quad \text{The snow lies deep.}
  - \text{Annika åker skidor.} \quad \text{Annika goes skiing.}
- a pronoun:
  - \text{Han åter middag.} \quad \text{He is eating dinner.}
- an adjective:
  - \text{Rött är väl vackert.} \quad \text{Red is beautiful, isn’t it?}
- a verb:
  - \text{Att ljuga är fult.} \quad \text{Lying is bad.}
- a subordinate clause:
  - \text{Att vi förlorade matchen är synd} \quad \text{That we lost the match is a pity.}

The formal subject (FS) \text{det} must be inserted when there is a postponed or real subject (RS):

\text{Det (FS) sitter en hund (S) i vardagsrummet.}

There’s a dog sitting in the living room.

(Cf. \text{En hund sitter i vardagsrummet.})

#### 12.6.2 Finite verb

The finite verb (FV) is the verb which carries the tense, i.e. which indicates present or past time. The finite forms are, therefore, the present, past, imperative and subjunctive forms.

- \text{Han springer fort.} \quad \text{He is running fast.}
- \text{Han sprang fort.} \quad \text{He ran fast.}
- \text{Spring fortare!} \quad \text{Run faster!}

In two-verb constructions the finite verb is often a modal or modal equivalent verb:

- \text{De kan springa fort.} \quad \text{They can run fast.}
12.6.3 **Non-finite verb**

The non-finite verb (NFV) usually occurs together with a finite verb (12.6.2). Non-finite forms include the infinitive, supine, present participle and past participle.

- De kan springa fort. They can run fast.
- Vi har sprungit hela vägen. We have run the whole way.
- De kom springande nerför gatan. They came running down the street.
- Hunden är bortsprungen nu. The dog has run off now.

12.6.4 **Clausal adverbial**

1 The clausal adverbial (CA) modifies the sense of the clause as a whole. It is often a simple adverb:

- FV
- CA
- etc.
- Vi åker inte till Sverige på sommaren. = not
- alltid
- aldrig
- ofta
- sällan
- faktiskt
- ju
- = always
- = never
- = often
- = seldom
- = actually
- = of course

Cf. Word order in the English main clause:

- CA
- FV
- We never go to Sweden in the summer.

2 Clausal adverbials are also called ‘mobile qualifiers’ as they adopt different positions in the main clause compared with the subordinate clause (see 12.3, 12.6.9, 12.7.5, 12.8.2, 12.8.3(2)).

3 Notice the relative order when there are several clausal adverbials:

(a) Short modal adverbs: ju, nog, väl, då
(b) Short pronominal and conjunctional adverbs: alltså, därför, ändå
(c) Longer modal adverbs: verkligen, egentligen, faktiskt
(d) Negations: inte, aldrig

De har ju (1) därför (2) faktiskt (3) aldrig (4) rest utomlands. They have, you understand, therefore actually never been abroad.
Other adverbials (OA) comprise expressions of manner, place, time, cause, condition, etc. They are sometimes called *MPT-adverbials* for this reason, and often consist of a preposition + noun construction or of a subordinate clause:

- **Vi kommer med tåg.** We’re coming by train.  
  OA-manner

- **Vi kommer till Stockholm.** We’re coming to Stockholm.  
  OA-place

- **Vi kommer på torsdag.** We’re coming on Thursday.  
  OA-time

- **Vi kommer om vi har tid.** We’ll come if we have time.  
  OA-condition

- **Vi kommer när vi är lediga.** We’ll come when we are free.  
  OA-time

Notice that the relative order of OAs is usually (but not always):

- **Vi kommer med tåg** (Manner) **till Stockholm** (Place) **på torsdag** (Time) **om vi har tid** (Condition).
  We’re coming by train to Stockholm on Thursday if we have time.

If the adverbial of manner is long, however, the order may be PTM:

- **Han reser till Frankrike på sommaren med egen bil.**  
  He travels by car to France in the summer.

Some simple adverbs are also OAs:

- **Vi kom dit/hem/ut/bort/ner.**  
  We got there/home/out/down.

OAs usually come at the end of sentences but often begin main clauses. See 12.7.1.

Objects and complements

**Transitive verbs** (7.5.14) take a direct object:

- **Nils äter kakan.**

**Intransitive verbs** (7.5.14) take no object:

- **Nils sitter i soffan.**
The direct object (DO) – which goes in the object (O) position – may comprise:

- a noun phrase: *Någon stal hans bil.* Someone stole his car.
- a pronoun: *Anna kysste honom.* Anna kissed him.
- a subordinate clause: *Jag vet att han är där.* I know that he is there.

*Ditransitive* verbs possess both a direct and an indirect object (see 7.5.14).

The indirect object (IO) is usually a person for whose sake an action is undertaken:

<table>
<thead>
<tr>
<th>Jag gav studenten min bok.</th>
<th>Jag gav min bok till studenten.</th>
</tr>
</thead>
<tbody>
<tr>
<td>IO: studenten</td>
<td>DO: min bok</td>
</tr>
<tr>
<td>IO: gave</td>
<td>DO: gave</td>
</tr>
<tr>
<td>IO: the student</td>
<td>DO: my book</td>
</tr>
<tr>
<td>IO: gave the student</td>
<td>DO: gave my book to the student.</td>
</tr>
</tbody>
</table>

Notice that the order of the objects is usually as in English, i.e.:

- a prepositionless object precedes an object with a preposition:
  
  **Han lånade** 
  
  - prep: boken
  + prep: till Nils.
  
  He lent
  
  the book
  
  to Nils.

- if neither object has a preposition the indirect object precedes the direct object:
  
  **Han lånade** 
  
  - IO: Nils
  + DO: boken.
  
  He lent
  
  Nils
  
  the book.

The predicative complement (C) occupies the same position as the object (O), following the object if there is one. It is found in sentences with *copular* verbs such as: *vara, bli, heta, kallas, verka, tyckas, se . . . ut, utse . . . till, göra . . . till*. The complement agrees with the subject or object.

**Subject complements**

- *Olle och Mari är studenter.* Olle and Mari are students.
- *De blir säkert nervösa.* They will surely get nervous.

**Object complements**

- *Det gjorde honom besviken.* They made him disappointed.
- *De kallade Sture för Stumpen.* They called Sture ‘Stumpen’.
### 12.6.7 Verb particle

See compound verbs, 7.5.18. The verb particle (Part) occupies a position between the non-finite verb and the object/complement:

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>5a</th>
<th>6</th>
<th>7</th>
</tr>
</thead>
<tbody>
<tr>
<td>T</td>
<td>FV</td>
<td>S</td>
<td>CA</td>
<td>NFV</td>
<td>Part</td>
<td>O/C</td>
<td>OA</td>
</tr>
</tbody>
</table>

- Jag tycker – inte – om honom. (I don’t like him.)
- Har du aldrig tyckt om henne? (Have you never liked her?)
- Du kommer – nog att tycka om henne. (You will probably like her.)

Translations: I don’t like him. Have you never liked her? You will probably like her.

### 12.6.8 Passive agent

See passive, 7.5.17, 12.7.6. The passive agent (Agent) occupies a position between the object/complement and the other adverbial:

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>6a</th>
<th>7</th>
</tr>
</thead>
<tbody>
<tr>
<td>T</td>
<td>FV</td>
<td>S</td>
<td>CA</td>
<td>NFV</td>
<td>O/C</td>
<td>Agent</td>
<td>OA</td>
</tr>
</tbody>
</table>

- Han blev – inte omkörd – av bussen. (He was not overtaken by the bus.)
- Han beviljades – – avsked av styrelsen igår. (He was allowed to resign by the board yesterday.)

Translations: He was not overtaken by the bus. He was allowed to resign by the board yesterday.

2. Imorse hade han inte packat – väskan.
3. Vi ger – – – – Olle gåvan – ikväll.
6. och det är ju – – – roligt – – att spela tennis.
11. Far dödades – – – – – – under kriget.
12. De gifte sig aldrig.
13. Vi känner honom inte.

Translations: 1. He hadn’t packed the case this morning. 2. This morning he hadn’t packed the case. 3. We will give Olle the gift tonight. 4. Then they unfortunately got angry. 5. Two policemen have already arrived. 6. and it is of course fun to play tennis. 7. Sten used to kiss us, Maja and me. 8. but Nils, he’s not stupid, he isn’t. 9. They rang us up at home. 10. We were rung up by the Olssons at home. 11. Father was killed during the war. 12. They never married. 13. We don’t know him.

Key to table:

L(ink) = conjunction
X¹ = extra position
T-topic = any sentence element
F(inite) V(erb) = verb carrying the tense
S(subject) = includes reflexive pronoun, unstressed object
C(lausal) A(dverbial) = only with separable compound verbs
(Verb) Part(icle) = only with passive verbs
O(object) C(omplement) = manner, place, time, etc.

For details see section:
12.4 L(ink) = conjunction
12.5 X¹ = extra position
duplicate elements in the sentence
12.6.1 S(subject) = includes reflexive pronoun, unstressed object
12.6.2 F(inite) V(erb) = verb carrying the tense
12.6.3 N(on-) F(inite) V(erb) = infinitive, supine or participle
12.6.4 C(lausal) A(dverbial) = only with separable compound verbs
12.6.5 (Verb) Part(icle) = only with separable compound verbs
12.6.6 O(object) C(omplement) = manner, place, time, etc.
12.6.7 Agent = only with passive verbs

12.7.5 Sentences 7, 8
12.7.6 Sentence 9
12.7.7 Sentence 10
12.7 Moving elements within the main clause

12.7.1 Topicalization

1 The subject most frequently occupies the topic position, but it may be replaced by moving to the front almost any other sentence element. When the subject is not the topic it follows the finite verb.

<table>
<thead>
<tr>
<th>T</th>
<th>FV</th>
<th>S</th>
<th>CA</th>
<th>NFV</th>
<th>O</th>
<th>OA</th>
</tr>
</thead>
<tbody>
<tr>
<td>Han tänker – inte sälja bilen i år.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

New topic 1 (OA to topic):

I år tänker han inte sälja bilen. –

New topic 2 (O to topic):

Bilen tänker han inte sälja – i år.

Det tänker vi inte göra.

New topic 3 (CA to topic):

Inte tänker han – sälja bilen i år.

New topic 4 (Verb phrase to topic):

Sälja bilen tänker han inte (göra) – i år.

Note other possible topics:

Direct speech to topic:

Tusan! sa han.

Complement to topic:

Vacker var han inte.

Translations: He’s not thinking of selling the car this year. This year he’s not thinking of selling the car. (Lit.: The car he is not thinking of selling this year.) We’re not thinking of doing that. (Surely) he’s not thinking of selling the car this year! Selling the car (is something) he’s not thinking of doing this year. ‘Blast!’ he said. Beautiful he was not.

Topicalization of other adverbials (especially time, place) is by far the most frequent type:

Vi åkte till Lund i vår. → I vår åkte vi till Lund.

→ Till Lund åkte vi i vår.
The OA, topicalized or not, often consists of a subordinate clause:

\[
\text{Vi åkte till Lund när vi kom hem.} \quad \rightarrow \quad \text{När vi kom hem åkte vi till Lund.}
\]

*Translations*: We went to Lund last spring. Last spring we went to Lund. To Lund we went last spring. We went to Lund when we got home. When we got home we went to Lund.

2 Natural topics

Most natural topics are unstressed and represent familiar information or are used to link sentences together:

\[
\text{Vi behövde en semester, så i somras reste vi till Värmland.} \\
\text{Där träffade vi några gamla vänner. De har en stor villa.} \\
\text{Den har tio rum. Vi bodde där en hel vecka. Sedan måste vi tyvärr resa hem igen.}
\]

*Translations*: We needed a holiday, so last summer we went to Värmland. There we met some old friends. They have a big house. It has ten rooms. We lived there for a whole week. Then alas we had to come home again.

3 Emphatic topics

These are rarer and often represent new information. The following emphatic topics are either stylistically marked or used for contrast:

\[
\text{Förskräckligt är det. En tidning köpte vi också. Det kan jag aldrig tro på. I fjol dog han (inte i år). Springa efter flickor kan han, men studera vill han inte.}
\]

*Translations*: (Lit.: Terrible it is.) (Lit.: A newspaper we bought too.) That I can never believe. Last year he died (not this year). (Lit.: Run after girls he can, but study he will not.)

12.7.2 Weight principle

The weight principle is revealed in different structures in 12.7.3–12.7.7 below. It can be formulated as follows: unstressed familiar information (a short element) tends to be placed to the left in the sentence, while heavy new information (a long element) tends to be placed to the right in the sentence. Thus the balance in most sentences is ‘right-heavy’.
The principle means that elements losing their stress may move leftwards (+/– indicates +stress/ –stress):

\[
\begin{array}{cccccccc}
T & FV & S & CA & NFV & O/C & OA \\
\downarrow & \downarrow & \downarrow & \downarrow & \downarrow & \downarrow & \downarrow \\
\text{Han träffade henne aldrig.} & & & & \\
\text{He never met her.} & & & & \\
\end{array}
\]

\[
\begin{array}{cccccccc}
O/A & \rightarrow & \rightarrow & \rightarrow & \rightarrow & \rightarrow & \rightarrow \\
\text{Vi kunde – trots halkan köra – fort.} & & & & \\
\text{We could, despite the slippery conditions, drive fast.} & & & & \\
\end{array}
\]

Occasionally, as in the case of inte, this leftward movement is not accommodated within the positional scheme:

\[
\begin{array}{cccccccc}
T & FV & S & CA & NFV & O/C & OA \\
\downarrow & \downarrow & \downarrow & \downarrow & \downarrow & \downarrow & \downarrow \\
\text{Dricker inte Olle – vin?} & & & & \\
\text{Doesn’t Olle drink wine?} & & & & \\
\end{array}
\]

Some elements that are stressed, such as subjects introducing new information, may be postponed (moved rightwards):

\[
\begin{array}{cccccccc}
T & FV & S & CA & NFV & O/C & OA \\
\downarrow & \downarrow & \downarrow & \downarrow & \downarrow & \downarrow & \downarrow \\
\text{Det har inte kommit några brev idag.} & & & & \\
\text{No letters have come today.} & & & & \\
\end{array}
\]

\[
\begin{array}{cccccccc}
S(IP/subcl)+ \rightarrow \rightarrow \rightarrow \rightarrow \rightarrow S(IP/subcl)+ \\
\text{Det är – – – tråkigt – att få vänta på brev.} & & & & \\
\text{It’s annoying having to wait for letters.} & & & & \\
\end{array}
\]

Notes:

(NP = indefinite noun phrase, IP = infinitive phrase, subcl = subordinate clause) see 12.7.7.

Det (place holder subject) replaces the subject in this case.
In passive transformation both leftward and rightward movements occur simultaneously:

<table>
<thead>
<tr>
<th>T</th>
<th>FV</th>
<th>S</th>
<th>CA</th>
<th>NFV</th>
<th>O/C</th>
<th>Agent</th>
<th>OA</th>
</tr>
</thead>
<tbody>
<tr>
<td>A–</td>
<td>B+</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*En flicka körde* – – lastbilen.
A girl drove the truck.

*Lastbilen kördes* – – – av en flicka.
The truck was driven by a girl.

### 12.7.3 Adverbial shift

The OA may occupy the OA or T positions, but may also be moved to the CA position in order to leave an element in the final stressed position:

- **Han utnämndes till generalsekreterare i FN 1953 (OA).**
  - He was appointed Secretary General of the United Nations in 1953.

- **Han utnämndes 1953 (OA) till generalsekreterare i FN.**
  - He was in 1953 appointed Secretary General of the United Nations.

Moving the OA leftwards may make the expression more formal:

- **Han har stannat hemma under de senaste dagarna (OA).**
  - He has stayed home over the past few days.

- **Han har under de senaste dagarna (OA) stannat hemma.**
  - He has over the past few days stayed home.

- **Jag brukar tillbringa semestern i Spanien varje år (OA).**
  - I usually spend the holidays in Spain every year.

- **Jag brukar varje år (OA) tillbringa semestern i Spanien.**
  - I usually every year spend the holidays in Spain.

### 12.7.4 Unstressed objects

Unstressed object pronouns and reflexive pronouns often move leftwards into the subject position. This occurs only with a simple verb (present, past).
### 12.7.5 Position of inte

The position of inte (and icke, ej, aldrig as well as other clausal adverbials) varies. In the main clause inte comes immediately after the finite verb or subject (see 12.3, 12.6.4):

- **Peter kommer inte idag.** Peter isn’t coming today.
- **Idag kommer Peter inte.** Today Peter isn’t coming.
- **Idag har Peter inte kommit.** Today Peter hasn’t come.

In the subordinate clause inte comes immediately before the finite verb (see 12.8.2):

- **Olle sa, att Peter inte kommer idag.**
  
  SIV = subject-inte-verb
  
  Olle said that Peter isn’t coming today.

One exception to this word order in the main clause has been shown in 12.7.4, where the unstressed object intrudes between the verb and inte. Another exception is found in cases like the following:

- **Idag kommer inte ’Peter (men Olle kommer).**
  
  cf. **Idag kommer Peter ’inte (men han kommer imorgon).**

Here inte precedes the subject in a main clause so that Peter remains in the stress position at the end of the sentence.
Other cases in which inte is moved from its usual position result from a desire to restrict its effect from negating the entire clause to negating only a word or group of words:

\[
\text{Alla pojkar ljuger inte.} = \begin{cases} \text{either: Some boys do not lie.} \\ \text{or: No boys lie.} \end{cases}
\]

\[
\text{Inte alla pojkar ljuger.} = \text{Not all boys lie(, but some do).}
\]

### 12.7.6 Passive transformation

By transforming the active verb into a passive form, elements may be moved radically within the clause:

- **Active verb**: Eleverna (S) tyckte mycket om henne (O).
  - The pupils liked her a lot.
- **Passive verb**: Hon (S) var mycket omtyckt av eleverna (Agent)
  - (men inte av kollegorna).
  - She was much liked by the pupils (but not by her colleagues).

Passive transformation can be used in either main or subordinate clauses (cf. topicalization, 12.7.1). For the position of elements in the passive sentence, see 12.6.9, examples 10, 11.

### 12.7.7 Existential sentence

If we do not wish to introduce a subject containing new, heavy information too soon, we can postpone the subject (i.e. move it rightwards in the sentence), but must then fill the topic position in a statement with a formal subject (place holder subject):

- **En polis sitter i köket.** → **Det sitter en polis i köket.**
  - Subject
  - A policeman is sitting in the kitchen.

- **Att sluta röka är svårt.** → **Det är svårt att sluta röka.**
  - Subject
  - Stopping smoking is difficult.

<table>
<thead>
<tr>
<th></th>
<th>Formal</th>
<th>Real</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject</td>
<td>subject</td>
<td>subject</td>
</tr>
<tr>
<td>There’s a policeman sitting in the kitchen.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
**Type 1**: When the real subject is an indefinite noun phrase (like *en polis*) then it occupies the O/C position.

\[
\begin{array}{cccccccc}
T & FV & S & CA & NFV & O/C & OA & X^2 \\
\hline
Det & finns & – & – & – & ingen ketchup & hemma. \\
Det & sitter & – & ofta & – & en polis & i köket. \\
Sitter & det & ofta & – & en polis & i köket? \\
\end{array}
\]

*Translations*: There’s no ketchup in the house. There’s often a policeman sitting in the kitchen. Is there often a policeman sitting in the kitchen?

The verb in Swedish existential sentences is always intransitive, and usually expresses:

- Existence: *finnas*
- Non-existence: *fattas, saknas*
- Location: *vara, sitta, stå, ligga*
- Motion: *komma, gå*

In English the only corresponding constructions are: ‘there is/are -ing’.

**Type 2**: When the real subject is an infinitive phrase (like *att sluta röka*) then it occupies the X^2 position (see 12.5, 12.6.1):

\[
\begin{array}{cccccccc}
T & FV & S & CA & NFV & O/C & OA & X^2 \\
\hline
Det & har & alltid & varit & en gåta för mig & varför han fick nobelpriset. \\
\end{array}
\]

*Translations*: It is probable that he will win. It’s always been a mystery to me why he got the Nobel Prize.

Note that in this case *det* = ‘it’.
In order to emphasize an element together with the action of the verb, that element (W) may be extracted from the sentence and inserted into the construction:

\[ \text{Det är/var (W) som } \ldots \]

The remainder of the original sentence is downgraded and relegated to the som-clause added onto the end:

Cf. \text{Anders skickade mig en bok förra veckan.}
Anders sent me a book last week.

\[ \rightarrow \text{Det var en bok (W) som Anders skickade mig förra veckan (inte en CD-skiva)} \]

\[ \rightarrow \text{Det var Anders (W) som skickade mig en bok förra veckan (inte Göran)} \]

\[ \rightarrow \text{Det var förra veckan (W) som Anders skickade mig en bok (inte den här veckan)} \]

\text{Translations:} \text{It was a book that Anders ... It was Anders who ... It was last week that ...}

The cleft sentence is also very common in questions:

\text{Var det oppositionsledaren (W) som kritiserade regeringen?}
Was it the Leader of the Opposition who criticized the government? (cf. \text{Kritiserade oppositionsledaren regeringen?})

\text{Är det jag (W) som måste bestämma?}
Is it me who must decide?

\text{Är det öl (W) som han dricker?}
Is it beer he’s drinking?
12 Subordinate clauses

12.8 Subordinate clauses

12.8.1 Subordinate clause as an element in the main clause sentence

Subordinate clauses usually constitute the subject, object or other adverbial in a main clause sentence. As such they may occupy several different positions. In looking at the main clause in this way we can talk of first stage analysis (cf. 12.8.2):

<table>
<thead>
<tr>
<th>T</th>
<th>FV</th>
<th>S</th>
<th>CA</th>
<th>NFV</th>
<th>O/C</th>
<th>OA</th>
<th>X^2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject clause:</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Att du är frisk gläder – – – mig.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Det gläder – – – mig – att du är frisk.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Object clause:</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Han sa – inte – – igår att han skulle bort.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Att han skulle bort sa han inte – – igår.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Adverbial clause:</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Vi åker – – – – när han kommer.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>När han kommer åker vi.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Translations: That you are better pleases me. It pleases me that you are better. He didn’t say yesterday that he was going away. (Lit.: That he was going away he didn’t say yesterday.) We’ll leave when he comes. When he comes we’ll leave.

Adverbial clauses also begin with: därför att, eftersom, fast(än), innan, medan, om, sedan, trots att.

Note that:

(a) Subject and object clauses occupy the T or X^2 positions.
(b) Most adverbial clauses (time, condition, cause) occupy the T, CA or OA positions.
(c) Some adverbial clauses (result) may only occupy the OA position:
2 A relative clause usually functions as an attribute to a noun (subject, object) and begins with the indeclinable som (där, dit):

**Han tittade på flickorna (O) som satt på bänken.**
He looked at the girls who were sitting on the bench.

**Filmen (S) som vi gick på var fantastisk.**
The film that we went to was fantastic.

3 An independent clause is a subordinate clause which stands alone as a sentence and does not form part of a larger main clause sentence. It is usually an exclamation or wish:

**Om du bara visste – allt!**
If you only knew everything! (Lit.: That you don’t get tired!)

**Att ni inte blir – trötta!**
That you don’t get tired!

### 12.8.2 Subordinate clause structure

Subordinate clauses (which may be elements in main clause sentences) also possess an internal structure of their own. In looking at this we may talk of second stage analysis (cf. 12.8.1):
Notice the following characteristics of the subordinate clause:

1. There is *no* topic in the subordinate clause; the order is always: conjunction – subject – CA – finite verb, i.e.
   - the clause always begins with a subordinating conjunction or other subordinator (see 11.2 f).
   - the clausal adverbial comes before the finite verb. (Remember S-I-V: Subject – Inte – Verb, 12.7.5)
   - the word order is straight (S-FV).

2. The subject position is always occupied.

3. The conjunction *att* may sometimes be omitted.

4. The auxiliary *har/hade* may be omitted when there is a supine (in the NFV position). This omission of *har* is common in written Swedish, unusual in normal spoken Swedish.

5. Notice also that the adverbial splits the infinitive in Swedish:

   **Fredrik lovade (att) inte (CA) säga något.**
   Fredrik promised not to say anything.

   **Jag hoppas (att) snart (CA) få träffa dig igen.**
   I hope to meet you again soon.
Jag hoppas att i min nuvarande ställning (OA) fortsätta att tjäna mitt land.
I hope in my present position to continue to serve my country.

12.8.3 Three types of subordinate clause with main clause structure

These are all exceptions, in different ways, to 12.8.2 above, in that the subordinate clause forms part of a main clause sentence (cf. 12.8.1) but has a word order that is similar to that of the main clause (see 12.3).

1 Att-clauses with a ‘topic’:
When a non-subject comes immediately after the conjunction att, the finite verb and subject are inverted:

Fredrik sa, att igår tänkte han åka till stan.
Fredrik said that yesterday he was thinking of going to town.

2 Att-clauses with FV-CA order:
In some cases the clausal adverbial adopts the same position as in the main clause, i.e. after the finite verb, rather than its usual subordinate clause position before the finite verb:

Fredrik sa, att han tänkte inte åka idag.
Fredrik said that he was not thinking of leaving today.

This is only found in spoken Swedish.

Fredrik sa, att han inte tänkte åka idag.

An explanation for this order is that the att-clause is regarded as a statement in direct speech, i.e. as a main clause. Cf.:

Fredrik sa: 'Jag tänker inte åka idag'.
Fredrik said 'I am not thinking of leaving today'.

The conjunction att then functions almost as a colon.

3 Conditional clauses with yes/no question order:
Conditional clauses are usually introduced by om or ifall:

Om du inte skriver till mor, blir hon ledsen.
If you don’t write to Mum, she will be upset.
But conditional clauses are also found which possess no subordinating conjunction, and rely on inverted word order (FV-S) to indicate condition:

Skriver du inte till mor, blir hon ledsen.

cf. Skriver du inte till mor? (Yes/no question)

Clauses of this type also occur in English:

Had I known when you were arriving, I would have waited.
Hade jag vetat när du skulle komma, skulle jag ha väntat.

Were you to agree to this, it would be disastrous.
Skulle du gå med på detta, vore det katastrofalt.

12.9 Differences between Swedish and English word order

12.9.1 Major word order and sentence structure problems – summary

A number of aspects of word order are similar in Swedish and English. This summary concentrates only on the differences.

Key:  S = subject  FV = finite verb  CA = clausal adverbial
      T = sentence element (non-subject) which may come first in the sentence
      W = word(s) moved for emphasis or presented as a new subject

1 Main clause – inversion (12.2 ff, 12.6.9, 12.7.1)

Swedish: S – FV – T
         Vi åker hem nu.

English: S – FV – T
         We're going home now.

In Swedish non-subjects often come first in the main clause, and this causes inversion of subject and finite verb.

T – FV – S
Nu åker vi hem.

T – S – FV
Now we're going home.

In English the order is usually subject – verb. (cf. however: Up went the lift.)
2 Main clause – adverb(ial)s (i.e. inte, aldrig) (12.2–12.5, 12.6.4, 12.7.5)

S – FV – CA  
De leker aldrig.  
They never play.

In main clauses in Swedish the clausal adverbial (adverb) usually comes immediately after the finite verb. In English it usually comes immediately before the finite verb.

3 Subordinate clause – adverb(ial)s (i.e. inte, aldrig) (12.7.5, 12.8.2)

S – CA – FV  
De sade, att de inte hade skrivit.  
They said that they had not written.

S – FV – CA  
De vet att jag aldrig dricker.  
They know I never drink.

In subordinate clauses in Swedish the clausal adverbial (adverb) always comes immediately before the finite verb.

Remember: S-I-V : Subject – Inte – Verb. In English the position varies.

4 Adverbs split the infinitive (12.8.2)

att – CA – NFV(inf)  
Vi bad honom att genast sluta röka.  
We asked him to stop smoking immediately.

to – NFV(inf) – CA  
We asked him to stop smoking immediately.

5 Emphasizing part of a clause (12.7.8)

A word or words to be emphasized (W) may be extracted from a clause and placed in this special construction. The rest of the sentence is downgraded to a subordinate clause after som. W can represent most elements in a Swedish clause.

Base clause  
Anders skickade mig en bok förra veckan.  
Anders sent me a book last week.

Det är/var (W) som . . .  
Det var en bok som Anders skickade mig förra veckan.

Vem/Vad är det som . . .?  
Vem var det som skickade mig en bok . . .?  
Vad var det som Anders skickade mig . . .?
Var det (W) som . . .? Var det en bok som Anders skickade mig . . .?
Var det Anders som skickade mig en bok . . .?
Var det förra veckan som Anders skickade mig en bok?

6 Presenting a new subject (12.7.7)

S – FV
En polis sitter i köket.
A policeman is sitting in the kitchen.

Det – FV – S
Det sitter en polis i köket.
There is a policeman sitting in the kitchen.

Questions:

FV – det – S
Sitter det ofta en polis i köket?
Is there often a policeman sitting . . .?

S – V – O – CA
Jag känner honom inte.
I don’t know him.

7 Objects, etc., with and without stress (12.7.4)

S – FV – CA – O
Jag känner inte honom.
I don’t know him.

S – V – O – CA
Jag känner honom inte.

When objects lose their stress in Swedish they move left in the sentence. In English voice stress is used.

8 Verb particles (12.6.7)

S – FV – Part – O
Jag ringde upp honom igår.
I rang him up yesterday.

Vi kastade bort dem.
We threw them away.

In Swedish the particle precedes the object pronoun. In English the particle always follows the object pronoun.
Chapter 13

Word formation

The lexicon of Swedish is constantly being altered by four main processes:

1. **Borrowing:** French ‘pièce’ → Swedish **pjäs** play
2. **Compounding:** ett hus + ett tak → **ett hustak** house roof
3. **Affixation:** o- + lycklig → olycklig unhappy
4. **Abbreviation:** **fotografi** → foto photo

Borrowing from other languages involves the eventual assimilation of a loanword into the Swedish system of orthography, pronunciation and inflexion.

### 13.1 Compounding

1. The first element of a compound may be a noun, adjective, verb, pronoun, numeral, adverb, preposition or word group, while the second element is usually a noun, adjective or verb:

   | Noun + noun: | bilresa | Verb + noun: | åksjuka |
   |             | car journey | travel-sickness |
   | Noun + adjective: | hjärtlös | Verb + adjective: | körklar |
   |             | heartless | ready to drive |
   | Noun + verb: | soltorka | Verb + verb: | frystorka |
   |             | sun dry | freeze dry |

   For separable and inseparable compound verbs (particle verbs) see 7.5.18.

2. Compound nouns may be formed by four main methods:

   Notice that the second element in compounds determines the gender and inflexion of the compound.
New compounds formed by this last method are very rare.

Whether or not -s- is used as a link between nouns depends to some extent on the form of the elements (first element = FE). Generally speaking the following have s-link:

- Nouns whose FE ends in -(n)ing, -ling, -an, -nad, -(i)tet, -(a)tion, -het:
  
  vandringsled       long distance footpath
  älsklingsrätt      favourite dish
  självkostnadspris  cost price
  stationsinspektor  station master
• Nouns whose FE is itself a compound:

cf. fot + boll \(\rightarrow\) fotboll
fotboll + s + lag \(\rightarrow\) fotbollslag
football team football team

Others:

skolboksförlag schoolbook publisher
ordbildningslära word-formation theory
daghemsföreståndare day-nursery supervisor
bilbärgningskår car-breakdown service
järnvägsövergång railway crossing

### Affixation

Affixation is carried out by adding a *prefix* or *suffix* to a *stem*. Whilst prefixes do not alter the word class or inflexion of the stem, suffixes are often employed for this very purpose:

<table>
<thead>
<tr>
<th>cf.</th>
<th>noun stem</th>
<th>verb suffix</th>
<th>→</th>
<th>noun stem</th>
<th>noun suffix</th>
<th>→</th>
</tr>
</thead>
<tbody>
<tr>
<td>o-</td>
<td>vän</td>
<td>-het</td>
<td>→ ovän</td>
<td>vänlig</td>
<td>vänlighet</td>
<td>→</td>
</tr>
<tr>
<td>negative prefix</td>
<td>noun stem</td>
<td>noun suffix</td>
<td>noun</td>
<td>adjective stem</td>
<td>noun</td>
<td>friendliness</td>
</tr>
<tr>
<td>‘un-’</td>
<td>friend</td>
<td></td>
<td>enemy</td>
<td>friendly</td>
<td></td>
<td></td>
</tr>
<tr>
<td>färg</td>
<td>+ -a</td>
<td>→ färga</td>
<td>verb</td>
<td>colour</td>
<td>verb</td>
<td>to colour</td>
</tr>
</tbody>
</table>

Generally speaking prefixes and suffixes are much vaguer and simpler in meaning than the stems they modify.
1 Prefixes: What follows is a list of some frequent examples only.

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Meaning</th>
<th>Example</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Negative and pejorative</td>
<td>o-</td>

<td>-ris</td>
<td>servitris waitress</td>
</tr>
<tr>
<td>(b) Nouns denoting activity</td>
<td>-(n)ing</td>
<td>skrivning examination</td>
</tr>
<tr>
<td></td>
<td>-ande</td>
<td>skrivande writing</td>
</tr>
<tr>
<td></td>
<td>-an</td>
<td>början beginning</td>
</tr>
</tbody>
</table>
3 Productive and non-productive affixes:

Productive affixes are those still being used to form derivatives whose meaning can easily be predicted from the form:

- **-bar** = possible to, therefore: **tänkbar** = possible to think, **användbar** = possible to use, etc.
Non-productive affixes are those no longer used to form derivatives:

- **-lek**: kärlek, storlek, etc.

Non-productive affixes may have been borrowed with many loanwords but have never been used to form any indigenous derivatives, e.g.:

Latin **kon-**: konflikt, konsonant.

### 13.3 Abbreviation

1. Abbreviation involves the loss of a morpheme or part of a morpheme:

<table>
<thead>
<tr>
<th>Whole morpheme lost</th>
<th>Part morpheme lost</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) Initial reduction</td>
<td>(bi)cykel</td>
</tr>
<tr>
<td></td>
<td>bicycle</td>
</tr>
<tr>
<td>(b) Final reduction</td>
<td>bio(graf)</td>
</tr>
<tr>
<td></td>
<td>cinema</td>
</tr>
<tr>
<td></td>
<td>livs(medelsaffär)</td>
</tr>
<tr>
<td></td>
<td>grocery shop</td>
</tr>
<tr>
<td></td>
<td>foto(grafi)</td>
</tr>
<tr>
<td></td>
<td>photograph</td>
</tr>
<tr>
<td>(c) Medial reduction</td>
<td>te(kopps)fat</td>
</tr>
<tr>
<td></td>
<td>saucer</td>
</tr>
</tbody>
</table>

2. Reduction + -is, -a(n) in colloquial Swedish:

- kond(itori) + is → kondis mor + a → morsa
  - café mother
- dag(hem) + is → dagis syster + a → syrra
  - day nursery sister
- grat(ulerar) + is → grattis Margareta + a → Maggan
  - congratulations
- god(saker) + is → godis Elisabeth + a → Bettan
  - sweets
3 Hypocorism:

Pet names for boys are often formed by shortening the vowel and adding -e:

**Karl** → **Kalle**; **Nils** → **Nisse**; **Jan** → **Janne**; **Lars** → **Lasse**; **Olof** → **Olle**

4 Acronyms:

When the reduction leaves only an initial letter for each element an acronym results:

(a) Alphabetisms: **bh** (= bysthållare), brassiere; **TV**; **VM** (= världsmästerskap), world championship.
(b) Respelling of alphabetisms: **behå**, **teve**.
(c) Acronyms pronounced as words: **SAAB** [sɑ:b], **ASEA** [aɛ:a], **NATO** [nɔ:tɔ], **SAS** [sas].
(d) Hybrid forms: **p-plats** (parkeringsplats), car park; **T-bana** (tunnelbana), underground.

### 13.4 List of common abbreviations

These abbreviations are often found without full stops.

14.1 Small or capital letter?

1 Capital letters are used in Swedish in the same way as in English in the following cases:

(a) At the beginning of a sentence.
(b) After a colon in direct speech:  Herren sade: ”Varde ljus.”
(c) In proper names:
   Ingvar Andersson, Volvo,
   Kungsgatan, Malmö, Danmark,
   ”Fadren” av August Strindberg.
   Gud, Herren,
   Hans Majestät
   Konungen

2 Small letters are used in Swedish in many cases where English has a capital:

(a) In the names of weekdays, months, seasons and festivals:

   måndagen den 6:e juni   Monday the 6th of June
   jul, påsk, pingst, midsommar   Christmas, Easter, Whitsun, Midsummer

(b) In nouns and adjectives denoting nationality, language, religion, political affiliation and those deriving from a place name:

   Han är tysk men talar svenska. He is German, but speaks Swedish.
   Karl läser en dansk roman. Karl’s reading a Danish novel.
   Sven är socialdemokrat. Sven is a Social Democrat.
   Lars är stockholmare. Lars is a Stockholmer.
(c) In titles with names:

Jag har träffat herr Lind, fru Lind, doktor Olsson och ingenjör Ek.
I've met Mr Lind, Mrs Lind, Doctor Olsson and Mr Ek, the engineer.

3 Swedish has a capital only in the first word in names consisting of two or more words (unless any of the subsequent words is itself a proper noun):

- **Den helige ande** the Holy Spirit
- **Peter den store** Peter the Great
- **Svarte Rudolf** Black Rudolf
- **Svenska akademien** the Swedish Academy
- **Förenta staterna** the United States
- **Republiken Sydafrika** the Republic of South Africa

This applies also to titles of works of art:

- **Röda rummet** The Red Room
- **Gamla testamentet** the Old Testament
- **Sommaren med Monika** Summer with Monika

*Exceptions*: include street names in two or more words (Södra Vägen, Östra Hamngatan) and certain other familiar names:

- **Kungliga Biblioteket** the Royal Library
- **Sveriges Radio** Swedish Radio

4 Swedish compound nouns usually have a capital letter on the first element if the second element is a proper noun:

- **Sydamerika** South America
- **södra England** Southern England
- **Nordsverige** Northern Sweden
- **norra Sverige** Northern Sweden
- **Mellaneuropa** Central Europe
- **Storstockholm** Greater Stockholm
5 Swedish sometimes has capital letters in correspondence for Ni, Er and occasionally for Du, Dig, Din, though these are falling out of use. (See 5.2, 5.7.)

6 In Swedish a new line of poetry or song does not automatically begin with a capital letter. In most instances capitals are used in poetry and song in the same way as in text.

## 14.2 Spelling of words ending in -m, -n

1 Final -m is not doubled even after a short vowel:

\[
\begin{align*}
dum, & \quad hem, \quad rum, \quad program, \quad Glöm\ det! \quad \text{Forget it!} \\
\end{align*}
\]

*Exceptions:* damm, lamm

2 Final -n is not doubled in many words even after a short vowel:

\[
\begin{align*}
\text{man, din, vän, in, igen, kan, men, min, mun, män, än, sin, sen} \\
(\text{sedan})
\end{align*}
\]

*Exceptions:* grann, sann, tunn, fann (←finna), hann (←hinna), känn (←känna)

3 Between vowels -m, -n are always doubled after a short vowel:

\[
\begin{align*}
\text{hem} & \rightarrow \text{hemmet} & \text{rum} & \rightarrow \text{rummet} \\
\text{man} & \rightarrow \text{mannen} & \text{vän} & \rightarrow \text{vänner} \\
\text{dum} & \rightarrow \text{dumma} & \text{allmän} & \rightarrow \text{allmänna} \\
\text{in} & \rightarrow \text{inne} & \text{fram} & \rightarrow \text{framme}
\end{align*}
\]

4 A word containing -mm- or -nn- drops one -m or -n when a consonant is added in an inflected form, e.g. an adjective in the neuter form or a verb adding a weak past tense ending.

\[
\begin{align*}
\text{ett nummer} & \rightarrow \text{numret} & \text{tunn} & \rightarrow \text{tunt} \\
\text{glömma} & \rightarrow \text{glömt} & \text{en sommar} & \rightarrow \text{somrar} \\
\text{gammal} & \rightarrow \text{gamla} & \text{känna} & \rightarrow \text{känt}
\end{align*}
\]

*Exceptions:*

(a) Before the s-genitive: ett lamms svans
(b) Before the s-passive: det känns varmt
(c) Before a suffix: kännbar, tunnhet
(d) In compounds: tunnbröd, dammkorn
In many cases English and Swedish punctuation is similar. Only the main points and major differences are listed in the paragraphs below.

15.1 The comma

The comma is generally used:

(a) Between main clauses in the same sentence, if it is necessary for clarification:

Landslaget vann matchen, och alla gick hem glada.
The national team won the match, and everyone went home happy.

(b) Around any words that are parenthesized or in apposition:

Många små fabriker, såsom Åkerströms, har stängt.
Many small factories, such as Åkerströms, have closed.

Bo Hansson, Malmö FF, var landslagets bästa spelare.
Bo Hansson, Malmö FF, was the best player in the national team.

(c) To mark off exclamations:

Janne, kan du komma ett tag?
Janne, can you come here a moment?

Ja, det kan jag! Yes, I can!

(d) In decimals:

5,5 procent 5.5 %

Note:
In contrast to English, no comma is used to separate millions, thousands, etc. in expressions such as:

3 000 [tretusen] 3,000 [three thousand]
The comma is not generally used:

(a) Before **att** clauses, unless both clauses are long:

- **Han sa att han var sjuk.** He said that he was ill.

(b) Before subordinate clauses where the subordinator is omitted:

- **Han sa han skulle komma.** He said (that) he would come.
- **Bussen han skulle åka med kom aldrig.** The bus (that) he was going to come on never arrived.

(c) Around adverbs:

- **Detta är emellertid osäkert.** This is, however, uncertain.

(d) After introductory or closing phrases in letters:

- **Bäste herr Jansson!** Dear Mr Jansson,
- **Med vänlig hälsning** With kind regards,

15.2 **The full stop**

The full stop ends a sentence which comprises a statement. It is often omitted in common abbreviations: **t ex, t o m.** See also 13.4.

15.3 **The colon**

The colon is used in the following ways:

1 As in English, before lists, examples, explanations and summaries.

2 Unlike English, before quotations, dialogue or thoughts in direct speech introduced by a verb such as ‘said’. In this case the word after the colon has an initial capital letter:

- **Han frågade: – Vad gör du här?**
  He asked, ‘What’re you doing here?’

  **Jean: I kväll är fröken Julie galen igen; komplet galen!**
  Jean: ‘Tonight Miss Julie is crazy again, quite crazy!’
3 In some numerical expressions and a few abbreviations (see also 13.4):

- **50:95**  
  50 kronor 95 öre
- **S:t (= Sankt)**  
  St (Saint)

4 Before all kinds of endings added to a figure, a letter, an acronym, etc.:

- **25:an**  
  the number 25 (bus, tram, etc.)
- **Gustaf III:s död**  
  the death of Gustaf III
- **LO:s regler**  
  the rules of LO (the Swedish Trade Union Confederation)

### 15.4 The exclamation mark

This is used more widely in Swedish than in English. It is frequently found after exclamations, greetings, commands, imperatives and warnings:

- **Mina damer och herrar!**  
  Ladies and gentlemen.
- **Vad vackert det var här!**  
  How beautiful it is here!
- **Lycka till!**  
  Good luck!
- **OBS!**  
  N.B.

### 15.5 The apostrophe

1 The apostrophe is *not* used with the genitive -s, unlike English (see 3.7.1):

- **pojkens far**  
  the boy’s father
- **pojkarnas far**  
  the boys’ father

2 The apostrophe is used to show the omission of letters:

- **'dag, ropa' han.**  
  G’day, he shouted.

**Note:**

There is no apostrophe in the following short forms:

- **dan (← dagen), stan (← staden), sa (← sade), ska (← skall), nån (← någon)**
Direct speech conventions

The most common Swedish convention for indicating direct speech in printed Swedish is the use of a dash (‘pratminus’) before each speaker’s comments. If the words indicating direct speech immediately precede the direct speech, a colon is used instead of the English comma (see 15.3 above):

Polisen frågade: – Vad heter du?
– Martin, kom svaret.
– Och var bor du?

Also used in printing is the guillemet:

»Vad heter du?«

Also used in manuscript is:

”Vad heter du?”

Note that the form of the inverted commas in Swedish (”…”) differs from that in English (“…”).

The hyphen

The hyphen is used:

1. In some compound proper nouns:
   Karl-Erik, Peterson-Berger, Malmö-Köpenhamntåget

2. In cases where two first elements share a common second element:
   sön- och helgdagar = söndagar och helgdagar
   bok- och pappershandel = bokhandel och pappershandel

3. In compounds with icke-:
   icke-rökare = non-smoker
   icke-spridningsavtal = non-proliferation treaty

4. In compounds where the first element is an acronym. See also 13.3(4):
   LO-kongressen = the Swedish Trades Union Congress
   T-banan = the Stockholm underground
5 In compounds where the first element is a number. For compounding see 13.1:

en 50-öring, 1980-talet

6 In certain compounds which would otherwise be too long or complex:

gör-det-själv-kampanjer, öga-för-öga-principen
This section deals briefly with some constructions and word choices generally found only in written or only in spoken Swedish. For a general account of pronunciation, see Chapters 1 and 2; for a few specific peculiarities of pronunciation, see Sections 1.2.10–1.2.11; for some syntax differences between spoken and written Swedish, see 12.8.3(2).

### 16.1 Words frequently omitted in spoken Swedish

1. **Subordinating conjunction att after verbs of saying, thinking, perceiving:**
   
   *Hon sa hon hade läst brevet.*  
   
   She said she’d read this letter.

2. **Relative pronoun som as object:**
   
   *Mannen jag pratade med heter Jansson.*  
   
   The man I spoke to is called Jansson.

   *cf. Mannen (subject) som kom heter Johansson.*  
   
   The man who came is called Johansson.

3. **Verbs of motion after a modal auxiliary:**
   
   *Jag måste till Lund idag.*  
   
   I have to go to Lund today.

   *De ville hem.*  
   
   They wanted to go home.

   *Vi ska bort.*  
   
   We are going away.

4. **The pronoun jag when in an initial unstressed position:**
   
   *Hade tänkt vi skulle på bio.*  
   
   Thought we might go to the cinema.
16.2 Words and constructions frequently inserted in spoken Swedish

The following usages are more common in spoken than in written Swedish:

1 Formal subject (see 12.6.1, 12.7.7):
   
   \textit{Det satt två gubbar på en bänk.} \quad \text{There were two old men sitting on a bench.}
   
   (cf. \textit{Två gubbar satt . . .} \quad \text{Two old men were sitting . . .})

2 Cleft sentence (see 12.7.8):
   
   \textit{Det var han som tog pengarna.} \quad \text{It was him who took the money.}
   
   (cf. \textit{Han tog pengarna.} \quad \text{He took the money.})

3 Duplication (see 12.5):
   
   \textit{Han som står därborta, honom känner jag.} \quad \text{Him standing over there, I know him.}
   
   \textit{Jag har inte varit där, inte.} \quad \text{I haven’t been there, I haven’t.}

4 Supplementary \textit{du} in commands:
   
   \textit{Kom hit, du!} \quad \text{Come here! (See 7.5.13)}

5 Supplementary så and då:
   
   (a) After an adverbial as topic:
   
   \textit{Förr i tiden, så/då hade man inte TV.} \quad \text{In the old days we didn’t have TV.}
   
   (b) After a subordinate clause as topic, introduced by när, om, sedan:
   
   \textit{När han kommer, så kan vi börja.} \quad \text{When he arrives, (then) we can start.}

6 The particles \textit{ju}, \textit{nog}, \textit{väl}, \textit{nämligen}

These adverbs are used in speech to alter the sense of a statement subtly by indicating the speaker’s/listener’s (likely) reaction to it. See 8.4(7).
Some words and constructions found in written Swedish may sound stilted in informal written or in spoken Swedish. In the table below somewhat less formal alternatives are suggested:

</tbody>
</table>
Anders reste sig, och det gjorde även Bertil.

Anders got up, as did Bertil.

De gjorde såsom de hade blivit befallda.

They did as they had been told.
This list comprises only those terms that may not be familiar to a student of language or those that are not already explained in the text. In some cases these are not directly transferable to English grammar.

**Abstract Nouns** refer to nouns expressing unobservable notions, e.g. svårighet, musik, påstående, difficulty, music, assertion.

**Adjective Phrase** consists of an adjective or a participle with optional words which modify or limit its meaning, e.g. Han är (ganska) dum, He is (rather) silly.

**Adverb Phrase** consists of an adverb with optional words which modify or limit its meaning, e.g. Han körde (ganska) fort, He drove (quite) fast.

**Adverbial** (see clausal adverbial, other adverbials)

**Affix** is a prefix added to the beginning, or suffix added to the end, of a word, e.g. olycklig, unhappy; godhet, goodness.

**Agent** is the person or thing carrying out the action. In a passive construction it is realized through an av phrase, e.g. Bilen kördes av inspektören, The car was driven by the inspector.

**Agreement** is a way of showing that two grammatical units have a certain feature in common, e.g. mina hundar, my dogs (plural); slottet är stort, the castle is big (neuter).

**Appositive** means standing in apposition.

**Apposition** is where two noun phrases describe the same phenomenon, e.g. Olle, min bror, är sjuk, Olle, my brother, is ill.

**Assimilation** is the process whereby a sound changes to become more like or identical with another sound, e.g. pronunciation of min bror as [mimbro:r] where [n] changes to [m] before [b]. The two sounds may merge completely, as in the case of -d in the past tense of the verb använda + -de → använde.
ATTRACTION is a grammatical error often caused by the speaker’s losing sight of the true AGREEMENT and becoming distracted by another word, e.g. Typiskt för detta barn är en viss blyghet, Typical of this child is a certain shyness. This should read Typisk to agree with non-neuter (en) blyghet.

ATTRIBUTIVE is used to describe adjectives that precede the noun and modify it, e.g. ett stort hus, a big house.

CLAUSAL ADVERBIAL denotes an adverb modifying the sense of the clause as a whole, e.g. Han är inte dum, He’s not stupid; De är aldrig lata, They are never lazy; Studenterna är förmodligen intelligenta, The students are presumably intelligent.

CLAUSE is a syntactic unit that usually consists of at least a finite verb and a subject (though the subject may be understood, as in most imperative clauses, e.g. Skjut inte budbäraren!, Don’t shoot the messenger!). There are two major types of clause: main clauses (MC) and subordinate clauses (SC), e.g. Middagen stod på bordet (MC), när jag kom hem (SC), The dinner was on the table when I got home. (Cf. SENTENCE.)

COLLECTIVE NOUNS are nouns whose singular form denotes a group, e.g. familj, family; boskap, cattle.

COMMON NOUNS are all nouns that are not PROPER NOUNS, e.g. en hund, a dog; två katter, two cats.

COMPLEMENTS express a meaning that adds to (or complements) that of the subject or object. They can be either an ADJECTIVE PHRASE or a NOUN PHRASE, e.g. Olle och Sven är intelligenta. De är studenter. Olle and Sven are intelligent. They are students.

COMPLEX VERB has two or more parts: Jag har ätit sniglar, I have eaten snails.

COMPOUND VERB is a verb consisting of a STEM and a prefixed PARTICLE, which may be inseparable or separable from the stem, e.g. betala, pay, but köra om/omköra, overtake.

CONGRUENCE (= AGREEMENT)

CONJUGATION denotes the way a verb is inflected, its pattern of endings, and also the different groups of verbs with the same endings, e.g. past tenses in: Conj. I kalla-de, Conj. IIb köp-te, Conj. III bo-dde.

COPULAR verbs (or copulas) link the noun or adjective complement to the subject, e.g. Han är lycklig, He is happy; Eva blev läkare, Eva became a doctor; Sven blev besviken, Sven was disappointed.

COPULATIVE means ‘linking’ (see COPULAR).

CORRELATIVE is the word or phrase that a pronoun replaces or refers to, e.g. Filmen is replaced by som in Filmen som vi såg var urfänig, The film that we saw was really silly.
COUNT NOUN is a noun that describes an individual countable entity and therefore usually possesses a plural form, e.g. bok – böcker, book-s; ägg – ägg, egg-s; pojke – pojkar, boy-s.

DECLENSION denotes the different ways of inflecting the noun in the plural, e.g. flickor, pojkar, parker, äpplen, män, bestsellers (girls, boys, parks, apples, men, bestsellers). It is also used to describe adjective + noun constructions such as the indefinite declension of the adjective, e.g. en sådan liten bil, a little car like that, or the definite declension of the adjective, e.g. den lilla bilen, the little car.

DEFINITE refers to a previously mentioned entity, cf. Tjuven har stulit klockan, The thief has stolen the clock. The INDEFINITE refers to a new entity, e.g. En tjue har stulit klockan, A thief has stolen the clock.

DERIVATIVE refers to a word derived from a STEM, usually by the addition of an AFFIX; e.g. angå, concern; begå, commit and föregå, precede, are all derivatives of the verb gå, go.

DIRECT OBJECT refers to a person or thing directly affected by the action of a (transitive) verb, e.g. Pojken slog bollen/sin syster, The boy hit the ball/his sister.

DUPICATION involves the repetition of a subject, object or adverbial, usually in a pronoun or adverb form, e.g. Olle, han är inte dum, han, Lit.: Olle, he isn’t stupid, he isn’t.

DURATIVE VERB (or verb of duration) denotes a continued action (e.g. sova, sleep), a constant change (e.g. växa, grow) or an intermittent action (e.g. droppa, drip).

ELLIPSIS involves the omission of a word or word group in the sentence, e.g. Jag ville röka men jag fick inte (röka), I wanted to smoke but I was not allowed to (smoke).

END WEIGHT is the principle that long, heavy expressions come at the end of the sentence, e.g. Han äkte sedan med en gammal lastbil utan strålkastare, He then travelled in an old truck without lights.

FINITE VERB is a verb showing by its form tense, mood or voice (active/passive) (cf. NON-FINITE VERB).

FORMAL SUBJECT is is an element (det in Swedish, ‘it’ or ‘there’ in English) inserted to occupy the position before the verb in clauses where the REAL (or GRAMMATICAL) SUBJECT is postponed, e.g. Det (FS) sitter en gubbe (RS) därborta, There’s an old man sitting over there.

FRONTING is moving an element to the beginning of the sentence, cf. Vi älskar rödvin, We love red wine, and Rödvin älskar vi, Red wine we love.

GENDER can be by sex: pojken – han, the boy – he, tjejer – hon, the girl – she, or grammatical gender: ett hus, ett barn; en matta (a house, a child, a carpet).
**Grammatical subject (= formal subject)**

Homophone is a word that is identical in sound to another word, e.g. *komma* = either ‘to come’ or ‘comma’.

**Imperative** is the mood of the verb expressing command or warning or direction, e.g. *Kom!, Come on!; Rör om!, Stir.*

**Impersonal** constructions do not involve a person but usually the impersonal pronoun *det*, e.g. *Det snöar, It’s snowing.*

**Implied subject** is actually an object which functions as subject in a non-finite clause, e.g. *Vi bad honom skriva en rad, We asked him to drop us a line.*

**Indefinable** describes a word that does not *Inflect*, e.g. the adjectives *bra*, good; *utrikes*, foreign; *öde*, deserted, which take no endings for neuter or plural.

**Indefinite** (cf. *Definite*)

**Indirect object** is usually a person or animal benefiting from an action: e.g. *Vi gav honom pengarna, We gave him the money.*

**Infinitive phrase** is a phrase consisting of an infinitive accompanied by optional words which modify it, e.g. *att skriva brev, to write a letter.*

**Inflect** means to change form by modifying an ending, e.g. the verb *skriva* (write) inflects *skriv*, *skriva*, *skriver*, *skrev*, *skrivit*, *skriven*; the noun *bil*, *bilen*, *bilar*, *bilarna*, *bilarnas*, the adjective *rolig*, *roligt*, *roliga*, etc.

**Inflexible** (= *indeclinable*)

**Inflexion** (see *Inflect*)

**Interrogative** means question, e.g. an interrogative pronoun asks a question: *Vem var det?, Who was that?; Varför kom du hit?, Why did you come here?*

**Inverted word order** denotes verb–subject order, e.g. *Idag åker vi, Today we leave.*

**Matrix** is that part of a main clause sentence remaining when the subordinate clause is removed, e.g. *Eva lovade att hon skulle skriva till oss, Eva promised that she would write to us.*

**Morpheme** is the smallest part of a word expressing some meaning: in the word *bilarna*, the cars, there are three morphemes: *bil*, ‘car’, *ar*, plural morpheme, *na*, definite morpheme.

**Mutated vowel** is one that changes in different forms of the word, e.g. *o → ö in son – söner, son – sons; stor – större, big – bigger.*

**Nominal** means a word or phrase acting as a noun, e.g. *Att simma är roligt, To swim is fun; den gamla, the old woman.*

**Homophone** is a word that is identical in sound to another word, e.g. *komma = either ‘to come’ or ‘comma’.*
NON-COUNT NOUN is a noun, often denoting an abstract or substance, that does not usually take a plural, e.g. mjöl, flour; bensin, petrol; luft, air; vatten, water; glädje, joy.

NON-FINITE VERB forms are those forms not showing tense or mood, namely infinitive, supine and participles.

NOUN PHRASE is a noun often accompanied by one or more words before or after the noun which modify it, e.g. en vacker dikt som jag lärde mig, a beautiful poem that I learned.

NUMBER is a collective term for singular and (usually marked by an ending) plural, e.g. en penna, one/a pen, två pennor, two pens.

OTHER ADVERBIALS (or content adverbials or sentence adverbials) are usually an adverb, noun phrase or subordinate clause denoting manner, place, time or condition, e.g. Han åker med tåg (Manner) till Stockholm (Place) i morgon (Time) om han har tid (Condition), He will travel by train to Stockholm tomorrow if he has time.

PARENTHETICAL means bracketing, e.g. the prepositional expression för 10 dagar sedan, ten days ago.

PART OF SPEECH means word class, e.g. noun, adjective, verb, conjunction etc.

PARTICLE is a stressed adverb or preposition appearing together with a verb to form a single unit of meaning, as a particle verb, e.g. om in köra om, overtake; ned in skriva ned, write down.

PARTITIVE indicates that a part is implied, e.g. en del av pengarna, some of the money; en flaska vin, a bottle of wine, ett kilo potatis, a kilo of potatoes

PEJORATIVE means deprecating as in e.g. din dumma åsna, you stupid ass.

PERIPHRASTIC means paraphrasing.

POSTPOSITIONED means coming after another sentence element.

PREDICATE forms the only compulsory part of the clause other than the SUBJECT. The predicate is the verb plus any object, complement or adverbial: Han spelar (piano dagligen), He plays (the piano every day).

PREDICATIVE (LY) indicates that an element is found after the verb.

PREDICATIVE COMPLEMENT is a word or word group (often a NOUN PHRASE or ADJECTIVE PHRASE) which complements, i.e. fills out, the subject, e.g. Hon är hans lärade och hon säger att han är lat, She is his teacher and she says that he is lazy.

PREPOSITIONAL PHRASE consists of a preposition plus a prepositional complement (usually a NOUN PHRASE or INFINITIVE PHRASE), e.g. flickan med det långa håret, the girl with the long hair; flickan gick utan att säga adjö, the girl left without saying goodbye.
PRE-POSITIONED means coming in front of another element.
PRODUCTIVE implies that a word class or method of word formation is
still being used to produce new words, e.g. the suffix -vänlig in sittvänlig, comfortable to sit in.
PROPER NOUNS are names of specific people, places, occasions or events,
books, etc., e.g. Olle, Stockholm, Krig och fred.
RAISING is the practice of moving an element from a subordinate clause
to the front of the main clause (cf. FRONTING), e.g. Det sa Pelle att vi
inte skulle göra, Pelle said that we should not do that.
REAL SUBJECT is the postponed subject, e.g. Det är roligt att dricka vin,
It’s nice to drink wine. (See FORMAL SUBJECT.)
RECIPIROCAL or RECIPROCATING indicates a mutual activity in either the
pronoun, e.g. De älskar varandra, They love one another, or in the
verb, e.g. De kysstes länge, They kissed for a long time.
REFLEXIVE applies to both pronouns and verbs. Reflexive pronouns refer
to the subject in the same clause. They have a distinct form in the 3rd
person, e.g. Han har rakat sig, He has shaved (himself). Reflexive verbs
incorporate such a pronoun: De har lärt sig svenska, They have learned
Swedish.
SEMANTIC denotes the meaning of words.
SENTENCE is a syntactic unit that contains a complete meaning and consists
of one or more clauses (cf. CLAUSE). Thus the following three examples
are all sentences: Titta där!, Look there!; Hon tar bussen, när det
regnar, She takes the bus when it rains; Om du tror, att jag kan komma
ihåg, vad han sa, när vi besökte honom förra veckan, har du fel, If you
think that I can remember what he said when we visited him last week,
you’re wrong.
SIMPLE VERB is one that only consists of one word, e.g. hjälp!, help!;
(han) sover, (he) sleeps; (han) gick, (he) went.
STATEMENT is a declarative sentence or clause ending with a full stop:
Numera finns det vargar i norra Sverige, Now there are wolves in
Northern Sweden.
STEM is the part of the verb common to all of its forms and to which the
inflexional endings are added, e.g. dansa, dansar, dansade, dansat.
SUPINE is an indeclinable form of the verb used together with the auxiliary
verb har to form the perfect tense and hade to form the pluperfect
tense: Jag har/hade målat badrummet, I have/had painted the bathroom.
SYLLABLE consists of a vowel plus one or more consonants, e.g. ö, dö,
rör, röst, in-du-stri-ar-be-ta-re.
TAG QUESTION comes at the end of a statement and invites a response
from the listener. In English it consists of verb + subject (+ negative):
He likes salmon, *doesn’t he*? In Swedish *va*? or *eller hur*? usually suffice: 
*Han gillar lax, eller hur?*

**TERMINATIVE VERBS** denote an action or process implying a state of change or leading to a change or cessation, e.g. *somna*, fall asleep; *låsa*, lock. 

**TOPIC** is the position at the beginning of all main clause **STATEMENTS** and v-questions. It is usually occupied by the subject, e.g. *Vi/Studenterna tycker om öl*, We/The students like beer. But in Swedish, non-subjects, especially **ADVERBIAL** expressions of time or place, often occupy the topic position, e.g. *I morgon spelar jag fotboll*, Tomorrow I’m playing football.

**V-QUESTION** is a question beginning with a v-word, e.g. *vad, vem, vilken, var* plus *hur* and *när*: *Vad gör du?* Vad are you saying?

**VERB PHRASE** consists of a **FINITE VERB** alone or several finite and **NON-FINITE VERBS** in a chain, e.g. *Han reser*, He is travelling; *Han måste kunna springa*, He must be able to run.

**VOICED** indicates a consonant produced with vibration of the larynx, e.g. *b, d, g, v, m, n, r, l*.

**VOICELESS** indicates a consonant produced without vibrating the larynx, e.g. *p, t, k, ð, s, z*. 

Språkriktighetsboken, Skrifter utgivna av Svenska språknämnden 93, Stockholm, 2005.
